

Practice Intelligence

Power Up Your Practice With Pearl

Most practices sit on more treatment than they realize. Needed care hides in past X-rays, incomplete schedules, or charts no one has time to comb through.

Practice Intelligence brings those opportunities into focus. It gives clinicians and practice managers a clear, shared view of where care is being planned, scheduled or slipping through the cracks.

With Pearl, the entire team works together smoothly and efficiently to deliver better care and increase production.

Start the Day Knowing Exactly What Care Is Needed

Practice Intelligence brings X-rays and AI insights into the daily schedule, giving the entire team a clear view of scheduled, unscheduled and unplanned care before the day begins.

With a clear, color-coded schedule, teams can see:

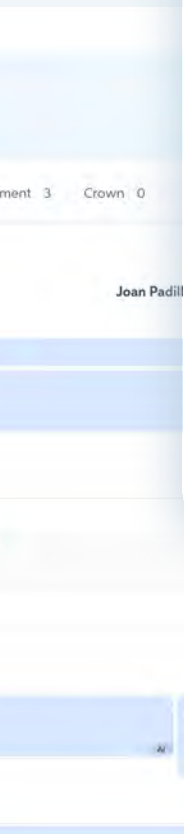

- + Who needs x-rays, cleanings, and periodontal charting
- + Which planned treatments have not yet been scheduled
- + Where Pearl's AI has flagged areas of concern on past x-rays for review
- + Which unscheduled patients have outstanding or overdue treatment, so open time is filled with productive care

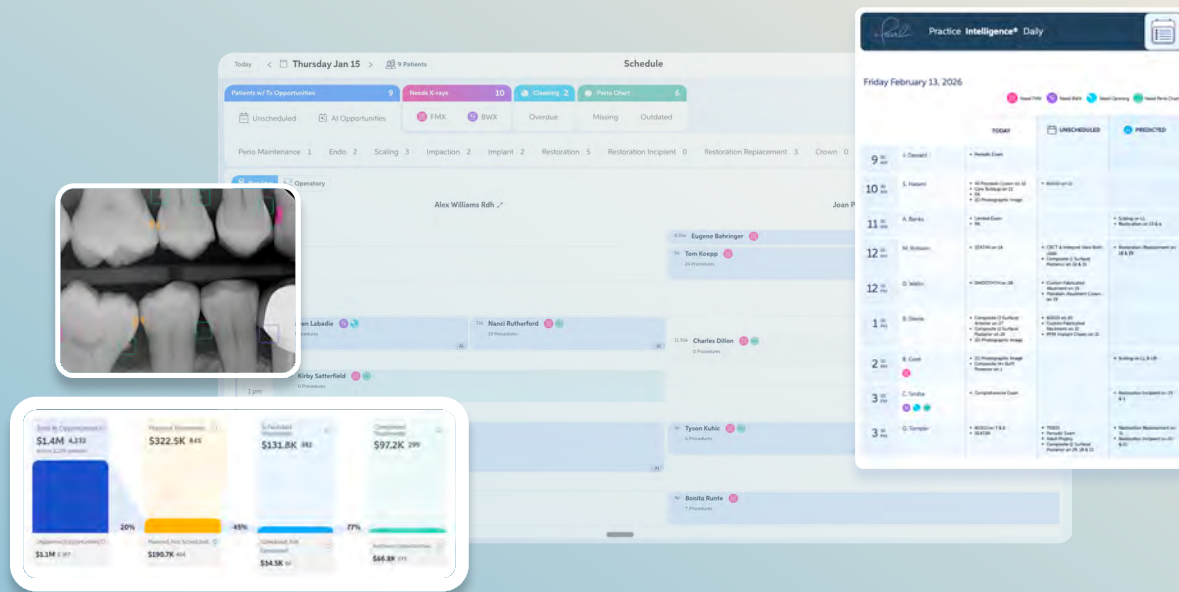

Irvin Stroman
10:00 am – 11:00 am

- FMX** last on 11/18/25
- BWX** no prior
- Perio Chart** no prior **Overdue**
- Cleaning** last on 9/19/25
