## Workwall Scrumwall

# WELCOME TO OUR WORLD

Staverton has a longstanding history in office furniture design. We are recognised for bringing form, function and flexibility together without compromise. By involving our clients at every stage of the work process, we find –together– the right solution for their specific needs.

British and proud, we have a manufacturing facility in South Yorkshire and a showroom in Clerkenwell, London. With the latest BAZ processing machinery recently installed, the factory has more than 38,000 sq ft of space for manufacture and assembly and ample room for our design team to turn client requirements into fully developed designs.

Staverton's skilled team of professionals is committed to delivering the highest quality requirements: our products are designed to achieve FIRA's gold standard, the world's leading independent furniture testing centre. Our bespoke approach, innovative design and collaborative method have earned us a name as a responsible and reliable award-winning British manufacturer.

We comply with all industry regulations, including the supply of responsibly sourced wood and other controlled sources, on-site personnel safety and conduct, quality control, and adherence to management standards such as ISO 9001, ISO 14001, BSI Membership, Safe Contractor Certificate, FIRA Gold Certificate, FISP Membership and FSC® Certificate.

# POSITIVE CHANGE

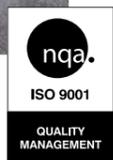

We need to be the change we want to see. Leading by example while learning from others is the best way to drive change.

Business as usual is no longer enough. Nor is merely complying with regulations. We must do more than is expected of us. We need to improve each day. We need to understand our whole impact on the world. And we need to work together to ensure that we learn from each other and drive change.

There is an onus on us not just as manufacturers and designers of products but as individuals. Sustainability can be designed into systems and products, but the real change we need to see is in our attitudes and behaviours. We are all in this together and we all have a role to play.

Respect for the environment is in Staverton's DNA. We care for our setting by supporting sustainable forestry:

# The New Workplace: A Hub for Collaboration

## Can You Scrum in Your Workplace?

Staverton's Workwall and Scrumwall systems represent the future of workplace flexibility. These innovative, modular structures support agile working practices, enabling teams to collaborate effectively in dynamic office environments.

Designed with modularity at their core, both Workwall and Scrumwall create dedicated collaboration zones that bring remote and in-office teams together. These space-defining solutions integrate seamlessly with modern workplace requirements, supporting everything from impromptu stand-ups to structured scrum meetings.

# Why Workwall?

As the workplace assumes its new role as a hub for collaboration and community, it presents new furniture requirements, particularly the need to help people coalesce with ease.

Traditional office layouts no longer meet the needs of today's agile teams. The modern workplace demands flexible zones that can adapt to different working styles, team sizes, and collaboration methods. Workwall and Scrumwall answer this challenge by creating dedicated collaboration spaces that are:

- Easy to reconfigure as team needs change
- Technology-ready for hybrid working
- Visually defined without creating barriers
- Designed for both formal and informal collaboration
- Optimised for clear sightlines to screens and team members

Our specially shaped tabletops have been designed to provide a clear view of the screen for all participants, bringing remote working team members closer to the office and ensuring every voice is heard in hybrid meetings.

## Key Features:

- Supports workplace agility and scrum-led activities
- Modular design allows flexible configuration
- Available wall-mounted or freestanding dual-sided
- Integrates AV technology discretely
- Customisable materials and finishes
- Brings remote workers closer to office teams

# Product Configurations

Staverton offers three distinct configurations to suit different workplace requirements and spatial constraints.

## Scrumwall

### *Dual-Sided Freestanding Unit*

The Scrumwall configuration features a freestanding, dual-sided structure that acts as a central meeting point within open-plan environments. This versatile solution allows teams to gather from either side, making it ideal for central locations in collaborative workspaces. Ideal for:

- Open-plan office collaboration zones
- Central team meeting points
- Agile working areas
- Multi-team shared spaces

## Workwall & Credenza

### *Single-Sided Wall-Mounted Unit with Storage*

This configuration combines the Workwall system with integrated credenza storage, creating a comprehensive wall-mounted solution perfect for enclosed meeting rooms or dedicated team spaces. The credenza component provides essential storage while maintaining the clean, professional aesthetic. Ideal for:

- Enclosed meeting rooms
- Project rooms requiring storage
- Executive briefing areas
- Training and presentation spaces

## Workwall

### *Single-Sided Wall-Mounted Unit*

The streamlined Workwall configuration offers a clean, wall-mounted solution without storage components. This minimalist approach is perfect for spaces where a focused collaboration area is needed without additional storage requirements. Ideal for:

- Compact meeting spaces
- Focus rooms
- Video conferencing booths
- Small team huddle areas

# Key Features

## Modularity & Flexibility

Designed with modularity at its core, both Workwall and Scrumwall can be specified in multiple widths up to 3.6 metres as standard. Individual panel sizes and combinations can be customised to suit specific client requirements, ensuring the perfect fit for any space.

The quick-fit button system allows for fast installation and easy reconfiguration, meaning your collaboration spaces can evolve as your organisation's needs change.

---

## Fascia Panels

The fascia panels slide onto the central support membrane using custom-designed, quick-fit buttons, making installation and reconfiguration remarkably simple and efficient.

### Available finishes

- Wooden panels – natural warmth and sophistication
- Upholstered fabric panels – acoustic benefits and design flexibility
- Dry-wipe whiteboard panels – essential for brainstorming and collaboration
- Panels can be mixed and matched within a single unit, allowing you to create the perfect balance of aesthetics and functionality for your specific needs.

## Cable Management

Tables are available with a variety of in-desk power, data, and AV modules to support impromptu plug-and-play meetings. The cable-managed table support columns feature a removable cover plate to safely and seamlessly carry cabling from the worksurface to the floor. This integrated approach ensures technology is always accessible while maintaining a clean, professional appearance free from cable clutter.

---

## AV Integration

Staverton Scrumwall houses AV capability discretely, integrating screens and collaboration technology seamlessly into the structure. The system is designed to support modern hybrid working requirements, ensuring remote team members can participate fully in meetings.

Where AV integration is not required, worksurfaces can be mounted directly to the fascia panels to reduce the number of components needed and simplify the installation.

---

## Table Support Options

A number of meeting table options are available in both seated and standing/bar heights to suit the needs of different users and meeting types.

