NFTREE: REDEFINING ECOSYSTEM CONSERVATION

Conservation financing mechanism

NFTREE: REDEFINING ECOSYSTEM CONSERVATION

ABOUT FUNDACIÓN FUTURO

Founded in 2000 in Ecuador, Fundación Futuro is the conservation organisation behind NFTree. Its mission: reconnect forest remnants, harmonise community livelihoods with nature, and deploy transparent financing for conservation.

- 25+ years of conservation practice in Ecuador
- SNAP registration of Mashpi-Tayra Reserve
- 15 host communities strengthened
- \$5.5M+ mobilised for conservation and development

NFTREE

NFTree is the conservation financing mechanism created by Fundación Futuro – an Ecuadorian non-profit with 25+ years protecting life in the Chocó Andes. NFTree translates that field expertise into technology-driven climate finance, returning verified revenue directly to forest owners and communities.

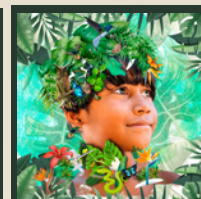

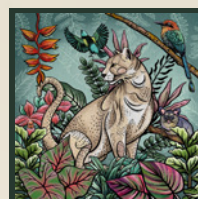

HOW IT WORKS

NFTree issues Polygon blockchainbased Stewardship Certificates of Verified Outcomes – tokenising every 10+10m forest parcel with AI and satellite-verified carbon and biodiversity data, making conservation economically superior to deforestation

80%

OF REVENUE RETURNS TO LANDOWNERS & COMMUNITIES

NFTS' NFTREES

WHAT WE PROTECT

We are members of the Choco Andes Network which focuses its work from 50 to 4,900 meters above sea level, recognizing that the Chocó forests are interconnected and require local, regional, and global approaches to ensure their conservation.

OUR GOAL IS THE CONSERVATION OF 500,000 HECTARES

OUR CONSERVATION MODEL

Six dimensions generating lasting ecological and economic value:

Land Tenure

Conservation

Financing

Livelihoods

Agroecology

Capacity Building

OUR CONSERVATION MODEL

11K ha

Conserved and financed

\$5.5M

Mobilised

15

Communities

171K tCO2

Sequestered

OUR VISION

A roadmap to 500,000 hectares – reconnecting the Chocó Andes.

Current: 11K ha → Phase 2: 50K ha → Phase 3: 200K ha → Vision: 500K ha

TECHNOLOGY STACK

10x10m Pixel Tokenisation

Every parcel mapped, measured and verified on the blockchain – full traceability of each ton of CO2eq.

AI & Satellite Monitoring

Real-time remote sensing: Carbon Stocks (published), Carbon Productivity (In press), Alpha Biodiversity (In press).

National & Intl. Certification

Ecuador Carbono Cero + BioCarbon Standard + International Carbon Registry. First-mover in Ecuador's carbon market.

PROJECT SCALE & FINANCIALS

24,916 ha

Project Area

800K tCO2e

20-yr Supply

\$18/ton

Carbon Price

\$13M

Est. Value

WHY PARTNER WITH NFTREE

Strict Project Selection

Only high-impact areas qualify – rigorous on-site + satellite baseline before any credit is issued.

First-Mover Advantage

Part of Ecuador's national carbon portfolio, aligned with national NDCs.

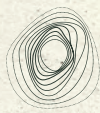

Transparent, Verified Impact

Every ton tracked via digital registry. Verified permanence monitoring guaranteed.

WE'RE LOOKING FOR

- Corporate Carbon Buyers
- Impact Investors
- Conservation Partners
- Nature-Based Funds
