BX

Smart, Digital &
Mechanical Lockers

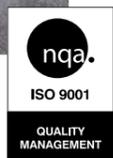

WELCOME TO OUR WORLD

Staverton has a longstanding history in office furniture design. We are recognised for bringing form, function and flexibility together without compromise. By involving our clients at every stage of the work process, we find –together– the right solution for their specific needs.

British and proud, we have a manufacturing facility in South Yorkshire and a showroom in Clerkenwell, London. With the latest BAZ processing machinery recently installed, the factory has more than 38,000 sq ft of space for manufacture and assembly and ample room for our design team to turn client requirements into fully developed designs.

Staverton's skilled team of professionals is committed to delivering the highest quality requirements: our products are designed to achieve FIRA's gold standard, the world's leading independent furniture testing centre. Our bespoke approach, innovative design and collaborative method have earned us a name as a responsible and reliable award-winning British manufacturer.

We comply with all industry regulations, including the supply of responsibly sourced wood and other controlled sources, on-site personnel safety and conduct, quality control, and adherence to management standards such as ISO 9001, ISO 14001, BSI Membership, Safe Contractor Certificate, FIRA Gold Certificate, FISP Membership and FSC® Certificate.

POSITIVE CHANGE

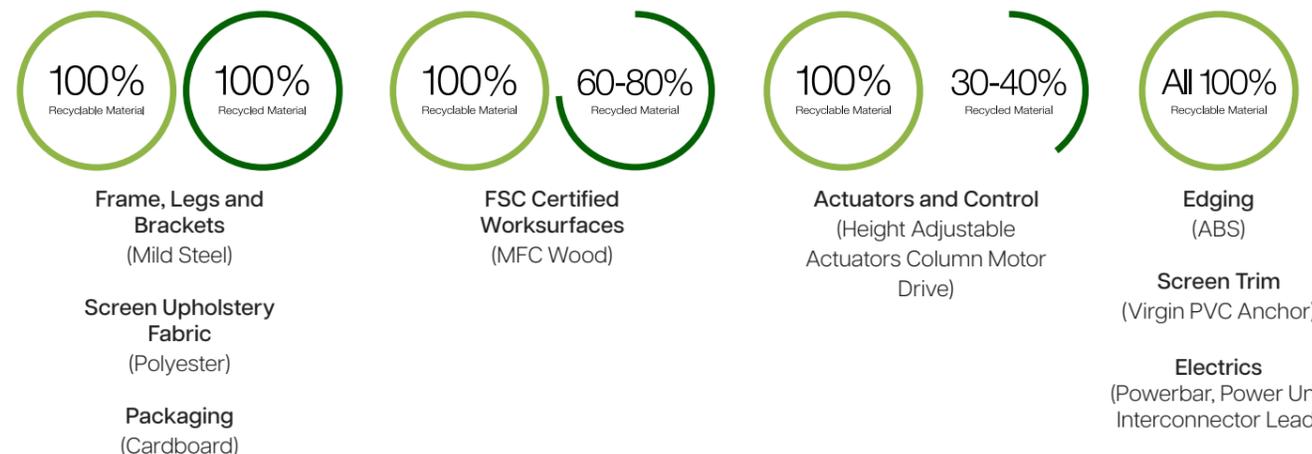

We need to be the change we want to see. Leading by example while learning from others is the best way to drive change.

Business as usual is no longer enough. Nor is merely complying with regulations. We must do more than is expected of us. We need to improve each day. We need to understand our whole impact on the world. And we need to work together to ensure that we learn from each other and drive change.

There is an onus on us not just as manufacturers and designers of products but as individuals. Sustainability can be designed into systems and products, but the real change we need to see is in our attitudes and behaviours. We are all in this together and we all have a role to play.

[Join Us](#)

Respect for the environment is in Staverton's DNA. We care for our setting by supporting sustainable forestry:

Meeting the storage needs of your agile workforce.

Staverton Smart, Digital & Mechanical Lockers

Staverton Lockers are designed for the agile, everchanging workplace. BX, our modular storage system, offers our most customisable range of options. Your lockers, your way.

Customise your colour and tailor your size to the needs of your office and team, easily. Feel the difference by using BX's keyless lock solution, incorporating keypad, RFID and complete wired solutions, without the hassle of changing batteries.

And, as facility managers can monitor locker usage with our Smart Lockers, you can understand people's behaviours and personal storage needs as you go.

*Business information and personal items,
they're more secure than ever.
Whatever contents you want to protect,
we've got a security option for that.*

Why BX Lockers?

Inspire Creativity

Who says storage has to be boring? With BX, your storage can be as unique as your company, helping to create a vibrant, engaging workspace that reflects your brand and energises your team.

Maximum Security

Business information and personal items – they're more secure than ever. Whatever contents you want to protect, we've got a security option for that. From basic combination locks to fully integrated smart systems, BX gives you complete peace of mind.