### Available finishes

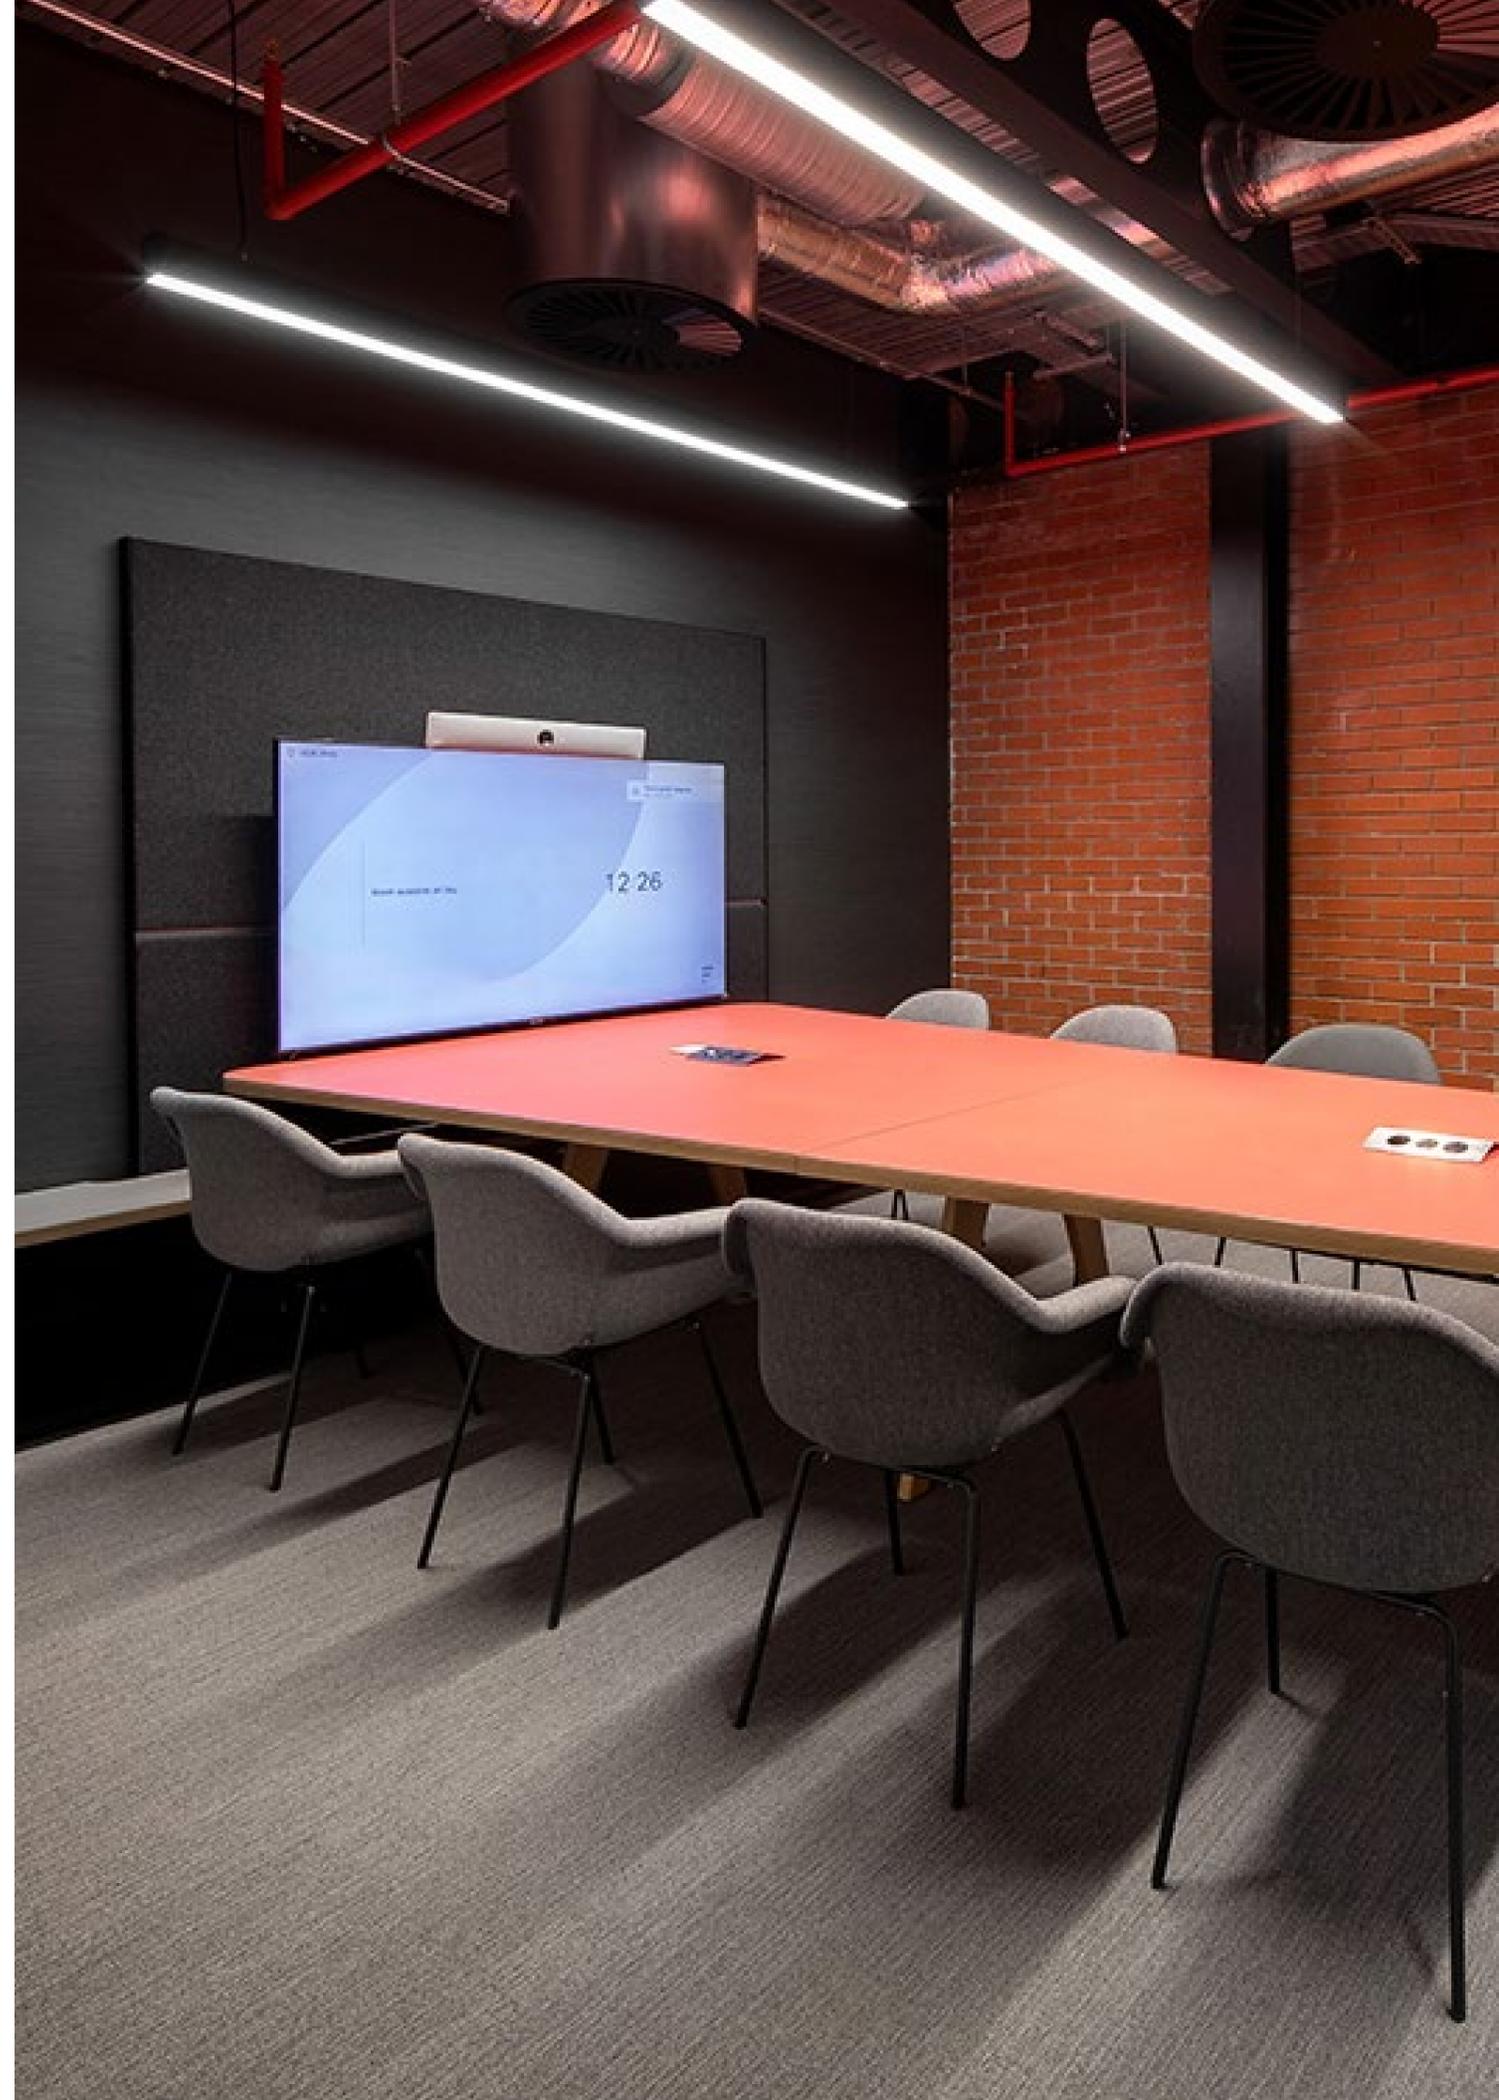

- Steel leg table support components
  - Staverton 88 wooden leg tables (price available upon request)
  - Seated height configurations
- 

