

Environmental Commitment

moffatt & nichol

Creative People, Practical Solutions™

At Moffatt & Nichol, we are driven by our commitment to environmental responsibility, striving to protect natural resources and minimize the environmental footprint of our operations.

We offer clients a unique blend of innovation, technical expertise, and experience that allows us to provide practical solutions for resilient, sustainable, and energy efficient projects in our core practices: Ports, Water, and Transportation.

→ Environmental Stewardship

Moffatt & Nichol is committed to environmental integrity and protecting and enhancing the environment where our people live and work through pollution prevention, sustainable resource use, flooding resilience, and the protection of biodiversity and ecosystems.

As trusted advisors, we apply leading environmental practices to our service offerings, including efficient use of resources, material selection, waste reduction, water efficiency and quality, and protection of habitat and biodiversity. By enhancing client's resilience against impacts of natural and man-made hazards, we help ensure conservation of their assets, continuity of operations, and the protection of the communities where they operate.

Environmental best practices and initiatives to reduce the impacts of our operations on the environment are promoted and implemented in all of our offices.

→ Guiding Excellence

Our leadership cultivates a shared vision, clearly communicating our environmental goals and strategy to every member of the organization. By providing effective guidance, support, and resources, our leaders empower each individual to embrace our environmental objectives, fostering a collective commitment to conserve natural resources, and encouraging the engagement of interested parties and stakeholders throughout the organization.

→ Compliance Obligations

Moffatt & Nichol is committed to meeting environmental legislation, regulation and code requirements, fulfilment of compliance obligations, and contractual requirements as applicable to our own activities and those in support of our clients.

→ A Culture of Continual Improvement

With an unyielding dedication to continual improvement, we aim for technical and operational excellence, enhancing client efficiencies, and proactively refining our Environmental Management System (EMS) to improve our environmental performance and effectively contribute to addressing natural and man-made hazard related impacts.

→ Managing Environmental Performance

Moffatt & Nichol is committed to identifying environmental aspects and impacts related to our business activities and establishing environmental performance improvement objectives. We monitor, measure, and improve our environmental performance by assessing and minimizing our significant environmental aspects and impacts.

→ Elevating Standards

Certified to the international standard ISO 14001 at select locations, our global environmental management system supports Moffatt & Nichol's focus on identifying, managing, and monitoring significant environmental impacts, and improving our performance.
