

Fractional Chief Financial Officer (CFO)

Part-Time (0.1–0.2 FTE) | Remote | Reports to: CEO

About Immunogenik

Immunogenik (www.immunogenik.com) is a clinical-stage cancer immunotherapy company pioneering next-generation cell therapies for aggressive solid tumors. Our lead program, 8R-70CAR-T, integrates chemokine-guided trafficking to overcome the fundamental barriers of CAR-T therapy in solid tumors. Supported by NIH funding, first-in-human clinical data, and a growing platform spanning CAR-T, TCR-T, and immune-modulatory technologies, Immunogenik is entering a period of rapid growth and strategic inflection. We are building a lean, high-performance leadership structure that amplifies scientific excellence with disciplined financial and operational strategy.

Position Summary

Immunogenik is seeking a Fractional Chief Financial Officer (CFO) to play a central role in preparing and executing the company's upcoming Series A financing, while supporting strategic growth and long-term value creation.

This is a unique opportunity to join a founder-led, clinical-stage biotechnology company with an active first-in-human trial, advancing a differentiated cell therapy platform with multiple expansion opportunities. This high-impact, flexible role is ideal for a seasoned biotech executive with a strong investor and pharma network, and a demonstrated track record in venture financing, strategic partnerships, and company building. The CFO will serve as a key architect of Immunogenik's external strategy, shaping investor narratives, leading fundraising processes, and supporting high-value business development opportunities.

The company is at a critical inflection point, transitioning from early clinical development to institutional financing and broader strategic expansion.

Key Responsibilities

Financial Strategy & Planning

- Build and maintain Immunogenik's multi-scenario financial model, including clinical, platform, and BD pathways.
- Lead budget planning, forecasting, and cash runway analysis.
- Develop financial frameworks to support Series A fundraising and future financing rounds.
- Provide financial insights to guide strategic decision-making and resource allocation.

Investor & Fundraising Support

- Prepare investor-ready financial materials, including projections, capitalization tables, and diligence documentation.
- Support the CEO in investor meetings with clear financial narratives and analyses.
- Advise on valuation, deal structures, and financing strategy.
- Assist in building and maintaining the investor data room.
- Develop and manage capitalization table and scenario-based dilution modeling.

NIH & Non-Dilutive Funding Compliance

- Oversee **NIH grant financial compliance**, reporting, and audit readiness.
- Ensure alignment between scientific milestones and financial planning.
- Support budgeting and financial documentation for future NIH submissions (SBIR/STTR, Fast-Track, etc.).

Operational & Corporate Finance

- Establish and maintain financial controls, accounting processes, and reporting systems appropriate for a clinical-stage biotech.
- Coordinate with external accountants, auditors, and legal counsel as needed.
- Support vendor, CRO, and clinical operations budgeting.
- Implement financial systems that scale with company growth.

Strategic Support

- Partner with the CEO on long-term financial strategy, risk management, and corporate planning.
- Provide financial input into BD discussions, partnership evaluations, and platform expansion decisions.
- Ensure financial readiness for future clinical milestones and regulatory interactions.

Qualifications

Required

- 10+ years of financial leadership experience in biotechnology or life sciences.
- Direct experience with Series A or institutional fundraising.
- Strong understanding of clinical-stage biotech financial modeling.
- Experience with NIH or non-dilutive funding (SBIR/STTR preferred).
- Ability to work effectively in a lean, founder-led, science-driven environment.
- Exceptional communication skills and ability to translate complex clinical and business drivers into financial strategy.
- Demonstrated ability to build financial infrastructure for early-stage companies.

Preferred

- Experience with cell therapy, oncology, or immunotherapy companies.
- Prior fractional or consulting CFO experience.
- Familiarity with pharma BD deal structures (upfronts, milestones, royalties).
- Experience supporting IND-stage or early clinical-stage companies.
- Understanding of autologous manufacturing economics and clinical trial cost modeling.

Compensation

- Competitive monthly retainer commensurate with senior executive-level biotech experience.
- Significant equity upside aligned with company growth, including milestone-based vesting linked to Series A financing and subsequent value inflection points.

Why Join Immunogenik

- Clinical-stage company with IND clearance and ongoing first-in-human trial.
- Supported by NIH funding and non-dilutive capital.
- Differentiated cell therapy platform with multiple pipeline expansion opportunities.
- Opportunity to shape financial strategy at a critical inflection point ahead of Series A.
- Direct collaboration with an experienced founder and clinical leader.
