Cinema Comes Alive

# SMART FEATURES

## Smart, Seamless & Intuitive

**WebOS** is a Linux-based smart TV operating system developed by LG, offering a fast, intuitive, and user-friendly interface. Powered by **AI ThinQ**, it enables smart voice control, personalized content recommendations and seamless smart home integration. The minimalist launcher bar allows quick access to apps and settings without disrupting viewing. WebOS ensures smooth multitasking and intelligent user adaptation. It delivers a truly connected and responsive smart TV experience.

powered by  
**webOS** Hub

**ThinQ** AI

## IPS panel

An **IPS LED TV** panel delivers consistent and accurate colors with wide 178° viewing angles, ensuring clear visuals from any position. It offers faster response times, reducing motion blur for smoother action scenes and gaming. Known for its durability, IPS technology resists pressure damage and maintains uniform image quality across the screen. Ideal for group viewing, it ensures vibrant visuals stable performance, and long-term reliability.

## Magic remote

The LuminaSpire Magic Remote offers advanced control through motion sensing, scroll navigation, and built-in voice recognition. It replaces conventional buttons with intuitive point, click, and voice functionality, providing seamless access to all smart features of your LuminaSpire TV.

### Voice Command

**Voice Control Find Your Favorites Fast**  
Use Voice command and you'll find your favorite content faster than ever before. Spend more time watching with magic remote.

# SMART FEATURES

## Cloud tv

Cloud TV runs on a certified OS optimized for efficient resource management and smooth execution of OTT and utility apps. Its companion app, available on Google Play, turns your smartphone into a smart remote with integrated Google Voice Search for intuitive, voice-enabled control.

## Movie box app

Aggregates thousands of hours of free on-demand content from online sources. Powered by intelligent curation algorithms, it delivers a personalized, genre-based viewing experience through an intuitive Cloud TV interface, driving higher user engagement.

## Surround sound

Experience immersive audio with a virtual surround sound engine that replicates a multi-channel sound stage. Designed to capture every nuance from subtle breaths to deep bass beats it delivers rich, spatially dynamic audio that enhances the realism and depth of your viewing environment.

## Mobile connectivity

Enables seamless casting of mobile applications and media content directly to your TV, allowing real-time screen mirroring and interaction via compatible devices.
