

POWER SAFELY

LITHIUM COIN BATTERY SAFETY

Lithium coin batteries can be a hazard for small children. If swallowed, a lithium coin battery can get lodged in a child's esophagus and cause serious harm in as little as two hours. Below are some devices you may already have in your home that are powered by lithium coin batteries.

Learn how to keep children safe through these key steps:

F
I
R
S
T

Find out which devices in your home contain lithium coin batteries and store those devices away and out of reach of children.

Inspect the devices for any that don't have screw on compartments and seal them with tape.

Remove expired batteries and place them away safely and out of reach of children until you can recycle them properly.

Select lithium coin products with safety features such as child secure packaging and when available a non-toxic bitter coating designed to discourage swallowing.

Team up with friends and family to spread this information and keep children safe.

HOW DURACELL IS HELPING

BITTER COATING

Non-toxic, bitter coating (available on 2032, 2025 and 2016 sizes) is designed to help prevent accidental ingestions.

CHILD SECURE PACKAGING

Nearly impossible to open with bare hands.

IF YOUR CHILD SWALLOWS A BATTERY, GO TO THE EMERGENCY ROOM. IF YOU HAVE OTHER QUESTIONS OR CONCERNS, CALL 1-800-498-8666 OR VISIT WWW.BATTERYINGESTIONHOTLINE.COM.
