

Wayground

The platform teachers love. The data leaders need.

Strong adoption

Teachers and students use Wayground because they want to, not because they have to. High participation means your assessment data reflects your district's reality, not a partial picture.

Actionable reporting

Every view is built around a decision, not a data dump. From district-wide trends down to a single student's response, every number connects to a next step.

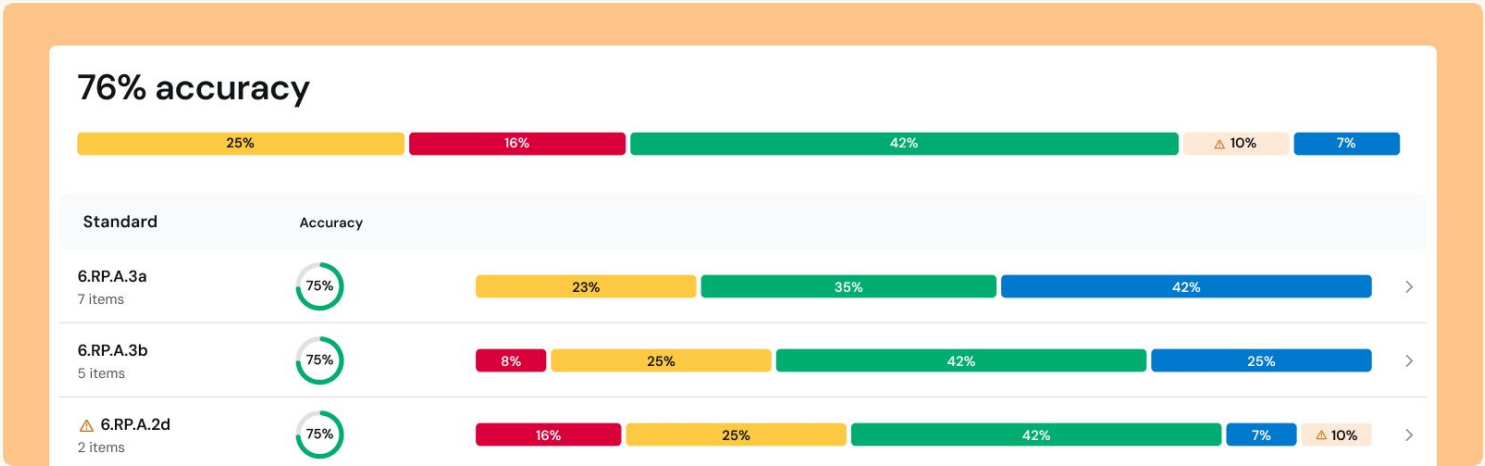

Designed for all students

Native accommodations and universal tools are built into every assessment. Every student is tested fairly, so every gap in your data is a real instructional signal, not a testing artifact.

After every common assessment, leaders ask these 5 questions

How did our students do overall?

