Looking for any update from SCC regarding new TD3 features or fixing some issues with the current version. Had my old computer died, so I had to replace it. When reinstalling TD3, couldn't use my previous password. Sent email with serial number, but no response yet. Wonder if they are on holiday break.

===== We are now selling un-supported versions of Train Dispatcher 3.5 and Track Builder 3.1 on ebay.com. Go to ebay and search for Train Dispatcher or Track Builder, or click one of the links below to make a purchase. After buying we will send you via email your password, serial number and instructions for downloading within two business days. Before you buy you can download the programs and manuals using the buttons at the bottom of the page. Go to Train Dispatcher 3.5 on ebayGo to Track Builder 3.1 on ebayOn April 30, 2012 we stopped providing free unlimited support for these products if you are a current owner of these products you can still download them from the links below. However, the libraries in the "For Sale" territory do not work anymore. We provide the downloads so that customers who previously purchased them can get access to them. Please note that the latest versions of Train Dispatcher and Track Builder will run on Windows 7 and 10. There have been problems running them on Vista. We do not know if they will run on Windows 8. The programs can only be downloaded, we no longer sell the programs on CDs. You can download the programs and manuals from the links below. Download Train Dispatcher 3.5 Download Track Builder 3.1 GDownload Train Dispatcher 3 Manual Download Track Builder 3 Manual bottom of page I have played Train Dispatcher for years and have all their libraries downloaded, but do not have all the passwords. Signal Computer Consultants made it clear in no terms that they do not sell this on eBay anymore and you have to buy it here. Has anyone done this? How many libraries does it come with? Did a year ago. Comes with the default libraries. The library files are available from the site. Both applications work on Windows 10. Kevin Kevin, I have the complete library from before, but not all the passwords for the ones I want to play. Do you still need to buy passwords? If so, how? They don't come with passwords, but you can open the password protected track libraries in Track Builder. Unfortunately, you'd have to then recreate the libraries since you can't resave them to open them. Kevin OK, so it sounds like it's better for me to just stick with what I have. Thanks, Kevin. When it comes to software systems like Train Dispatcher 3.5, the password is very important information that protects sensitive data and functionality from unauthorized access. It's essential to understand how to manage passwords properly in order to ensure the security of such systems. The password for Train Dispatcher 3.5 should be strong and unique, meaning using a combination of uppercase and lowercase letters, numbers, and special characters. Avoid using easily guessable information such as common words, birthdays, or sequential patterns. Furthermore, it's crucial to keep the password confidential and not share it with anyone. Train Dispatcher 3.5, like any other software, relies on the secrecy of the password to maintain the integrity of the system. Regularly updating the password is also a good practice to minimize the risk of unauthorized access. Changing the password at least every few months can help prevent potential security breaches. Remember, cyber security is very important for everyone. By following these simple rules, you can play your part in keeping systems like Train Dispatcher 3.5 secure and protected

===== Unfortunately, the "train games" discussion group is no longer active, so I'm taking a chance by posting this question. Recently, I upgraded to a new computer and am wondering if there's any way to transfer my many territory simulations, which I've spent years modifying and purchased, to the new machine. The game has been discontinued since 2004, making it difficult to find downloadable versions. I tried copying my original program but was only able to run it as a demo version, not with for-sale territories. Any suggestions would be greatly appreciated, as losing all those simulations and track layouts would be a shame. maybe someone here had any luck running Train Dispatcher 3 on Windows 8.1 Pro 64-bit? I'm trying to avoid upgrading from XP Service pack 2 directly to Win 10, and I'm not sure if compatibility mode would work with this game. One of the worst operating systems is Windows ME, followed by Vista and Windows 8.x, all considered transitional versions of desktop OS. Date: 01/03/19 10:39 Re: Train Dispatcher 3 Game Author: mully By any chance would this game run on Apple? Gary Date: 01/19/19 19:14 Re: Train Dispatcher 3 Game Author: engineerinvirginia mully Wrote: ----- > By any chance would this game work on Apple? > > Gary Maybe if you installed XQuartz and Wine, which supplies libraries to run Windows programs in a UNIX environment. You know that MacOS is UNIX, derived from BSD and using a modified Mach kernel. Date: 10/22/20 08:52 Train Dispatcher 3 Group IO? Author: dcorreia I'm looking for the Groups IO for people who have the old Train Dispatcher 3 game. I thought it was "dispatchcontrol" but the group is no longer listed. Can someone point me to the right group? I might want to purchase some more territories. Date: 10/22/20 09:57 Re: Train Dispatcher 3 Group IO? Author: sarailfan Think you're looking for the "Dispatch Central" group. Try that, hopefully you can find what you're looking for. Posted from Android Darren Boes Lethbridge, AB Southern Alberta Railfan Date: 11/07/20 06:18 Re: Train Dispatcher 3 Group IO? I am a member of that group, DispatchCenter (no space between the two words if that makes a difference). There are dozens of territories posted there for free, you might not need to purchase another territory again. Date: 11/07/20 09:22 Re: Train Dispatcher 3 Group IO? Author: BRAtkinson Just an FYI about Train Dispatcher 3... I don't believe the former Signal Computer Consultants supports the program anymore. Also, I had to "trick it" to install on Win 7 64 bit. When I upgraded in place to Win 10 64 bit, it ran fine. Unfortunately, I had to resort to a 'clean install' for Win 10 due to other issues. Date: 11/07/20 11:12 Re: Train Dispatcher 3 Group IO? Author: TAW Have a look at this In my opinion, it is better than TD3 and is current development and supported. TAW Date: 11/08/20 02:45 Re: Train Dispatcher 3 Group IO? Author: bobwilcox TAW. Thank you.I'm looking for the Groups IO for people who have the old Train Dispatcher 3 game. I thought it was "dispatchcontrol," but the group is no longer listed. Can someone point me to the right group? I might want to purchase some more territories. Thanks. I'm a member of that group, DispatchCenter (no space between the two words if that makes a difference). There are dozens of territories posted there for free, which means you might not need to purchase another territory again. rewritten text thread creation initiated ----- currently navigating through a list of threads =====
