

XFT1860

- Three-axis elliptical vibrating screen, large amplitude, higher screening efficiency and stronger adaptability.
- Large exciting force, not easy to block holes, easy to screen fine materials and powder materials.
- Full hydraulic drive concept, smoother and more reliable operation; It can be used as oil and electricity, and can be connected to external mains power to reduce operating costs and emissions.
- Wireless remote control, one-button start and stop, intelligent fault diagnosis, real-time monitoring and storage of running status, more convenient for users to operate.
- Folding conveyor, transition transportation is more convenient.

Mobile Screening Station	
Product Model	XFT1860E
Power Drive Mode	Oil and Electricity Dual Use
Maximum Feeding Size	150 mm
Size Of Screen Box (Width × Length)	1930x6100 mm
Processing Capacity	150~600 t/h
Complete Machine Weight	44 t
Engine Brand	YUCHAI (National IV)
Engine Power	154 kW
