

CAREFUL SECURITY

Simple Solutions for Complex Problems

Careful Security is your pragmatic cybersecurity partner. We deliver cost efficient solutions that improves your security posture, ensures compliance, and garner trust with clients, prospects and stakeholders.

Risk & Security Assessments

Identify high-risk gaps and translate them into clear, actionable recommendations—build a security roadmap aligned with CIS and ISO Framework.

Virtual CISO Services

Leadership services for security roadmap, board report and interfacing with for customer, prospects and security audits.

90 Day Compliance Readiness

Get compliant in 90-days with our streamlined audit readiness services —map controls, close gaps, and gather the evidence you need to meet compliance with confidence.

Penetration Tests

Simulate real-world hacker behavior on your information systems to discover hidden vulnerabilities. Protect sensitive data from landing in the wrong hands with proactive testing.

MSSP Services

Complete management and oversight of your security infrastructure from user workspace to data security. Mitigate risk and track measurable improvements of your security posture in the risk portal

Security Monitoring

Monitor your security threats and compliance posture with our cost efficient logging and monitoring solution. Gain real-time visibility and peace of mind with comprehensive coverage.

Why Careful Security

Pragmatic Approach

Real-world solutions, not fear tactics.

Built for Growth

Scales with your business, from startup to enterprise.

Compliance Made Simple

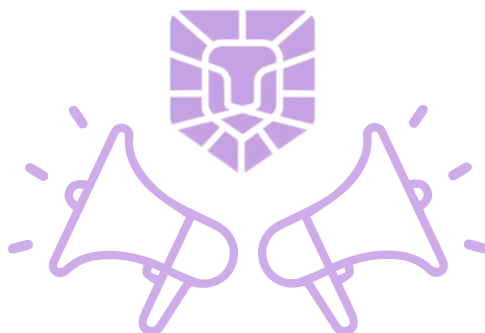

Fast-track readiness for audits like SOC 2, ISO, HIPAA.

Fractional Expertise

CISO-level guidance without full-time cost.

Proven Trust

Trusted by CIOs, CTOs, and compliance leaders.

What Clients are Saying

Sammy and his team at **Careful Security** work closely with our IT and other business teams in close collaboration to **identify risks and implement industry-standard security controls**. They are **experts** in the field, **knowledgeable**, and **courteous** in their interactions. **Recommend them for any organization looking to augment their in-house expertise with a cybersecurity MSSP.**