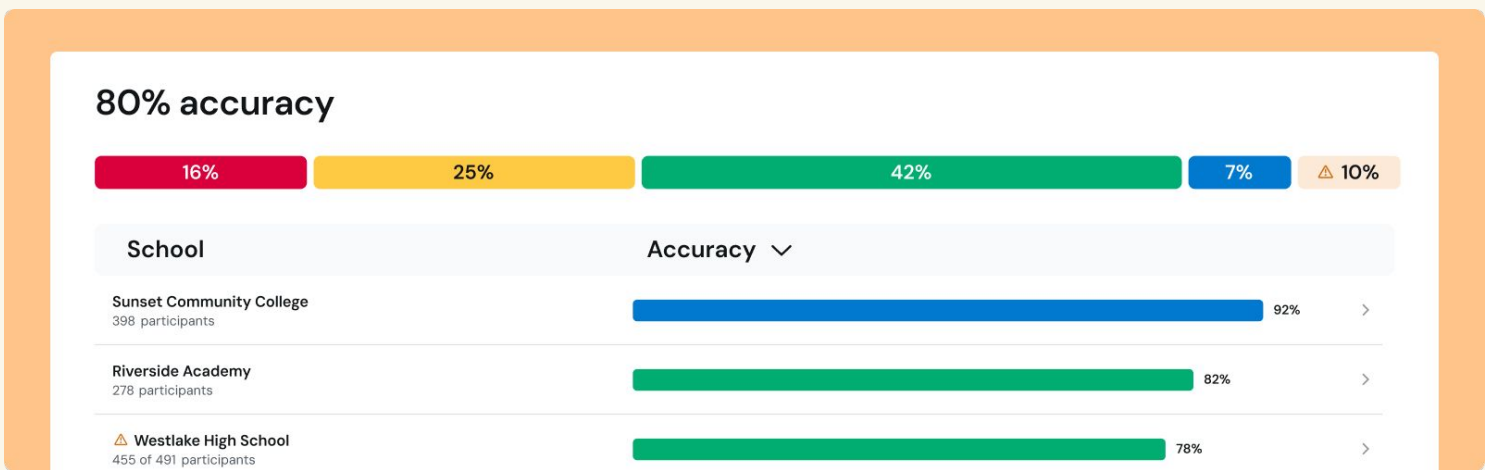

The big picture comes first. Wayground’s Common Assessment Report gives leaders an immediate read on participation, overall accuracy, and student distribution across performance bands, all in one view the moment results are in.

Because teachers and students genuinely engage with the platform, participation rates reflect your actual student population. You’re not drawing conclusions from 40% of your students.

Which standards need reteaching?

Click into any standard to see school-by-school and class-by-class performance. Drill further to item-level accuracy. When 60% of students chose the same wrong answer, you’re not seeing that a standard was missed. You’re seeing exactly what the misconception is. That’s the difference between knowing a gap exists and knowing what to do about it Monday morning.

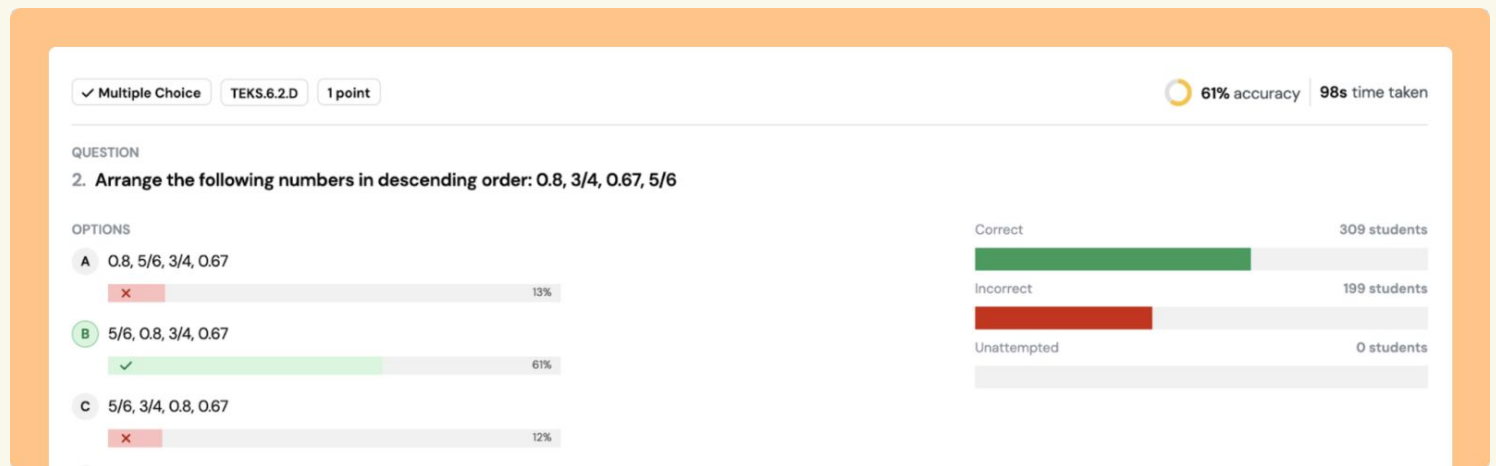

Accountability goal tracking

Set a target (say, 60% of students scoring at Met or Exceeded) and the report shows you instantly which cohorts are on track and which aren’t. No manual calculation. No sorting through spreadsheets.

