

How Andurand Capital Accesses Crucial Data They Need to Build and Analyze Trading Strategies

Andurand Capital Management is a private fund management company in fundamental commodity strategies with a specialization in the oil and energy complex. Andurand Capital is led by Pierre Andurand, one of the world's most renowned oil and energy traders. The investment strategy targets absolute returns with an asymmetric upside, via detailed supply and demand forecasting, fundamental, macroeconomic, and physical market information combined with various technical market indicators to generate fair values, forecasts, and trading signals for energy and commodities.

THE PROBLEM

Andurand Capital was looking for a reputable data provider that could power their internal research and analysis accurately in order to create the best possible trading strategies for their clients. This provider would need to have an accurate, diverse data offering with a wide variety of exchanges. In addition to the data offering, the ideal provider would offer this data in multiple formats.

THE SOLUTION

Andurand Capital came to the conclusion that Barchart would be able to check off all their boxes when it comes to their data needs. Andurand Capital implemented Barchart's getHistory API so they can pull the data they need to build and analyze their trading strategies internally.

Now that Andurand Capital is equipped with the critical data they need to develop the best trading strategies possible for their clients, they can continue to succeed within the energy and commodity space. To learn more about Andurand Capital, please visit www.andurandcapital.com.

"We are dedicated to constantly adding to our large library of data so we can ensure all of our clients have the crucial information they rely on in order to succeed."

— Mark Wator, Head of Sales at Barchart

Barchart is a leading provider of market data and services to the global financial, media, and commodity industries. Our diversified client base trusts Barchart's innovative Solutions across data, software, and technology to power their operation from front to back office, while our Media brands enable financial and commodity professionals to make decisions through web content, news, and publications.
