## Industrial Pumps: Supply, Spares & Maintenance Kits

At Ardorvis Technology Ltd, we supply, service, and support a comprehensive range of industrial pumps for fluid transfer, dosing, circulation, and dewatering applications. Whether you're handling clean water, chemicals, lubricants, slurries, or aggressive process media, we offer robust pump solutions backed by full spares availability and OEM maintenance kits to maximise uptime and performance.

We work with globally trusted manufacturers and can support both new installations and legacy equipment through our broad supply network.

### Full Support – End-to-End Pump Services

- Supply of complete pump units for new and retrofit applications
- OEM and aftermarket spare parts
- Pump rebuild kits, including seals, bearings, rotors, shafts, and diaphragms
- Field and workshop-based servicing
- Selection support based on flow rate, head, media type, and site conditions
- ATEX, food-grade, and chemical-resistant configurations available

## Pump Types We Offer

### Axial Flow Pumps

Designed for high flow, low head applications such as flood control, cooling circuits, and water recirculation systems. Ideal for large volumes at low pressure.

### Lubrication Pumps (Sloan Lubrication Systems)

Precision pumps designed to deliver reliable oil distribution in reciprocating compressors and rotating equipment. We supply full Sloan systems and spares for critical machinery applications.

### Booster Sets

Complete pre-assembled booster pump systems for pressure boosting in domestic, commercial, and industrial applications. Available with integrated controls, variable-speed drives, and multi-pump arrangements.

### End-Suction Pumps

The most common centrifugal pump type. Suitable for clean water, light chemicals, and HVAC systems. Offered in close-coupled or long-coupled designs for ease of service.

### Gear Pumps

Ideal for viscous media like oil, lubricants, and polymers. Positive displacement operation ensures accurate metering under varying pressures.

**Horizontal & Vertical Multistage Pumps**

Multi-impeller pumps designed for high-pressure applications, such as boiler feed, RO filtration, and high-rise water supply. Offered in stainless steel or cast iron variants.

**In-Line Pumps**

Space-saving centrifugal designs for piped systems, typically found in HVAC, building services, and process loops. Available with integrated pressure sensors and VFDs.

**Piston Pumps**

High-pressure positive displacement pumps for precision dosing, metering, and high-viscosity fluid handling. Excellent in oil & gas, chemical, and cleaning systems.

**Rotary Lobe Pumps**

Gentle pumping action ideal for hygienic applications in food, beverage, and pharmaceutical systems. CIP/SIP capable and fully cleanable with FDA-approved materials.

**Submersible Pumps**

Engineered for drainage, sewage, sludge, and slurry. Available with float switches, cutter impellers, and ATEX certification for hazardous environments.

**Vane Pumps**

Compact and efficient pumps suited for light oil, solvents, fuels, and other low-viscosity liquids. Consistent flow and good suction characteristics.  
Our Trusted Pump Manufacturers

We source and supply pumps from some of the most respected names in the industry:

Manufacturer			
Alfa Laval	Armstrong	ARO	Blagdon
Braude	Calpeda	Dellmeco	Dreno Pompe
Ebra	Enviroflex	Flojet	Flygt
Flux	Garlock	GemmeCotti	Goulds

Graco	Grundfos	IWAKI	Jabsco
JS Pumps	Koshin	KSB	Lowara
Milton Roy	Mono	Nomad	Pedrollo
Pentax	Sulzer	Wilden	Wilo

#### Industries We Serve

- Biogas and anaerobic digestion
- Water and wastewater treatment
- Chemical and pharmaceutical manufacturing
- Food and beverage processing
- Power generation
- Mining, oil, and gas
- HVAC and building services

Whether you need a full pump system, a replacement unit, or a complete OEM service kit, Ardorvis Technology Ltd provides end-to-end support tailored to your process requirements. With decades of industry experience and access to a wide supply chain, we ensure fast lead times and expert technical backup.

Contact our team today for technical advice, stock availability, or a quote on complete pump assemblies, spares, or repair kits.
