

Access to life-saving therapies should not depend on where you live:

How can we redesign CAR-T manufacturing to reach more patients in need?

World Health Day - April 7th, 2026

CAR-T therapies are transforming cancer care, but access remains limited for many patients, due to:

Complex manufacturing

Limited treatment centers

Long treatment timelines

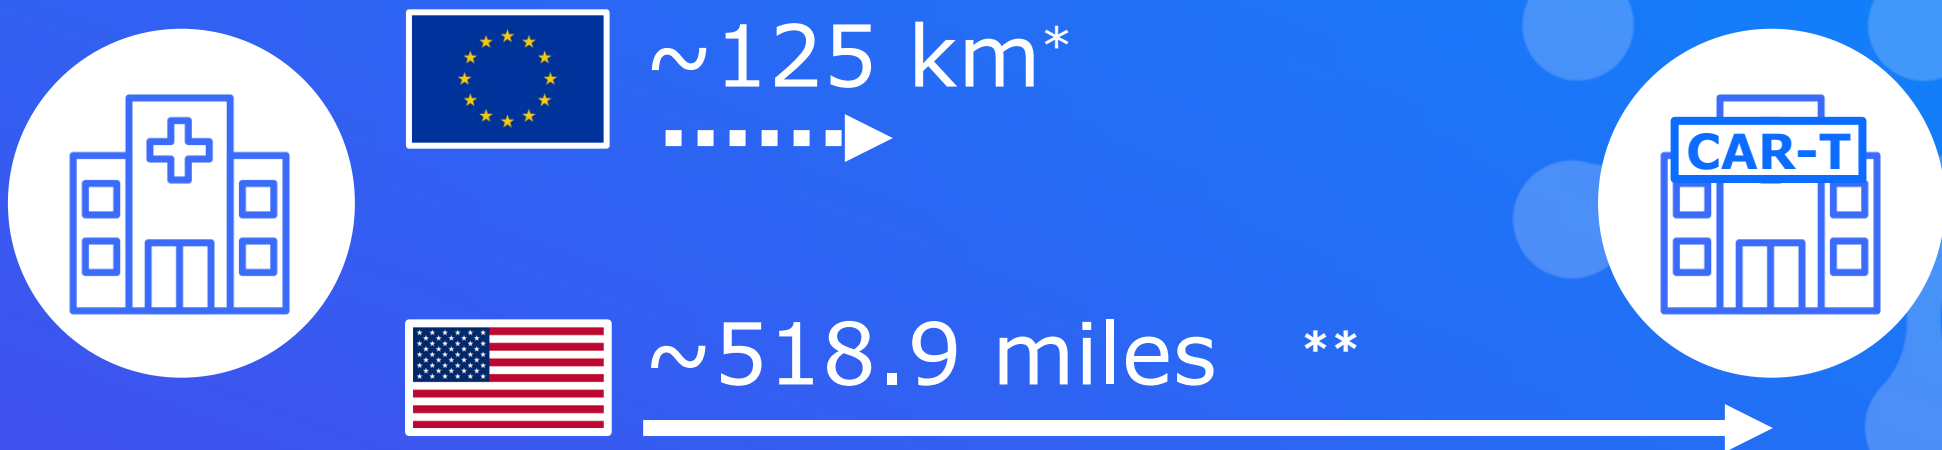

For many patients, time is critical.

Delays in treatment pathways
can mean missed
opportunities for therapy.

Not every patient can reach a
CAR-T center.
Geographic and structural
barriers still exist worldwide.

World Health Day - April 7th, 2026

Improving access requires science, innovation, and collaboration

Healthcare providers

Researchers

Policy makers

Industry partners

This is where **EASYGEN** comes in.

EASYGEN is a collaborative initiative working to improve access and pathways for CAR-T therapies.

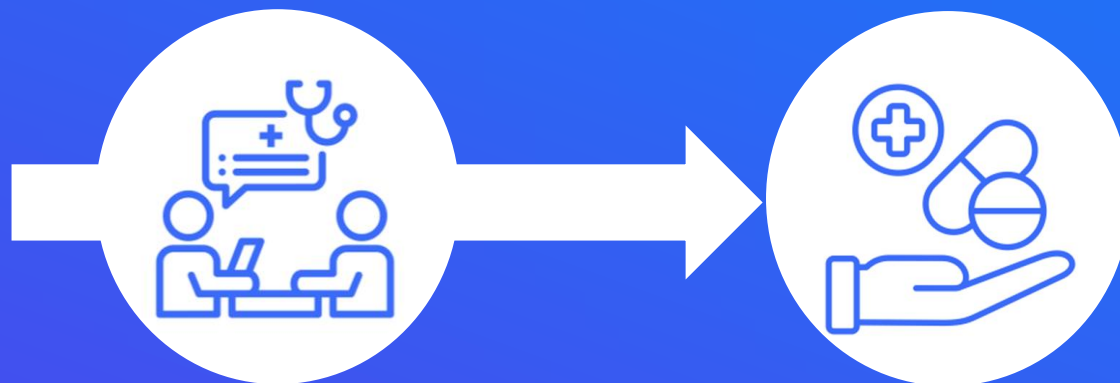

World Health Day - April 7th, 2026

Our goal

Simpler pathways.
Better coordination.
Faster access to
innovative therapies.

World Health Day - April 7th, 2026

Innovation,
Evidence,
Science,
access matters.

Together for health.

World Health Day - April 7th, 2026

TOGETHER FOR HEALTH.

STAND WITH SCIENCE.