Item analysis

See exactly which answer options students selected, not whether they got it right or wrong. Knowing that most students who missed a question chose the same distractor tells your instructional team something they can act on. Knowing a question had scattered wrong answers tells them something different. Both matter.

State-test alignment. Wayground mirrors the format and feel of state assessments, so the standards and item insights you get are directly meaningful, not internally consistent alone.

Which schools and classes need attention?

The Schools tab gives you an at-a-glance comparison of every school's performance against the district average. Schools performing above average are visually distinct from those below. Click into any school to see which standards and classes are driving the gap, so support conversations start from data, not assumptions.

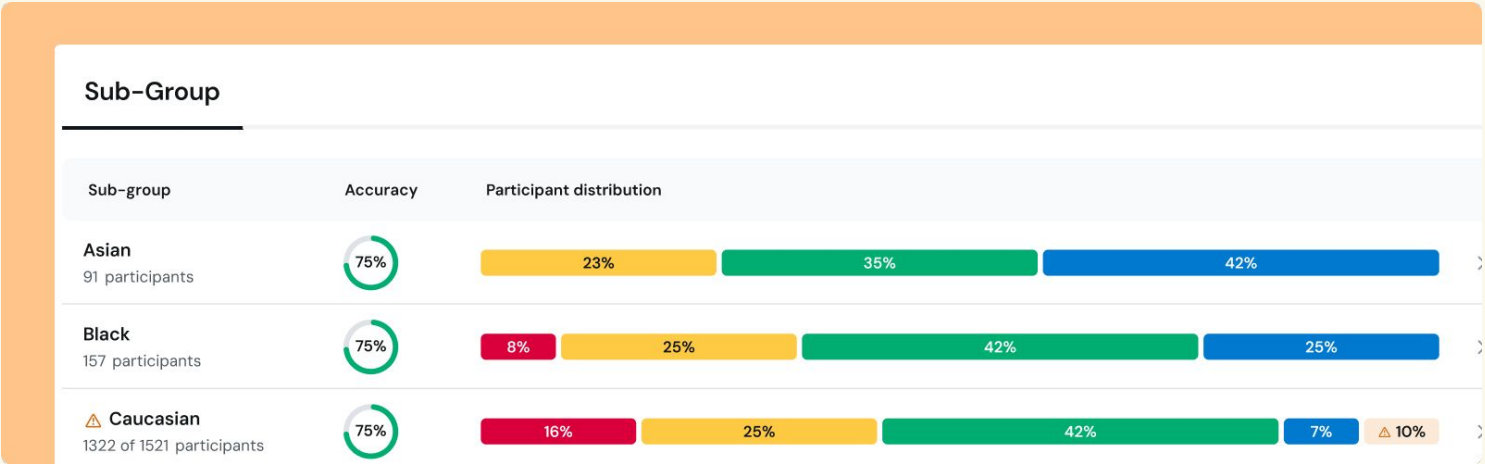

Are all student groups being served?

This is often the hardest question to answer quickly, because the data isn't easy to access in most platforms. In Wayground, subgroup performance is a first-class view, not a secondary export.

Filter to any student group: by ethnicity, by multilingual learner designation, by students with disabilities, by economically disadvantaged status, or by your district's custom subgroups.

See how each group performed on every standard, without any additional setup.

Accommodations built into the assessment, not added after

Universal tools and individualized accommodations are available in every assessment by default. Students receiving accommodations through IEPs or multilingual learner supports take the same assessment with the tools they need already in place. The performance data you see reflects a fair testing experience. When you see a gap in this view, it’s a real instructional signal.

Who needs support right now?

