## Experience

**Tellu / Welfare technology, Lysaker**

UX Designer / September 2023 - July 2025

Made product flows user friendly with iterative processes.

Collaborated closely with developers to design camera based AI sensing for nursing homes.

Set up the design system and improved user experience across the whole product portfolio.

Created a modular and streamlined documentation process.

**Halogen / Design consultancy, Oslo**

UX designer / April 2021 - August 2023

At Wilhelmsen, set up the design system from scratch and convinced management to invest in it.

At Wilhelmsen, completely redesigned Line Management Plan, collaboratively with developers and product owners.

Built complex dashboards for the data heavy digital twins for Kongsberg Digital.

Built personalised dashboard for sustainable investment for Handelsbanken.

**Montaag (now Elleve) / Design consultancy, Stavanger**

Designer / August 2020 to February 2021

Transformed a church into a community space for NMS.

Worked on the Zaptec One electrical car charger.

Reinstated the industrial design workshop in the studio.

## Education

**The Oslo School of Architecture & Design**

Master in Design

Aug 2017 - Jan 2020

In the master thesis explored how to make the experience of long term remote work calmer, before covid made it a reality.

Gained experience with digital and physical interaction design.

Dived deep into sustainability with futures thinking design processes.

**National Institute of Technology, Raipur**

Bachelor in Civil Engineering

Jul 2010 - May 2014

Designed a rain water harvesting system for the school campus which was constructed.

## Skills

Expertise with designing in Figma.

Experience with data visualisation and crafting dashboards.

Expertise designing multiple design systems.

Familiarity with development process & long experience collaborating with developers.
