

Put carrier management on cruise control.

Managing carriers shouldn't slow you down. That's why Shipwell and Highway have partnered to eliminate complexity and risk in carrier onboarding and compliance. With real-time monitoring and automated updates, your team stays focused on moving freight - not chasing paperwork.

Benefits for your business

Save Time with Automation

Cut down on manual data entry and carrier setup.

Strengthen Compliance

Instantly flag carriers with insurance lapses or rule violations.

Reduce Risk

Work only with verified, compliant carriers to protect your operations and reputation.

Keep Profiles Current

Rely on real-time data to maintain accurate carrier records - automatically.

Features at your fingertips

Seamless Integration Setup

Connect your existing Highway account directly within Shipwell's Integration Marketplace.

Automated Carrier Onboarding

Automatically create carrier profiles in Shipwell once onboarding packets are completed in Highway.

Continuous Carrier Monitoring

Stay ahead of compliance issues with automatic updates when Highway detects changes to insurance, safety, or operational status.

Live Profile Updates

Ensure your carrier data is always accurate - no more manual entries or missed changes.

With the Highway integration, we're taking the guesswork out of carrier management. Our customers can now automate onboarding, stay ahead of compliance issues, and ensure carrier data is always up to date - without lifting a finger."

— Shawna Aubin, Product Manager at Shipwell

An unmatched combination

By combining Shipwell's intelligent TMS with Highway's real-time carrier monitoring, this integration brings a new level of automation and assurance to your freight operations. You'll spend less time on manual tasks and more time driving strategy—confident that every carrier in your network is compliant, accurate, and up to date. It's a smarter, safer, and more efficient way to manage carrier relationships from end-to-end.