Agile Work Environments

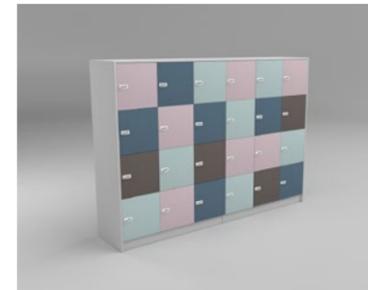

Even the most dynamic working environment requires a facility to keep belongings and confidential documents secure. Workers also want a space they can call their own. BX delivers both – the flexibility agile working demands with the personal touch your people deserve.

Customisation Options

Locker Configurations

Available in single or double door options, BX lockers can be configured to suit any space and any requirement. Mix and match sizes to create the perfect storage solution for your team.

Decorative Panelling

Customise your storage with our easy-add decorative top panels and full exterior cladding. Switch up your colours for a bold statement or use the same throughout for a seamless, sophisticated finish.

Integrated Drawers

Effective storage should be easy to access for everyone. Switch the bottom locker for an integrated drawer to minimise bending and make lockers accessible for all abilities. Choose from our assortment of distinctive and customisable drawer handle options.

Nook Units

Add flexibility to your locker configuration with integrated nook units. A soft, upholstered nook integrated into the locker run, offering a comfortable place to sit, pause, or reset. Ideal for quick calls, changing shoes, or a moment away from the desk.

Planter Boxes

Bring the outside in and incorporate biophilia into your office with our planter units. The addition of plants helps to maximise space, improve wellbeing and provide extra visual interest to your workspace.

Identification Options

Make lockers easy to identify with numbered discs, or opt for the personal touch with ID holders that allow employees to personalise their space.

Lock Solutions

Choose the security system that's right for your business. From entry-level combination locks to fully connected smart systems, BX offers a lock solution for every need and budget.

Zodiac Premium Connected System (SMART)

The complete smart locker solution for businesses that have fully embraced agile working.

Zodiac delivers versatile, intelligent locker management that gives employees the best options to work how and where they want to work, while providing facility managers with a powerful, user-friendly control system.

Key Features:

- Hardwired into building network or WiFi connectivity
- Control up to 48 doors from a single tablet
- Effortless user access through a single 6-digit PIN.
- Features 'Private' and 'Guest' mode
- Monitoring of locker usage and availability
- Remote access and code reassignment
- Simple, intuitive management portal
- Manual override available
- Power access beneath locker units with multiple entry points
- UK-based software support
- Customisable tablet branding

Perfect for: Businesses that want a versatile, fully connected system integrated into their wider workplace technology ecosystem. Admins gain complete oversight and control of all lockers from anywhere, making it effortless to manage a truly agile workspace.

Use your phone to power and access your locker. No batteries. No cables. No compromises.

Echo represents the future of sustainable locker technology. With no batteries to replace and no cabling required from the lockers themselves, Echo can be placed anywhere in your building while minimising environmental impact.

Key Features:

- Smartphone-powered operation
- No battery replacement required
- No cabling from individual lockers
- Exceptional flexibility in placement
- Minimal ongoing maintenance
- Outstanding sustainability credentials

Perfect for: Forward-thinking businesses that value sustainability and want easy, low-maintenance storage options for their employees without sacrificing functionality or security.

Echo

Sustainable Smartphone Solution (SMART)

Nimbus

RFID Integration System (SMART)

*Tap and go.
Seamlessly sync with your
building access control.*

Nimbus offers effective, versatile RFID technology that integrates with your existing access control systems. Sync your building access card to your locker for seamless, frictionless access throughout your workplace.

Key Features:

- RFID card or keypad code access
- Sync with existing building access control cards
- Public and private mode options
- Master key override available
- No complex management system required
- Simple tap-and-go operation

Private mode: Locker is allocated to a specific user

Public mode: Once opened, locker becomes available for other users

Perfect for: Businesses that want the convenience of RFID technology without requiring full system management from their facilities team. Ideal for organisations looking to create a truly connected workplace experience.

Step up from manual dials with affordable digital security.

Gemini delivers the reliability of combination security with the convenience of modern digital technology. Battery operated and offering better ROI than traditional dial locks, Gemini is the smart choice for hot-desking environments.

Key Features:

- Digital combination lock entry
- Battery operated (no hardwiring required)
- More durable than manual dial locks
- Simple punch-in code access
- Public and private mode options
- Better long-term ROI
- Easy to use and maintain

Perfect for: Businesses that want a step up from manual combination locks with easier access and better durability. Ideal for hot-desking environments where simplicity and reliability are paramount.

Gemini

Digital Combination Entry

Fixcode

Manual Combination Lock

Reliable, keyless security at an accessible price point.

The **Fixcode** dial lock removes the hassle of lost keys with a straightforward combination lock solution. An entry-level security option that delivers dependable protection without the complexity of smart systems.

Key Features:

- Manual dial combination lock
- No keys to lose or replace
- Master key override for administrators
- Public and private mode options
- No batteries or power required
- Simple, proven technology

Perfect for: Businesses seeking reliable, keyless security at an entry-level price point. Removes the ongoing administrative burden of managing physical keys while providing dependable locker protection.

Choosing your lock solution
