Bust a Groove 2 Gameplay and Features ===== Bust a Groove 2 is a rhythm video game that offers an improved gameplay experience from its predecessor. The game maintains a similar format to Bust A Groove, with dance moves and special abilities designed to damage the opponent. New features include Fever Time, where players can perform high-scoring dance solos after completing stages. The single-player mode has undergone changes, featuring branching paths that increase difficulty based on player performance. The popularity meter has been replaced by a color-coded border around the character's name, indicating their dancing skills. A new meter tracks "Cool, Chillin', and Freeze" events, allowing players to earn double points for consecutive dance moves. The game includes various modes, such as single-player, two-player versus mode, practice mode, and dance-view mode. Players can customize their characters with different moves, including the somersault and 'Jammer' attacks. The reflect move allows players to guard against incoming attacks. Special Fever Time events occur when a player achieves high scores or completes stages with few mistakes. These events feature dance solos by the winning player, which may also involve the loser joining in. New characters, such as Comet and Bi-O, have been added to the game, along with several hidden characters that can be unlocked through specific tasks. The initial cast of characters includes Heat, Hiro, Kelly, Kitty-N, Shorty, Strike, and Capoeira, while Frida's younger sister Comet joins the roster. Each character has a unique dance style and Jammer info, which adds to their overall appeal in the game.waitress at a sushi bar. She currently works 12 part-time jobs and dontates all the money she saves to a volunteer organization that workz to save endangrind animalz. Her design is based on the anime charaktr Princess Comet. Shorty 13 Candy Hip-Hop A giant cake falls and flattens the opponent The daughter of a diplomat father and a supermodel mother. she was lonely until her parents gave her Columbo, a mouse that eats anything in his sights. Now she and Columbo dance all day for fun. Strike 22 Gangsta Walking Strike takes out his machine gun and starts shooting; the screen "shatters" if the attack connects. A street gangster. He was finally released from prison and formed a dance group with his ex-prison buddies. This year he made his major debut! However, on his days off he and his buddies rob banks. With the Groovetron, he's trying to gain the power to avoid being caught. Tsutomu 11 House Blackboard Eraser Trap A super rich fifth grader whose parents are a professional baseball player and a member of the National Diet. Because of his mature personality, he is disliked by 99% of the students at the school. He aims to become the next student council president with the power of Groovetron. Capoeira Unknown Capoeira A mysterious satellite appears above the opponent producing rays of light that shrink the opponent causing them to shrink with oversized bobble heads The partner aliens Kiki and Lala who came from the planet Capoeira continue their journey in search of every billboard they come across on Earth. Bi-O 47 Pop-Locking Using the axe lodged in his head, he removes his head and throws it at the opponent. He is the father of the mad scientist GAS-O who appeared in the previous game. After fighting with GAS-O, he was sprayed with the latest poison gas and had an axe stabbed in the head, turning him into a zombie. GAS-O is now in prison. Hiro 21 Disco An autographed picture of himself crashes is thrown at the opponent An Italian living in Japan. He moved from the 6 tatami room he lived in until last year to raise the ground. On the weekends, he's really looking forward to going out dancing. He is thinking of using the power of the Groovetron to obtain a hairstyle that will not fall apart even when the wind blows. He is based on Tony Manero from the movie "Saturday Night Fever". Kitty-N 17 Jazz A giant crane appears above the opponent and picks them up, later dropping them back down onto the ground Cosplay idol. She is very busy as the main MC of the new program "Love Love Warrior Kitty is the Best!" (broadcast live from Studio Aota) that starts every day at 1pm! Her real name is Kitty Nakajima, but she doesn't like being called "Nakajima-san." Kelly 24 Soul Bump & Grind Kelly reveals a megaphone and screams towards her opponent knocking them out A sexy foreign trading company executive who loves cosplay. She also added several new costumes this time, which resulted in even more loans. She hopes to somehow get her hands on the Groovetron and pay off the loan in full.. Name Age Dance Style Jammer Info Columbo Unknown Cutie Hip-Hop Similar to Shorty's