Why SCOPE

Our long-standing expertise and established network make SCOPE a reliable partner for your clinical development needs.

We offer:

- Experienced project teams specialising in Women's Health
- A strong global network of investigators and KOLs
- Innovative technologies for efficient data management (EDC, eCOA/ePRO)
- Proactive planning to minimise risk and ensure smooth delivery
- Consistent quality and regulatory compliance across all regions

Your CRO of Choice for _____ **Women's Health**

Dedicated to Women's Health

For more than two decades, SCOPE has been a trusted partner in Women's Health research, addressing unmet medical needs and advancing therapeutic options in:

Reproductive Health

Age-related Conditions

Gynaecological & Female-prevalent Indications

To date, we have conducted over 51 Women's Health studies with more than 28,000 participants in Europe and the USA. Our teams deliver projects on time, within budget, and with a consistent focus on scientific integrity and patient care. Whether you need support with protocol design, feasibility, recruitment strategies or full clinical programme management, SCOPE provides tailored solutions to meet your objectives.

Smart Feasibility and Recruitment

Successful recruitment starts with sound feasibility. Our experts design precise feasibility questionnaires and realistic enrolment projections, combining therapeutic insight with local market knowledge.

Feedback from regional investigators ensures that recruitment goals are both achievable and aligned with site capabilities.

Training and Quality at Every Step

SCOPE ensures protocol-consistent enrolment through comprehensive site training and close monitoring.

Using state-of-the-art data capture tools and our proprietary project management platform, we provide transparency, control and quality throughout the study lifecycle.
