

Brand Surge Scam : Game Rule Research

Disclaimer: Please be aware this is from 4 days of data and does not guarantee the same results. I do not recommend playing this game, but if you do this is how I would play. This is a game, a very obvious money making scheme with specific rules that make it 99% of a scam but maybe not. Play at your own risk and with money you can lose. \$51 is a small bet to make a few hundred or thousand, but if you do not play this strategy you will be asked to input large sums very quickly.

Also please comment on this doc if you determine data that would make for lasting in the game longer based on your data. Last update 7.26.25

Getting Started

- 1) Read the Job Game Rules, Optimal Strategy Theory, My 4 Days of Data then come back and play. **Do not sign-up without reading the rules, anything over \$51 in your wallet spikes up the risk, and just know you will lose some amount if not aall you earn.**
- 2) If you plan on ignoring my advice,
 - a) Go to <https://www.brand-surge.top/#/register> (Valid on 7/28/25, but will change) and register **Use Code 03IVWH Getting an account will work, but will their whatsapp support allow a deposit, I don't know.**
 - b) Setup a whatsapp account with the same number as its the security verification number
- 3) Setup an Onchain wallet to send and receive Ethereum ETH USDC. Buy \$51 in crypto which will cost you around \$60 with fees or you can transfer it from Venmo or Cashapp. Google it, don't ask me.
 - a) https://play.google.com/store/apps/details?id=com.defi.wallet&hl=en_US
- 4) Login and the first thing you must do is deposit \$51 and the goal is to never have more than this to start a round explained below
 - a) You do this by going to deposit and clicking crypto, then it will go to customer support click customer support, opening WhatsApp.
 - b) Send this message "Please Provide Eth address for [your username]. You must do this after every task set. Game hours are 9am CST to 10:30pm CST
- 5) They will give you a crypto address to send \$51 to from your Onchain to Brand Surge which is your wallet balance. Once you send, send a screenshot showing the money was sent to customer support. It will take about 10 mins to show up. Then you can start.

Brand Surge Scam : Game Rule Research

- 6) The work is very simple: you click Order, enter "great product" or press automatic review which isn't accurate and hit Start Order. The purchase amount is taken for a few seconds out of your wallet then returned with your commissions. You do this 45 times per day, twice a day for 90 orders.
- 7) After each set of 45 you must contact support in Whatsapp and say "Reset My Tasks"
- 8) Once you complete a set, you can withdraw any commissions. Always withdraw any amount over \$51 before starting a new set, so that combo orders have the lowest possible value to keep your negative wallet amount at the lowest possible amount. I did not see these until the 5th day so the assumption is this may be consistent.
 - a) You withdraw by hitting withdraw, entering your withdraw password and sending all funds over \$51 to your Onchain wallet. If you need money, please try to make it 4 or ideally 7 days so that your OnChain can have \$2000 and you can take the rest for life needs.

Game Rules

1. **There are four commission levels. Each gets a .5% higher commission, but requires a higher wallet balance, and more order tasks per set, leaving room for combo orders which require deposits if you go negative.**

a. VIP 1	.5%	45 order tasks	\$51 minimum
b. VIP2	1%	50 order tasks	\$500 minimum
c. VIP 3	1.5%	55 order tasks	\$1500 minimum
d. VIP 4	2%	60 order tasks	\$5000 minimum
2. **Combo orders may appear up to 3 times and each order may be up to 300% of your wallet size always resulting in a negative order requiring a deposit.** For example
 - a. $\$51 \times 300\% = \153 . So your order will be negative \$102. You then need to make a deposit and accrue commissions till the next combo order if it appears
 - b. If \$160 was the balance $\times 300\% = \$480$, so the order creates a \$320 negative balance.
 - c. Then say your commissions plus \$480 ended at \$500, you now could have a \$1500 combo order, requiring another \$1000 deposit
 - d. Total cash needed on this scenario is \$1422, but from our analysis a bank roll of \$2000 is required at all times to cover a \$51 starting wallet at VIP1

Brand Surge Scam : Game Rule Research

- e. This cash requirement is what they want so you forfeit the wallet and quit the job. So it's important to try to get your bankroll of \$2000 from company money/salary as much as possible.
3. **Company salary works like this and if you don't upgrade to VIP2 when you receive the \$800, you can most likely get to \$1500 salary and have \$2300 in earnings to cover a VIP2 auto upgrade.**
 - a. After 2 days with four sets you get \$100 (I received)
 - b. After 4 days with two sets you get \$800 (I received)
 - c. After 7 days with two sets you get \$1500 (I quit before this)
 - d. After 15 days of two sets you get \$2800
 - e. After 30 days of two sets you get \$3900 totaling \$9,100 a month
 - f. **Very Important: Do not start a task without withdrawing your salary or you could get combo orders putting you at a \$15k cash deposits needed**
4. **Other bonuses**
 - a. You will receive other random deposit bonuses and daily anniversary bonuses of \$18 to \$40, 3% deposit bonuses with VIP2, and they say up to \$2 million.
 - b. I received a \$1 million dollar bonus uncollected, because I would have to put \$2,550 in to keep playing with two sets left that could trigger a third combo requiring \$10-12k. **I opted out with a small loss of \$677.**

Optimal Strategy Based On Data, Still a Theory As They Can Change Rules Just Like Domains

VIP1 Grind Method:

Daily Routine:

1. Start with \$51 in account
2. Complete 2 sets of 45 tasks (90 total)
3. Earn ~\$2-5 in commissions
4. Withdraw everything above \$51 including bonuses
5. Collect \$100 salary on day three withdraw - but leave in Onchain wallet
6. Collection \$800 salary on day five withdraw - but leave in Onchain wallet
7. Fund Combos from your wallet as they appear
8. Don't ask for VIP promotions unless required
9. Always leave your wallet at \$51 even if VIP2 until have \$20k in your Onchain account, then I believe its safe to start with \$500. But before doing this download your orders and have [Claude.ai](#) or another AI run your acceleration to estimate

Brand Surge Scam : Game Rule Research

your highest risk exposure starting with a \$500 wallet. My data suggested needing over \$15k before VIP 2 was safe with a \$500 start.

Note: if you had unlimited cash, you could accelerate as fast as you want, but the site can be closed any day, so the best strategy is always to play with house money as much as possible even if it is slower. My guess is it will be hard to go more than 6 weeks before the account acceleration requires large deposits and you are locked out. The hope but not confirmed thought is you can play again, but not likely.

Leave a comment if you get in and see how it goes.