Switch the Deep Dive view to group by individual student. Filter to students scoring below a threshold (below 40%, for example). Wayground generates a prioritized student list, organized by standard or by item, ready for your next reteach conversation or PLC session.

Item accuracy

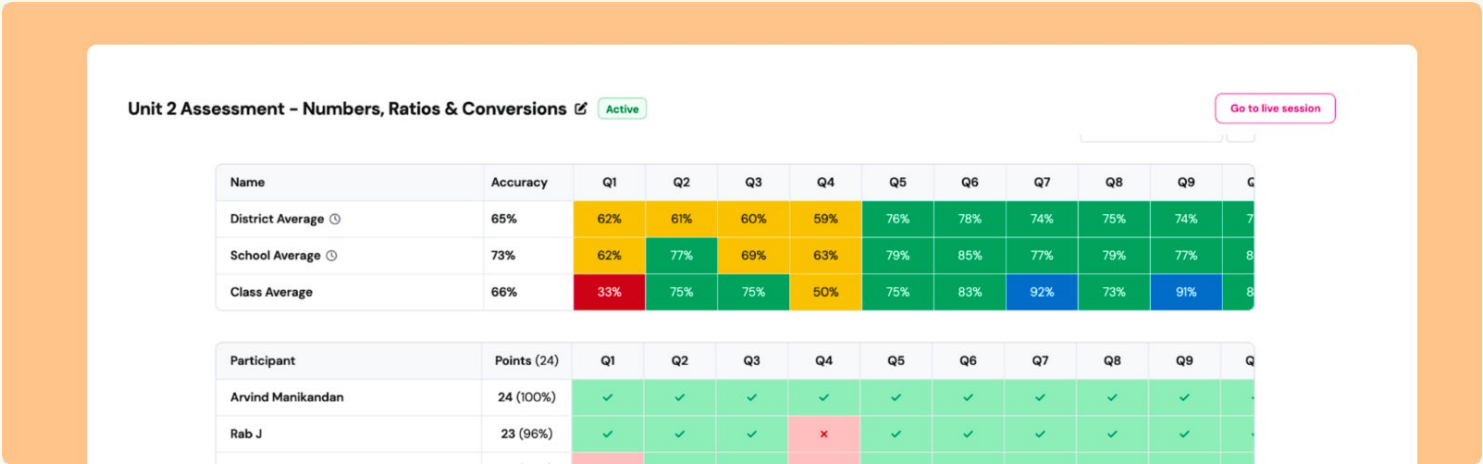

School	Overall	Q10	Q2	Q5	Q3	Q1	Q4	Q7	Q6	Q9
Olivia M. Greenfield Technical School	91%	✗	✓	✓	✓	✓	✓	—	✓	✗
Sophia R. Oak Valley School of Arts	85%	✓	✓	✓	✓	✓	✓	✓	✓	✗
Ethan B. Sunset Community College	74%	✓	✓	✓	✗	✓	✓	✓	✓	✗

Export-ready. Download as PDF for PLC meetings, or Excel for custom analysis. Everything you need is in one report, no pulling from three different systems.

