ABOUT VISION WOOD

Vision Wood's Golvabia Collection is one of the most technologically advanced wood floors available on the market. It consists of a real wood architectural veneer on a very strong HDF core. This smart floor has all the wonderful properties that only a real wood floor can provide and is available in many different species, colors, and patterns.

Maxwood is a high performance wood veneer floor from Sweden. A new UV-coat has been developed that is harder than normal UV-coats and can be used with a veneer-floor. It creates a more resistant surface than ever seen before. Maxwood has an integrated cork-backing which provides great sound-reduction, better comfort and an integrated underlay. All edges have been treated with a wax based lacquer, in order to improve the moisture resistance for the installed floor. The 5G clickjoint is now stronger and even easier to install. A thicker HDF makes the floor thickness 10.5mm (3/8") and gives a robust and solid feeling to the floor.

OUR PLANET MATTERS

Vision Wood was built on 30 years of traveling the world to find the finest materials on the cutting edge of performance. Our clients—the developers, architects, designers and homeowners—consistently rely on our team to provide the highest quality components to achieve a project worthy of the admiration it deserves.

All of our partners are leaders in their respective industries for environmental responsibility and carbon compliance. With sustainability being another core belief, Vision Wood only engages in partnerships with companies that manage forests responsibly by promoting their growth and protection for future generations. The products we offer have no added urea formaldehyde and low volatile organic compounds. All of Vision Wood materials are sustainably forested.
