

Quick Overview SW

WELCOME TO OUR WORLD

Staverton has a longstanding history in office furniture design. We are recognised for bringing form, function and flexibility together without compromise. By involving our clients at every stage of the work process, we find –together– the right solution for their specific needs.

British and proud, we have a manufacturing facility in South Yorkshire and a showroom in Clerkenwell, London. With the latest BAZ processing machinery recently installed, the factory has more than 38,000 sq ft of space for manufacture and assembly and ample room for our design team to turn client requirements into fully developed designs.

Staverton's skilled team of professionals is committed to delivering the highest quality requirements: our products are designed to achieve FIRA's gold standard, the world's leading independent furniture testing centre. Our bespoke approach, innovative design and collaborative method have earned us a name as a responsible and reliable award-winning British manufacturer.

We comply with all industry regulations, including the supply of responsibly sourced wood and other controlled sources, on-site personnel safety and conduct, quality control, and adherence to management standards such as ISO 9001, ISO 14001, BSI Membership, Safe Contractor Certificate, FIRA Gold Certificate, FISP Membership and FSC® Certificate.

POSITIVE CHANGE

We need to be the change we want to see. Leading by example while learning from others is the best way to drive change.

Business as usual is no longer enough. Nor is merely complying with regulations. We must do more than is expected of us. We need to improve each day. We need to understand our whole impact on the world. And we need to work together to ensure that we learn from each other and drive change.

There is an onus on us not just as manufacturers and designers of products but as individuals. Sustainability can be designed into systems and products, but the real change we need to see is in our attitudes and behaviours. We are all in this together and we all have a role to play.

[Join Us](#)

Respect for the environment is in Staverton's DNA. We care for our setting by supporting sustainable forestry:

SW

Scrumwall is a flexible space-defining structure that supports workplace agility and scrum-led activities.

The product is available wall mounted, which can be used for meetings in an enclosed space, or two-sided to act as a central meeting point.

Designed with modularity at its core, Scrumwall can be specified in multiple widths up to 3.6 metres as standard. Individual panel sizes and combinations can be customised to suit client requirements.

The fascia panels are available in a variety of customisable materials and finishes, including wooden panels, upholstered fabric panels and dry-wipe whiteboard panels.

Our specially shaped tabletops have been designed to provide a clear view of the screen for all participants, bringing remote working team members closer to the office.

Can You Scrum in Your Workplace?

As the workplace assumes its new role as a hub for collaboration and community, it presents new furniture requirements, particularly the need to help people coalesce with ease.

Cable Management

Tables are available with a variety of in-desk power/data/AV modules to support impromptu plug-and-play meetings. Cable-managed table support columns with a removable cover plate to safely and seamlessly carry cabling.

Fascia Panels

The fascia panels are slid onto the central support membrane using our custom-designed, quick-fit buttons, which make installation and disassembly/reconfiguration of the product fast and easy.

Leg Table Support

A number of meeting table options are available in seated and standing/bar heights to suit the needs of the users. Steel leg table support components and our Staverton 88 wooden leg tables are available (price available upon request).

Where AV integration is not required, worksurfaces can be mounted directly to the fascia panels to reduce the number of components needed.
