

## CORE CAPABILITIES

Beacon Services provides end-to-end solutions in Wi-Fi, access controls, and security camera systems for government and commercial clients globally. Since 2002, we have delivered cutting-edge system designs, installations, and technical support services to safeguard critical facilities.

Our core competencies include:

### WIFI, ACCESS CONTROL, AND SECURITY CAMERA SYSTEM DESIGN & INSTALLATION

- Custom-designed systems tailored to facility size, layout, and risk profile
- Seamless integration with existing networks and infrastructure
- Compliance with industry safety and security standards
- Proven expertise in leading brands such as Axis, InVID, Ubiquiti, and LTS
- Globally-deployable, highly agile technical team
- Expertise in servicing complex environments:
  - Harsh weather conditions
  - Remote settings
  - Marinas
  - Wide-area coverage

### SEASONED TECHNICAL SUPPORT

- 24/7/365 technical support, operational management, and system monitoring
- Proactive systems maintenance, troubleshooting, and repairs
- Rapid response to minimize downtime and ensure security continuity

## DIFFERENTIATORS

**Methodical and Tailored Approach:** We perform detailed site assessments to evaluate layouts, environmental conditions, and security risks, designing the strategic placement of cameras with long-range wireless connectivity to optimize visibility and eliminate blind spots.

**24/7 Technical Support:** Full-service technical expertise including real-time alerts, 24/7 monitoring, and on-demand troubleshooting yielding uninterrupted operations.

**Specialized Expertise in Complex Environments:** Our team excels in surveillance solutions for wide-area facilities, open-water locations, and harsh weather conditions, delivering exceptional performance in the most challenging environments.

**Customer-Centric Operations:** From small facilities to multi-acre properties, we provide on-site, client-driven solutions, managing every step from design to installation, integration, and go-live testing.

**Industry-Leading Security Standards:** We adhere to the highest safety and security protocol, complying OSHA, NDAA, TAA, FCC, and GDPR standards to protect against risks and unauthorized access.

## PAST PERFORMANCE

### LAKEFRONT MANAGEMENT AUTHORITY (2025)

Designed, installed, and managed a comprehensive security camera system for two New Orleans municipal marinas covering 475+ boat slips and maritime assets; 5 facilities, 800 vehicles, and 100 daily staff and patrons; and integrated long-range Wi-Fi for 24/7 technical monitoring.

### IGY MARINAS (2025)

Delivered a custom security system for a Savannah, Georgia marina, featuring 85 interior and all-weather exterior cameras, access control and long-range Wi-Fi, and enhanced safety for nearly 100 high-value maritime assets spanning 650,000 square feet.

### TOWN OF PALM BEACH (2025)

Upgraded municipal security initiatives by installing SFF UniFi and Ubiquiti surveillance cameras for critical facility entry points and traffic areas and providing on-demand system maintenance for seamless performance.
