PROFIL

Technical Project Manager with 14+ years of experience in IT support, web development, and digital solutions. Currently studying IT Project Management at JENSEN Yrkeshögskola with a focus on Agile methodologies (Scrum, Kanban), risk management, and system integration. I combine strong technical skills with a passion for leadership, collaboration, and innovation. Experienced in coordinating cross-functional teams, optimizing workflows, and delivering customer-focused projects.

PROFESSIONAL EXPERIENCE

2007 - 2024

Romella International AB – Technical Project Manager & Coordinator

Project Management

- Led and executed technical projects within product development, web, marketing, and internal IT. Coordinated cross-functional teams, managed requirements, planning, and follow-ups. Ensured projects were delivered on time, within budget, and according to specifications.

IT Support & System Administration

- Responsible for IT support, system monitoring, and migration to Microsoft 365 (including SharePoint) in collaboration with external IT providers. Worked proactively with system reliability and internal user support. Conducted internal training sessions and created documentation.

Web Development & UX/UI Design

- Designed, developed, and maintained websites and online stores (HTML, CSS, WordPress, Adobe Muse, Squarespace). Created user-friendly and responsive interfaces with a focus on accessibility, SEO, and performance. Led development projects from concept to launch.

Data & Web Analytics

Interpreted user data using Google Analytics, optimized campaigns with Google Ads, and produced insight-driven reports for business development and marketing strategy.