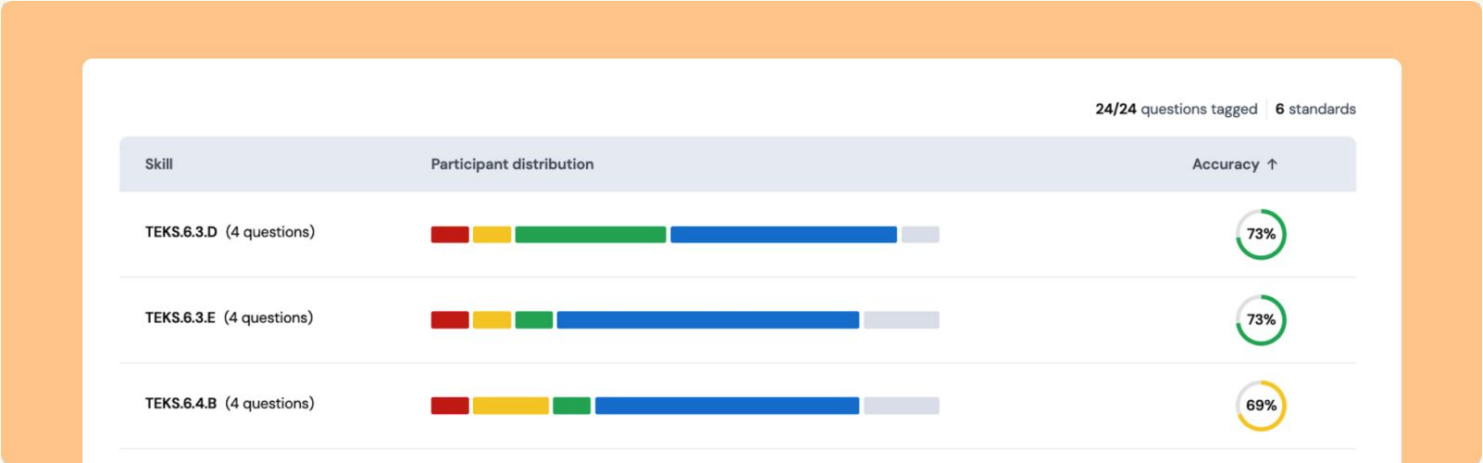

For teachers: class-level reporting

The same assessment, seen from the classroom. Teachers get overall class performance benchmarked against school and district averages, a student-by-question heatmap to spot patterns instantly, per-student accuracy, and standard-by-standard performance to plan reteaching. Printable individual student report cards included.

