

# ORIGIN DUCTWORKS

## FLOOR SWEEP

The Floor Sweep, also commonly known as a Floor Hood or Dust Nozzle, connects to your dust collection system to make shop floor cleanups quick and easy. Ideal for removing sawdust, metal dust, and other debris, it features a double-hinged door that opens for sweeping and closes automatically under system vacuum to prevent pressure loss. The integral “foot-push” tab allows hands-free operation for added convenience. Constructed from galvanized steel or 304 stainless steel, with optional 316 stainless steel, the Floor Sweep is available in diameters up to 12” with flanged ends or other end types, optional 16- and 18-gauge materials, and manufactured to a tolerance of 31/8 inch.

Øin.	Std. Weight Lbs.