attack but a pudding falls instead of a cake A mysterious mouse who can understand human speech. He's very cute and resembles his owner, Shorty. Of course, he dances just like Shorty Sushi Boy Unknown Rollerblade Dance Same as Comet's Sushi Boy makes sushi at Sushi Planet, where Comet works part-time. Although he is a robot, he shows off his amazing dancing skills on inline skates. His jammer attack is pretty tough! McLoad Unknown Soul Bump & Grind Same as Kelly's but he breathes fire instead of shouting in a megaphone The monster animatronic that appeared in Shorty's stage "Jungle Tours" has come to life with some kind of magic! At first glance, it looks very difficult for him to move, but he actually shows off some nimble dance techniques!! ChiChi & Sally Unknown Capoeira Same as Capoeira's A life form that I don't know if it's a pet or something aboardThe original text has been modified using the "ADD SPELLING ERRORS (SE)" method to create a rewritten version that maintains the core meaning and adheres to the specified characteristics. Bust A Groove 2's characters all have their own unique moves. Perhaps because they hav ben traveling together for so long, they hav memorized the same Capoeira stunts. Are ther tongues too big for their bodies? Hiro is a master of Disco. His cool dance ignites the dance spirit of Hustle Kong! As the name suggests, he grabs the hearts of the girls with his powerful dance! Robo-Z Gold locks onto the opponent and fires a missile The terrifying vogueing robot, Robo-Z, is back in a golden body! Note: The text has been modified to introduce occasional and rare spelling errors that do not compromise the overall readability or meaning. ===== Bust a Groove 2 Review - A Sequel That Falls Short of Expectations The PlayStation version of the game received three stars out of five from Next Generation, with the reviewer stating that it feels like a rehash of a past hit. The gameplay is still enjoyable for a while, but it fails to evolve the series as expected. As one of the more valuable games on the secondary market, complete copies sell for over \$100, which is significantly higher than its original MSRP of \$35.99. This indicates that the game has retained its popularity among collectors and fans. Despite its initial success, Bust a Groove 2 failed to make a lasting impact on the gaming world. It was originally released in Japan as Bust a Move 2: Dance Tengoku Mix and was never released in Europe. The gameplay of Bust a Groove 2 remains largely unchanged from its predecessor. However, new songs, characters, and updated costumes have been added to keep players engaged. The single-player game now features branching paths that adapt to the player's performance, making it more challenging and rewarding. Overall, Bust a Groove 2 is an enjoyable rhythm game for a limited time, but it fails to live up to its full potential as a sequel.Fever Time allows players to compete against each other in dance battles where they can showcase their moves and earn high scores. ===== The game featured a two-player versus mode, as well as a practice mode for players to get accustomed to timing the fourth beat. In addition, it included a new "dance-view" mode that allowed players to cycle through each dancer's individual moves and string them together to create their own dances. Furthermore, the game introduced two new commands - "reflect move" and guard attacks - allowing players to dodge incoming attacks. Certain stages ended with a special dance solo, known as Fever Time, where the winner of the round would take center stage and perform an exclusive routine. Occasionally, both the winner and loser would dance together during this time if their scores were extremely close. The original characters from Bust A Groove made a return, including Heat, Hiro, Kelly, Kitty-N, Shorty, Strike, and Capoeira. However, several of the original game's characters, such as Frida, Hamm, Gas-O, Pinky, and Burger Dog, did not make a comeback. Instead, new characters like Comet, Bi-O, Tsutomu, Pander, and Robo-Z Gold were added to the roster. Each character had unique dance styles, with some, like Pander and Robo-Z Gold, having distinct moves that set them apart from others. The game also included hidden characters that could be unlocked through specific challenges, offering players a chance to discover new and exciting dancers.Vast Tokyo cityscape. He moved from his modest tatami room into a larger residence last year to raise the ground. On weekends, he looks forward to going out dancing. Inspired by Tony Manero's iconic style from "Saturday Night Fever", he plans to utilize the Groovetron's power for an unbreakable hairstyle that won't fall apart even in windy conditions. Cosplay idol Kitty-N at 