

What makes a good boot?

Easy cleaning

Materials and designs that rinse clean, supporting biosecurity and hygiene.

Breathability

Allows moisture and heat to escape for all-day comfort, especially in summer.

Insulation

Keeps feet warm in cold and frosty conditions.

Ankle support

Helps prevent sprains and twists on uneven ground, hills and rough terrain.

Water-resistance

Helps keep feet dry in wet paddocks, mud, creeks and winter conditions.

Toe protection

Protects against crushing injuries from livestock, gates, machinery and falling objects.

Cushioning & comfort

Shock absorption and support reduce fatigue during long days on your feet.

Penetration-resistance

Puncture-resistant midsoles defend against wire, nails, thorns and sharp objects.

Grip – slip-resistance

High-traction outsoles for sure footing on mud, grass, rock, concrete and ice.
