

# Because a literature review should feel like discovery, not a chore

## AI-powered discovery of relevant research, without the noise

Our recommendation engine surfaces meaningful papers based on citation networks.

## Help students follow the literature and find their place in it

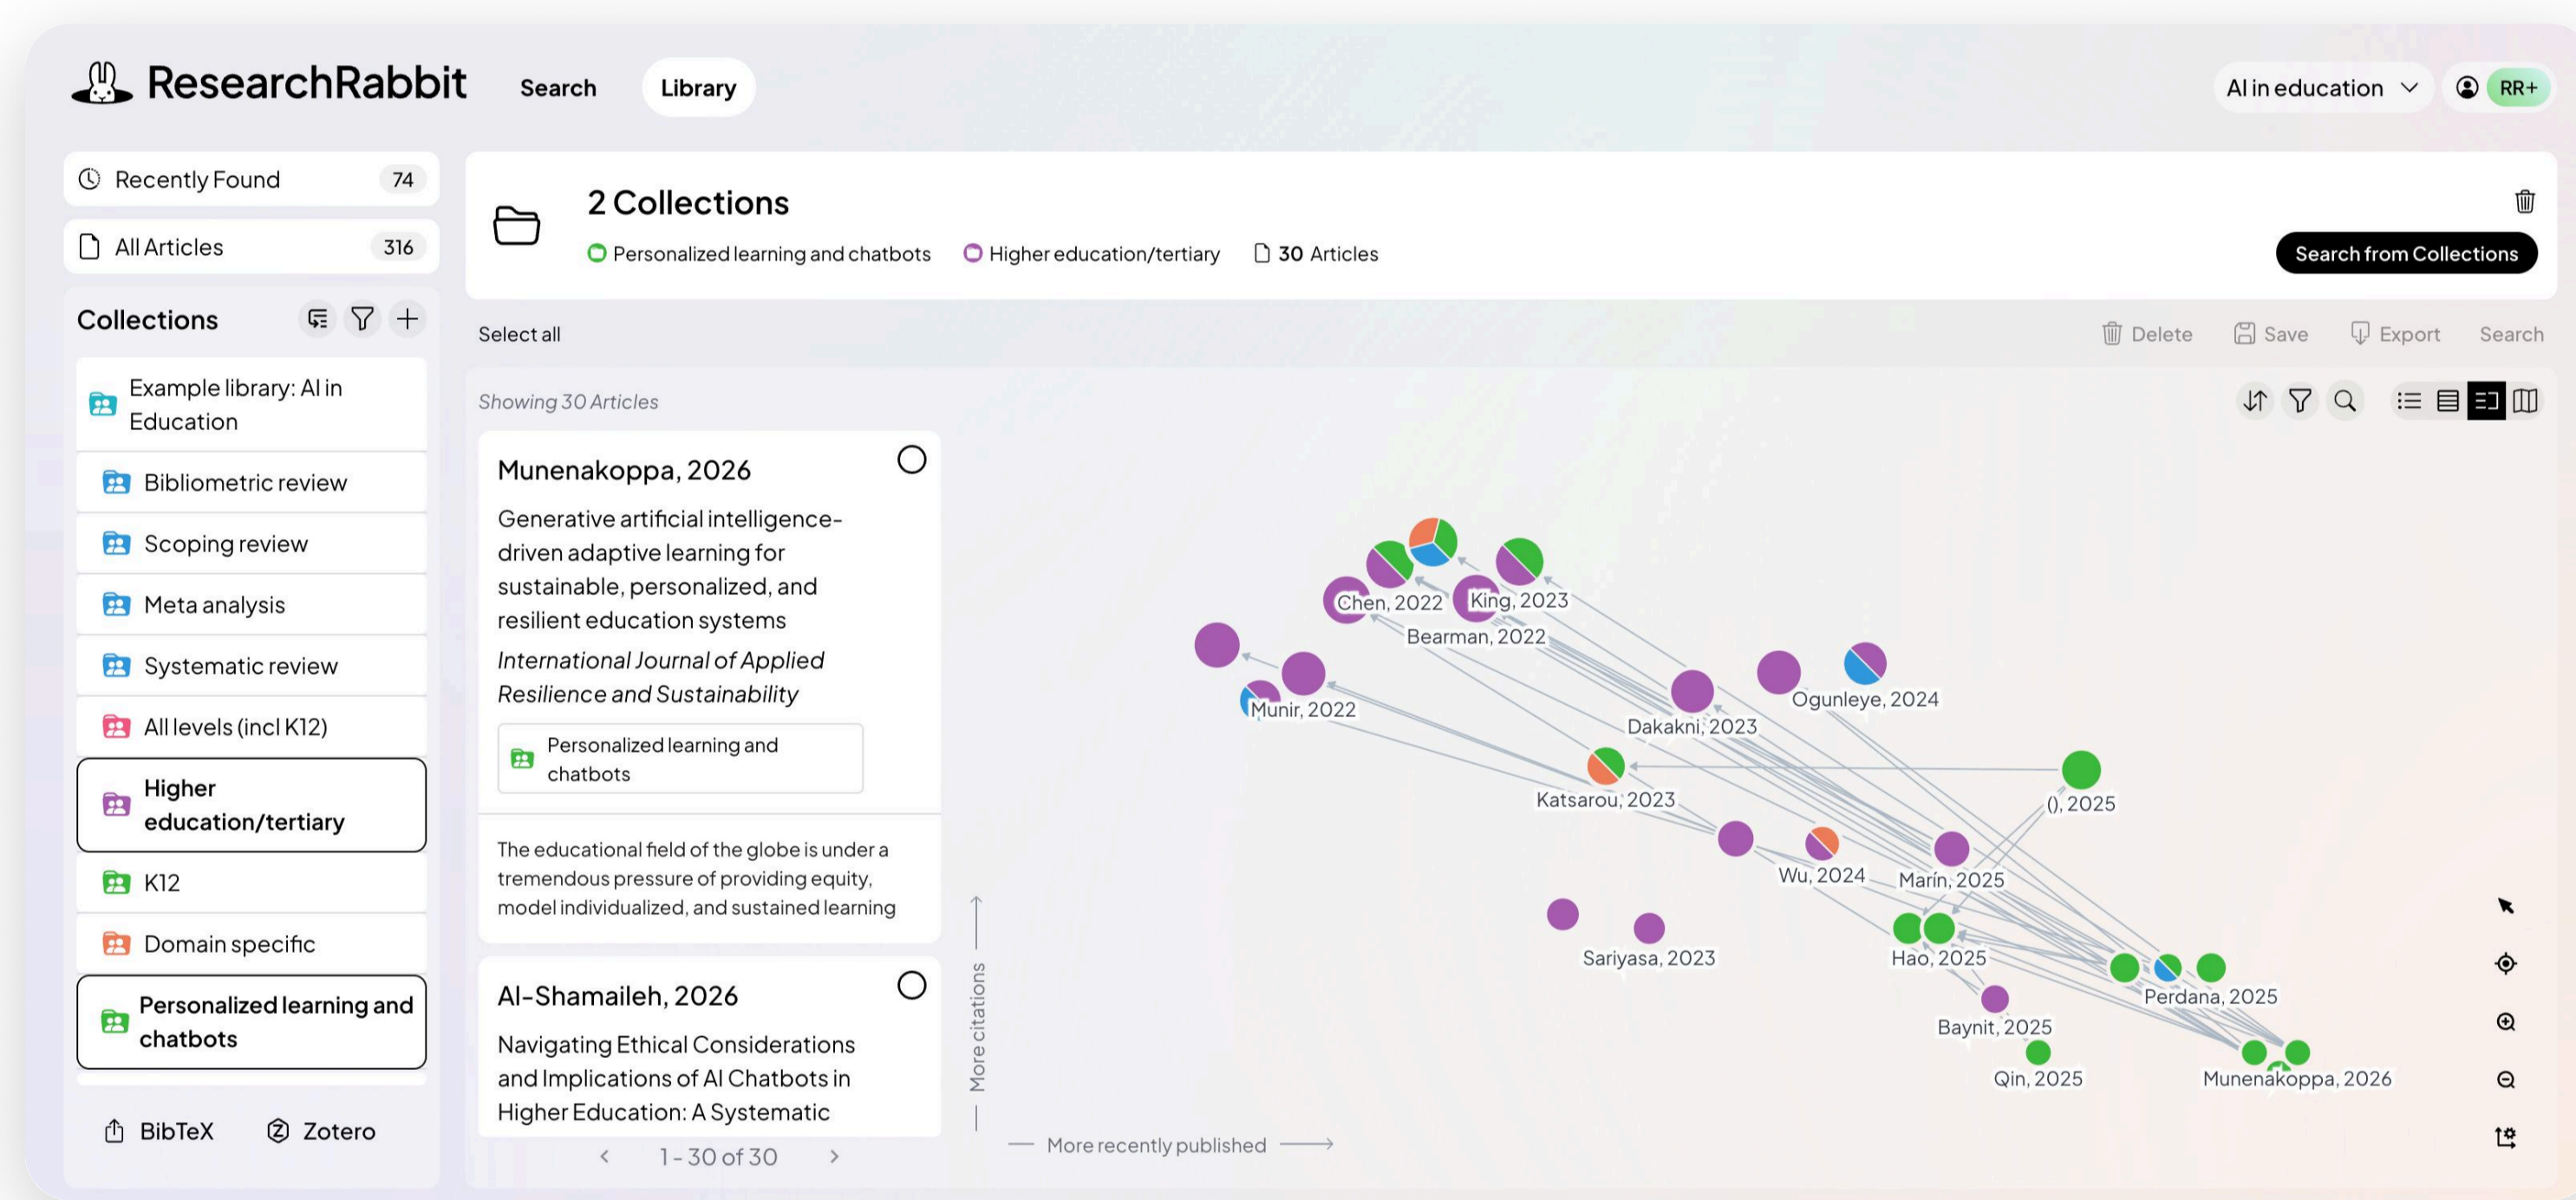

Explore citation networks across 310M+ papers and trace how ideas develop over time.

## Students explore the literature deeply, without losing their way

Build collections, organise sources, and collaborate with supervisors as ideas take shape.

## When the literature makes sense, students go further

Visual, interactive maps make research more intuitive, connected, and rewarding.

“ResearchRabbit changes the often-boring literature review into a smooth and effective process, possibly making searches much faster.

By showing how academic work is connected, this tool helps researchers find influential papers and important new studies that regular keyword searches might overlook “ Molly and Brett – Librarians at Sam Houston State University

## Trusted by researchers at

It was great to meet you at CAUL, we'd love to keep the conversation going:
