OUR PRODUCTS

Our Products

We are the creators of **Baxab®Eco**, **Ecocemento®**, and **Microcemento®**, cement-based coatings that can be applied to almost every surface, giving our clients the freedom to design their dreamed space.

In addition to MICROCEMENTO® and BAXAB®, we manufacture many different systems designed to meet our customer's needs like: **T/Swim®** for pools and SPA, Metales Reales a metallic finish for dry areas, **T/Grip®** an anti-slip system and **Summery®** a heating floor system.

Key Features

Can be installed over your existing floor **without demolition.**

Creates a seamless **continuous** surface.

Minimum thickness, less than **3 mm.**

No change in floor profile required.

Can be applied to walls, floor, outdoor or indoor, and so many more.

Extremely tough, between 43 N/mm² and 120 N/mm².

Open to foot traffic after **24hs.**

Certifications

Topcret® has received the European CE certification for their products, guaranteeing all legal and technical security requirements requested by the European Union. Also, we have obtained the **ISO 14000** certification complying with environmental, sustainability and energy efficiency standards, both in our products and facilities. Another goal is meeting the legal requirements in terms of work safety.

To this end, we have been certified with the strict **OHSAS 18001 Occupational Health and Safety Management System standards**.

Topcret® reinsures in this way its state of the art position in the sector. Moreover, we work with **Applus** certifications for our systems.

Sustainable Certifications

Today, we are the only company in our category with products certified under the Well, Leed and Breeam standards.

Results that open doors for us to participate in works certified under the standards benchmarks in the sector.

WELL™ | Building Standard

Scientifically supported rating system to measure, certify and monitor the characteristics of a product, with the aim of improving its impact on health and well-being.

LEED | Leadership in Energy & Environmental Design

Based on scientific standards, it rewards the use of strategies sustainable construction processes. Your mission is an environment responsible and healthy environment.

BREEAM | Code for a Sustainable Built Environment

Based on scientific standards, it rewards the use of strategies sustainable construction processes. Your mission is an environment responsible and healthy environment.

EPD® | Environmental Product Declarations

EPDs signal a manufacturer's commitment to measuring and reducing the environmental impact of its products and services and report these impacts in a hyper-transparent way.

PAINT TO SAMPLE

Colours

Inspired by nature, our colourist experts developed more than **40 base colours** to fulfill a wide range of applications.

But we don't want to limit your imagination, so we created **Paint To Sample**, a Topcret® innovation powered by your imagination, to offer high-end, enhanced personalisation for customers.

Our **ISO certification** process assures zero colour deviations, so what our client dreams is what they will see installed in their project.

A Topcret innovation powered by your imagination. Create your own unique colour with Paint To Sample.

Supply us with an example of your preferred colour – it might be the hue of a beloved jumper or favourite flower – and will go away and match it for your special project. It's the ultimate in colour personalisation and a unique opportunity to express yourself.

When you design your next home or office, it's not just a project... it's a dream fulfilled. People have very specific thoughts about what their dream should look like. We're extending the boundaries of what is possible and turning dreams into reality.

The Experts' Choice

T/LABS

T/Grip

T/GRIP® is a certified **anti-slippery treatment** for all our products. Due to the market demand for non-slip surfaces, we have developed a version which **meets** the requirements of the **European** regulations with a **Class 2 & Class 3** non-slip category.

- Meets the EU standards (Class 2 & 3)
- Neutral finish, no changing the coatings' look
- It is ideal for quick renovation projects, as it is installed on top of finished material/products.

Summery®

Summery® is the first electrical surface heating system integrated in a micro-topping.

- Summery® uses the thinnest electrical heating system on the market, only 2mm.
- It can be applied directly on multiple existing surfaces, such as ceramic tiles, cement, metal, etc.
- Totally waterproof so it can be applied on bathrooms and wet areas.
- Avoids dry air formation and dust particles in the air, which makes it convenient for people with allergies.

Elastic Base

A two-component system that is used as a pre-treatment and **base preparation**.

- It will generate a layer of elasticity and additional waterproofing reducing the risk of movement to the final decorative coating and therefore reducing the risk of cracks.
- Recommended as a base preparation, fissure treatment and additional waterproofing in wet areas.
- Can be installed on cement, concrete, metal, plastic, asphalt, terrace and ceramic.
