Course

AI for Accessibility

This course, developed by Intel's AI for Workforce program, examines the pragmatic deployment of artificial intelligence (AI) in addressing accessibility challenges. Students will explore fundamental AI principles by systematically diving into 4 aspects of accessibility. These aspects are Identification/Screening, Accommodations, Quality of Life and Economic Empowerment, and Access to Remediation & Treatment. Emphasis is placed on the practical application of AI to foster inclusivity and societal empowerment within the context of accessibility.

Instructions to Access Intel Content

Thank you for your interest in Intel's content. Intel Digital Readiness created an *AI for Workforce Support Portal* for colleges accessing their content through NAAIC. The portal allows you to access the most updated Intel AI for Workforce pre-packaged courses, modules, and train-the-trainer guidelines.

To access the Intel AI for Workforce course you selected, an initial onboarding is necessary. You only need to complete this onboarding process once. Kindly refer to the portal registration instructions provided [here](#). When registering, utilize the same email address associated with your NAAIC AI Resource Hub registration.

After registering, you can gain access to the *AI for Workforce Support Portal* and find the course you selected by following these [instructions](#).

Reach out to us if you have any questions: naaic@mdc.edu.
