

Product Overview

SOS2

WELCOME TO OUR WORLD

Staverton has a longstanding history in office furniture design. We are recognised for bringing form, function and flexibility together without compromise. By involving our clients at every stage of the work process, we find –together– the right solution for their specific needs.

British and proud, we have a manufacturing facility in South Yorkshire and a showroom in Clerkenwell, London. With the latest BAZ processing machinery recently installed, the factory has more than 38,000 sq ft of space for manufacture and assembly and ample room for our design team to turn client requirements into fully developed designs.

Staverton's skilled team of professionals is committed to delivering the highest quality requirements: our products are designed to achieve FIRA's gold standard, the world's leading independent furniture testing centre. Our bespoke approach, innovative design and collaborative method have earned us a name as a responsible and reliable award-winning British manufacturer.

We comply with all industry regulations, including the supply of responsibly sourced wood and other controlled sources, on-site personnel safety and conduct, quality control, and adherence to management standards such as ISO 9001, ISO 14001, BSI Membership, Safe Contractor Certificate, FIRA Gold Certificate, FISP Membership and FSC® Certificate.

POSITIVE CHANGE

We need to be the change we want to see. Leading by example while learning from others is the best way to drive change.

Business as usual is no longer enough. Nor is merely complying with regulations. We must do more than is expected of us. We need to improve each day. We need to understand our whole impact on the world. And we need to work together to ensure that we learn from each other and drive change.

There is an onus on us not just as manufacturers and designers of products but as individuals. Sustainability can be designed into systems and products, but the real change we need to see is in our attitudes and behaviours. We are all in this together and we all have a role to play.

SOS2 Sit-Stand Workstation

Product Features

SOS2 Sit-Stand Workstation

The SOS2 is the latest evolution of our celebrated SOS range of sit-stand workstations. Designed for flexibility and long-term scalability, it features intermediate leg options to reduce costs on linked bench runs, and hot-swappable actuator columns that allow desks to evolve from fixed-height to fully height-adjustable over time.

Flexible Configurations

Available as single desks, linked bench runs, or mobile workstations on braked castors, SOS2 can be reconfigured as needs change. Optional sliding tops provide easy rear cable access, while retrofittable linking allows simple adjustments to desk clusters.

Cable Management

SOS2 offers improved and scalable cable management, with upper and lower trays plus bulk-capacity risers. Lower trays come in standard (31,365 cm³) or high-capacity (53,550 cm³) sizes – 70% larger for extra space to house power bars, PDUs, and data modules. Magnetic panels make installation and maintenance quick and straightforward.

Durability & Finishes

Built to last, SOS2 supports a wide range of 18 mm top finishes, combining robustness with adaptability to create productive, healthy workspaces that encourage movement throughout the day.

Staverton is committed to a range of socially aware goals, from addressing individual well-being to ensuring minimal environmental impact. [Discover more about our efforts.](#)