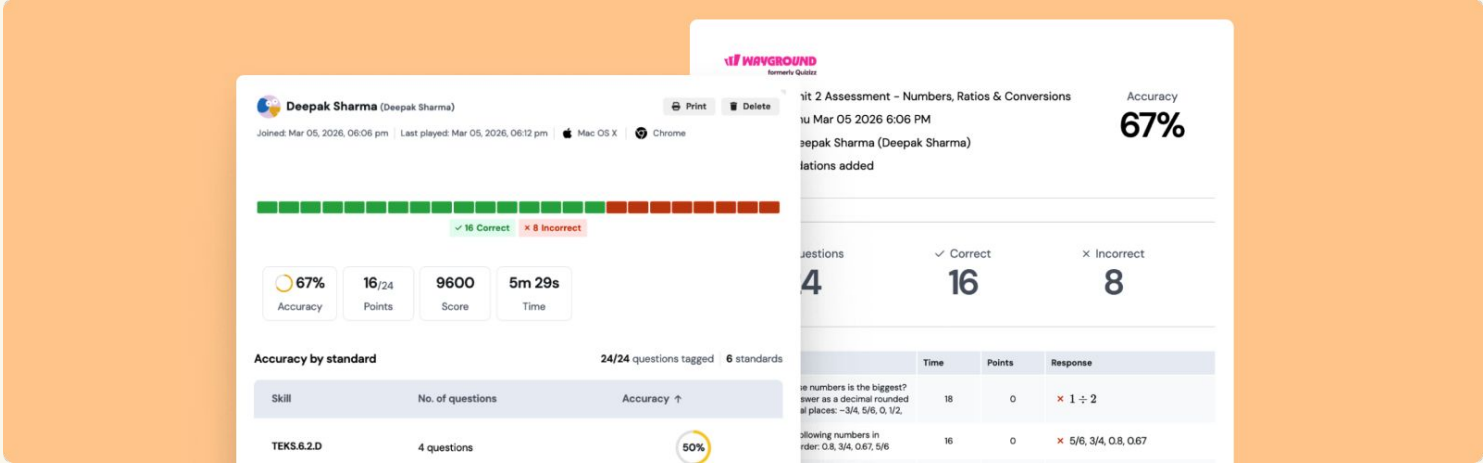

Standards Mastery by Class

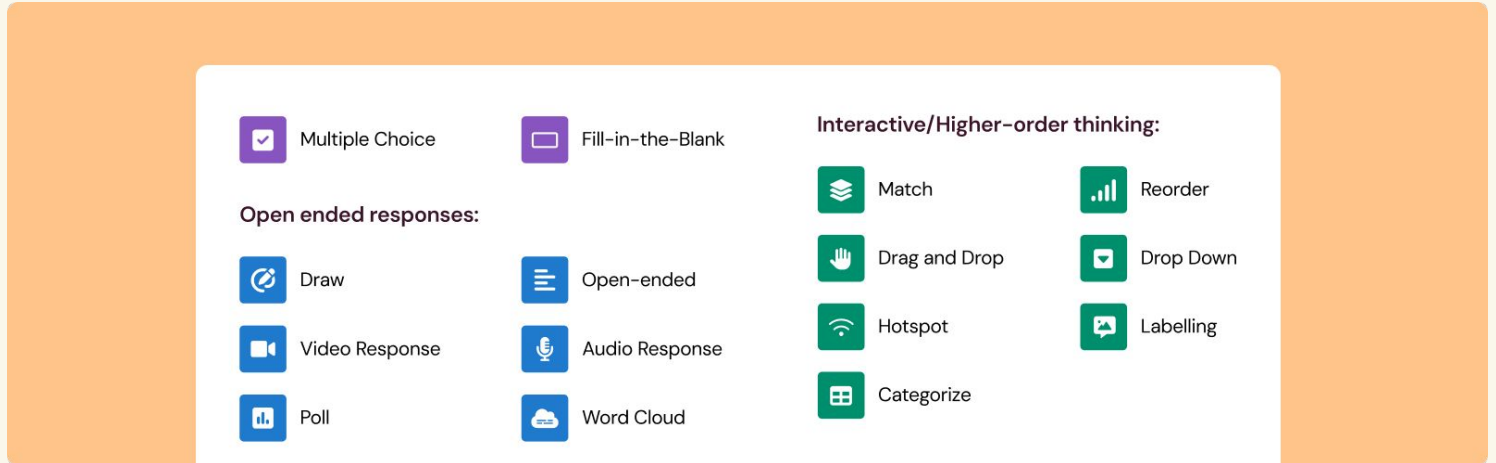

Individual student reports

Click into any student for a complete picture: accuracy by standard, question-level detail, time spent on each item, and a printable report card to share with families or support teams.

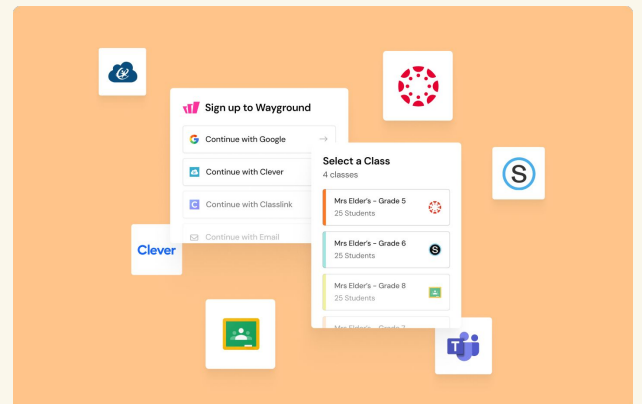

Secure, state-test aligned assessments with personalized accommodations

Every Wayground assessment supports universal tools and individualized accommodations out of the box. LockDown Browser integration keeps assessments secure. And because Wayground mirrors state-test question formats, students build familiarity with the format itself, so on test day they're focused on the content, not figuring out the interface.

Works with what you already have

- **SSO:** Google, Clever, ClassLink. No new credentials.
- **LMS/LTI:** Students access assessments directly from Google Classroom, Canvas, or Schoology.
- **Rostering:** Clever and ClassLink integration. Distribution from district to teacher is automatic.
- **Assessment integrity:** LockDown Browser (Respondus) built in.
- **Data privacy:** Signed SDPAs available.