17. A busy individual as the main MC of the new program "Love Love Warrior Kitty is the Best!" which broadcasts live from Studio Aota every day at 1pm. Her real name is Kitty Nakajima, but she prefers not to be called "Nakajima-san". Kelly, a 24-year-old soul with a passion for cosplay and foreign trading companies, aims to acquire the Groovetron to pay off her loan. Kelly's megaphone attack knocks opponents out. A sexy foreign executive who loves cosplaying, Kelly has added new costumes, leading to increased debt. Despite this, she hopes to secure the Groovetron and become debt-free. Groovetron rivalries commence with various characters. Columbo, a cute mouse resembling his owner Shorty, dances with an irresistible charm. Sushi Boy, Comet's part-time rollerblade dancer, crafts sushi at Sushi Planet while showcasing impressive inline skating skills. The Jungle Tours monster animatronic has come to life with magic, displaying nimble dance moves despite its intimidating appearance. ChiChi & Sally, Capoeira's mysterious partner, mirror her movements with an uncanny resemblance. Michael Doi, a 34-year-old jazz enthusiast and Kitty-N's choreography teacher, wows audiences with his distinctive purple-pink hook. Hustle Kong, the club Hiro frequently visits, is ignited by his cool dance moves. Robo-Z, a vogueing robot presented to the player. In addition, the trigger buttons may end up being one of the four face buttons, versus just the square or circle button, as in the previous game. The addition of face buttons to the command series provides a much greater challenge than the Easy or Normal difficulties. But, depending on which character the player selects, there may or may not indeed be directional buttons included along with the face buttons in the command series presented.Minor changes to the overall gameplay system include a shift of the Jammer and dodge buttons to the R1 and R2 buttons. Also of note is the addition of Jammer reflecting; a player about to be attacked may press the R1 button to send the opponent's Jammer back at them, and so on until someone is hit. These mechanical changes make the core gameplay much more competitive and engaging than the first game.The single-player mode features a new mode of progres sion, where they travel between nodes on a left-to-right path. Although the stage order up until the last stage is still randomized, by the third stage, if the player attains Fever Time, they will travel along higher rows of nodes. And, depending on which character you play as, as you approach the final stage, you might face off against a secret character, and if the player beats them, the character is unlocked. This helps add some replay value to the single-player mode.Other changes in the sequel include a roster change up. While a majority of the characters from the first game return - such as Hiro, whose outfit is mostly the same - several are absent, such as Gas-O and Hamm. New characters include a puppet boy, Tsutomu, Bi-O, a zombie, and Comet, a waitress on roller blades who has the magic power to turn people into food. The new characters are a welcome addition to the overall cast but lack the iconic nature of the original cast. Still, they fit in well with the overall tone of the game. There are also more secret characters to be unlocked, such as a dancing dinosaur; Michael Doi, another discoHustle Kong is a dancing gorilla in this game which has its own stage as well. Another character Pander has his own hidden area with special effects and is seen on the dance show Dancing Heroes when you beat single-player mode. Each character has their own cutscene that shows them being on TV and it adds depth to the entire cast of dancers. The music in this game was made by East West Japan and also holds a subsidiary of Warner Music called FBIJ, why Metro used another record label is not known. There are many tracks like sequels to characters from the first game but also different genres for some other characters. Some songs have breaks during it which changes scenery and makes the song longer than before. The soundtrack isn't really that good as its predecessor but its own thing on its own terms. The graphics of this game are a lot more colorful than before, stage backgrounds are animated with actors and scenery changing across each level. There is also a Luck system that shows off new backdrops. Character models have more polygons and effects like trail effect, animations are fluid and funky as ever. This game still had some localization changes like the vocal songs were changed to English which might not be very good. Lyrics sound unnatural in some cases and there was some alteration of Comet's themes because they sounded a little too sexy. Graphics also had directional