Petalo

We strive to deliver uncompromising quality for every classroom and budget. Designed in Denmark. Manufactured in Europe and built to last – more than once.

Children spend many hours every week in school, and they should be at least as comfortable there as anywhere else.

For better learning

petalo.dk

Understanding the future through the past

The world needs furniture that acknowledges the fact that children and student's needs should be met with high quality, respect and solutions to match the high standards and demands of contemporary life and work.

Children spend many hours every week in school, and they should be at least as comfortable there as anywhere else. Simply put, school furniture should be high quality, aesthetically pleasing, durable and so comfortable you forget you're sitting down.

We have been creating classroom interiors and spaces for learning since 1950. We know the past and the present, so we understand how the future should look. Over the years we have developed a thorough understanding of the requirements of a solid classroom that properly supports learning.

But our true passion has always been designing beautiful and ergonomic furniture for younger generations, so on January 1st, 2025 we launched a complete rebranding. We have chosen to let our furniture take center stage and focus all our efforts and experience on creating the best products to furnish the classrooms of the future.

1971 – Delivery for a modern open-space classroom, designed by architect Ole Park.

SEET chairs

A light petal-like design makes for numerous ergonomic seating positions. It's beautiful to look at, light, modern, flexible and – above all – very comfortable.
