Lanyards

Production Process

Each lanyard is carefully sublimated using a heat press, with colors deeply embedded in the fabric for sharp, durable, vibrant, and high-quality textured prints that resist fading and scratching.

Available in full-color dye-sublimation on one or two sides, with heat-sealed edges for a clean, long-lasting finish.

Materials

Crafted from **eco-friendly rPET** for a sustainable option, or durable polyester (PET) for long-lasting use.

Sizes (Width)

Comes in three width options to suit different preferences and uses:

- 1.5 cm (15mm)
- 2.0 cm (20mm)
- 2.5 cm (25mm)

Branding Features

Branded Welded End

"Engrave" your logo with our customizable stitched end.

Print Welded End

Personalize this section with your text or print.

Lanyard Accessories

Single Hook

A durable and comfortable choice for any event.

Customizable in width and finish, with a sturdy metal hook for secure badge attachment — ideal for conferences, staff, and delegate IDs

Double Hook

Featuring two metal hooks to keep badges straight and visible, this elegant, practical lanyard is ideal for premium accreditation badges and large-scale events

Breakaway Buckle

Features a quick-release buckles for extra safety in busy or high-movement areas.

Ideal for schools, exhibitions, and active events.

Safety Buckle

For convenience, allows the wearer to detach the lower section (with the ID or keys) without removing the entire lanyard.

Reel

Durable retractable lanyard reel with a smooth cord and secure clip, featuring a clear epoxy finish for glossy, scratch-resistant protection. Perfect for ID cards, keys, badges, or small tools

UV Badges

UV Print

Flexible Ultraviolet (UV) light-cured inks produce sharp, durable, vibrant, and high-quality textured prints that won't fade or scratch easily. Available with a matte or gloss finish.

Customized Sizes

Badges of any size, tailored to your event's style and needs:

CR80: 85.6 × 54 mm
CR100: 70 × 100 mm
CR200: 90 × 140 mm

Materials

UV print badges come in PVC and PLA options:

PVC offers durability and high-end look, ideal for everyday use in offices and extensive events.

PLA features a **sustainable**, lightweight choice, ideal for short-term events and environmentally friendly applications.

Wristbands

Production Process

Made with **recycled PET (rPET)**, each wristband is carefully sublimated with a heat press, embedding long-lasting colors directly into the material for fade & scratch-resistant designs

Sizes

Wristband with a fixed width of 1.5 cm (15mm) and a length of 35 cm (350mm)

Plastic Lock

Comfortable, durable fabric wristband secured with a tamper-proof plastic lock for reliable event access control

Bamboo Lock

Eco-friendly fabric wristband paired with a sustainable bamboo lock, combining style with environmental responsibility

Additional Production Lines

A wide range of high-quality, advanced UV printing and customization services on various materials, including glass, metal, wood, acrylic, and plastic

Create a unique identity with personalized epoxy reel designs, perfect for showcasing your brand logo.

DTF printing delivers detailed and lasting prints on fabric.

Laser engraving service provides precise and permanent marking on almost any surface.

UV DTF stickers & labels ideal for hard surfaces, offering a sleek, professional finish.

VIP Box

Unique VIP Event Identity by Lanyardy featuring fully customizable wristbands, lanyards, and badges, proudly crafted in our own Qatar production facility.

Each piece is made with premium, **eco-friendly** materials and produced using advanced machines to achieve a sophisticated touch that meets VVIP standards.

Commitment to **SUSTAINABILITY**

Lanyardy is dedicated to minimizing our environmental footprint by integrating sustainable practices into every stage of our production and operations.

Our efforts align with Qatar National Vision 2030 across four pillars: human, social, economic, and environmental development.

Eco-Friendly Materials: Collecting sustainable, responsibly sourced materials, prioritizing local suppliers whenever possible, to reduce our environmental impact from the very start.

Recycle Program: We introduced recycling bins at events to collect used wristbands, lanyards, and badges – giving these materials a second life and helping to minimize waste.

Lower Production Footprint: We produced locally in Qatar, minimizing emissions and adopting new energy-efficient printing technologies, which allows Lanyardy to produce materials itself.

Our Production Facility

Our factory at Building 27, Street 3137, Zone 91, Birkat Al Awamer, Al Wukair, produces large volume at a high-speed and with unprecedented quality.

Precision & Printing

Your approved design is sent directly to our sublimation printers, where high-definition colors are heat-infused into the fabric. The result: vibrant, permanent prints that resist fading, cracking, or peeling-guaranteed.

Cut, Seal & Assemble

Printed rolls are precisely cut and heat-welded, then fitted with your chosen hardware-whether a single or double hook-ensuring meticulous attention to detail in every piece.

Quality Check & Shipping

Each item undergoes a three-point inspection-print clarity, sealing strength, and hardware integrity. Once approved, products are carefully packed and shipped ourselves within four hours.
