

Fact Sheet

Infectious Diseases

SCOPE is an **independent, full-service CRO** and a trusted partner for **numerous pharma, biotech, and medical device companies**.

With strong expertise in **infectious disease trials** and close partnerships with sites and key opinion leaders worldwide, **SCOPE delivers reliable, efficient, and high-quality** clinical development support.

Our project teams bring specific expertise in infectious diseases, ensuring the success of your clinical development efforts.

With SCOPE's low employee turnover, you benefit from consistent teams and seamless continuity across studies and programmes.

Proven Performance During the COVID-19 Pandemic

The pandemic underscored SCOPE's flexibility, experience, and pragmatic approach. Through innovative, regulatory-compliant processes, SCOPE maintained recruitment and continuity in all ongoing trials.

Key Factors for Success

- Continuous assessment of national and local pandemic developments
- Identification and prioritisation of patient and data risk factors
- Ongoing review of regulatory requirements
- Close collaboration with authorities and ethics committees
- Rapid corporate strategy adaptation – ahead of official regulations
- Support for sites in implementing preventive and remote measures for patient and CRA visits

Your CRO of Choice for **Infectious Diseases**

Expert Leadership for Fast Bench-to-Market Timelines

The COVID-19 pandemic has highlighted the global need for rapid vaccine and drug development.

SCOPE provides the expert clinical leadership required to shorten development timelines – ensuring that new therapies reach patients and markets faster while maintaining scientific and regulatory excellence.

We operate through fully equipped local offices across Europe, complemented by trusted regional partners to guarantee optimal project performance worldwide.

Key Success Factors in Infectious Disease Studies

Excellent site management and support

Optimal recruitment strategies

Efficient execution – on time & on budget

Stable and experienced project teams

High quality

Telemedicine integration

Whether Phase I–III, Phase IV, or study rescue – SCOPE guides you through every development phase with proven expertise and dedicated resources.

Indication-Specific Experience

SCOPE has successfully managed **Phase I–IV clinical trials** in:

- Human Immunodeficiency Virus (HIV)
- Community-Acquired Pneumonia (CAP)
- Gastrointestinal and intra-abdominal infections
- COVID-19
- Respiratory virus infections

From Study Design to Study Report

With SCOPE's full-service, integrated portfolio, you work with one dedicated project manager and team ensuring:

- Seamless preparation and setup
- Efficient submissions
- Smooth conduct and close-out

A proven structure for success and reliability.