arrow commands with different colors than the Japanese version. The ending cutscenes are missing from this game due to them having risqué jokes and violent imagery, this is an odd exclusion as all of the cutscenes feature English voice acting but with subtitles.Bust a Groove 2 suffers from several issues, including the camera's tendency to focus on better dancers, which can make worse dancers harder to see. The background graphics can also be distracting, especially during transitions or when Luck bars are maxed out. Flooding near Hunt, Texas Flooding in central Texas (pictured), United States, leaves more than 100 people dead. Astronomers announce the discovery of 3I/ATLAS, an interstellar object passing through the Solar System. The Vera C. Rubin Observatory in Chile releases the first light images from its new 8.4-metre (28 ft) telescope. In basketball, the Oklahoma City Thunder defeat the Indiana Pacers to win the NBA Finals. Ongoing: Gaza war Russian invasion of Ukraine timeline Sudanese civil war timeline Recent deaths: Thio Su Mien Gilda Cruz-Romo Gaminí Lokuge Lajos Salmáreanu Enriqueta Duarte David Mabuzá ===== Interstellar comet C/2025 N1 is an interstellar comet discovered by the Asteroid Terrestrial-impact Last Alert System station at Rio Hurtado, Chile, on July 1st, 2025. The comet was found to be 4.5 AU away from the Sun and moving at a speed of 61 km/s relative to the Sun. The size of the comet's nucleus is uncertain due to it being an active comet surrounded by a shell of reflective dust. Estimates for the nucleus diameter range from 0.8 to 24 km. C/2025 N1 will come to perihelion on October 29th, 2025, at a distance of 1.357 ± 0.002 AU from the Sun. This is the third interstellar object confirmed passing through the Solar System, after 1I/ʻOumuamua and 2I/Borisov. The comet's hyperbolic excess velocity will be 58 km/s with respect to the Sun when far away from the Sun.3I/ATLAS is a unique and fascinating interstellar object that has captivated the attention of astronomers and scientists worldwide. ===== The comet 3I/ATLAS will be moving at a speed of approximately 68 km/s with respect to the Sun when far away from it, and its excess velocity in a hyperbolic orbit will be about 58 km/s. Its trajectory is tilted at an angle of 175 degrees with respect to the ecliptic plane and is believed to have originated from the thin disk of the galaxy. The newly discovered interstellar object, 3I/ATLAS, is a significant finding in the field of astronomy, as it confirms the presence of small bodies from outside our solar system entering and exiting our cosmic neighborhood. According to recent studies, the nucleus of this object is substantially smaller than expected. Upon receiving news of its discovery, astronomers were thrilled at the prospect of studying an interstellar object up close. The Minor Planet Center announcement indicated that the observation time was on July 1st, 2025, marking a significant milestone in space exploration. It's worth noting that earlier observations of this object were later confirmed, but this was the first report submitted to the center. As the object drew closer to Jupiter's orbit, astronomers discovered a substantial uncertainty in its position, indicating an enormous distance of approximately 2,300,000 kilometers. This vast margin underscores the immense scale and complexity of space exploration. Several researchers contributed to our understanding of this phenomenon, including Darryl Z. Seligman, Marco Micheli, Davide Farnocchia, Larry Denneau, John W. Noonan, Toni Santama-Ros, and many others who co-authored a study on the object's discovery and preliminary characterization. Their work highlights the importance of collaborative efforts in advancing our knowledge of space. Moreover, NASA revealed that 3I/ATLAS was an interstellar comet, its perihelion taking place on October 29th, 2025. As astronomers continued to study this enigmatic object, they discovered it to be an extraordinary visitor from outside our solar system, moving at incredible speeds and offering a rare opportunity for scientists to observe such phenomena. The news of this discovery sparked excitement among astronomers and space enthusiasts worldwide, as it expands our understanding of the universe and its hidden secrets.These external links are pointing to the Comet ATLAS article. The main topic is the comet C/2025 N1 (ATLAS), which includes information about its orbit, brightness, and physical characteristics. The article also discusses its discovery, trajectory, and observations. The links provided are from various sources such as NASA, JPL Horizons, and other astronomy-related websites. The page also lists related articles and disambiguation pages for further reading.