## Standing/bar height configurations

Our specially shaped tabletops have been designed to provide a clear view of the screen for all participants, ensuring everyone has equal access to information and can contribute effectively to discussions

# Technical Specifications

<b>Standard Width</b>	Up to 3.6 metres (customisable)
<b>Configurations</b>	Workwall (single-sided) or Scrumwall (dual-sided)
<b>Fascia Materials</b>	Wooden panels, upholstered fabric panels, dry-wipe whiteboard panels (mix and match available)
<b>Table Heights</b>	Seated height and standing/bar height options
<b>Table Support</b>	Steel leg components or Staverton 88 wooden legs
<b>Cable Management</b>	Integrated cable-managed columns with removable cover plates, in-desk power/data/AV modules available
<b>AV Integration</b>	Discreet housing for screens and collaboration technology
<b>Installation</b>	Quick-fit button system for fast installation and reconfiguration of fascia panels

# Use Cases

Workwall and Scrumwall systems excel in a variety of workplace settings, supporting different collaboration styles and team requirements.

### Agile & Scrum Teams

Create dedicated scrum zones where teams can conduct daily stand-ups, sprint planning sessions, and retrospectives. The whiteboard panels facilitate visual management, while integrated technology ensures remote team members can participate fully.

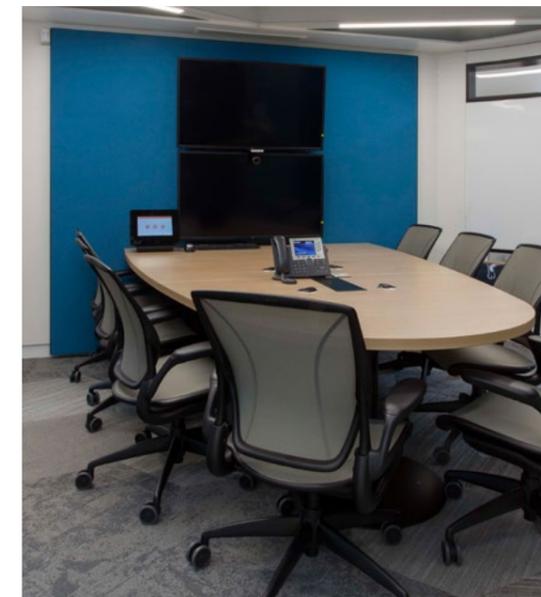

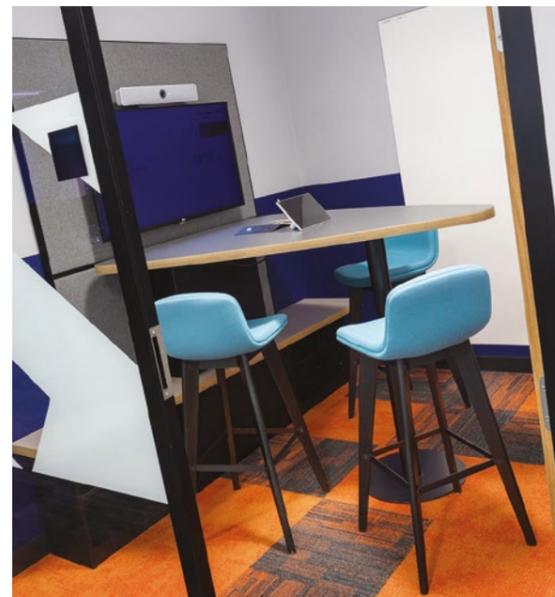

### Training & Education Spaces

Create engaging learning environments with integrated presentation technology and collaborative table configurations. The modular design allows spaces to be reconfigured for different training formats and group sizes.

### Hybrid Working Environments

The specially designed tabletops and integrated AV technology bring remote workers closer to their office-based colleagues. Clear sightlines to screens ensure everyone can see and be seen, creating more equitable meeting experiences.

### Client Presentation Areas

Make a professional impression with beautifully finished wall-mounted configurations that integrate technology seamlessly. Choose premium materials and finishes that reflect your brand values and create a sophisticated meeting environment.

# Band A Finishes

## Membrane Kit and Table Metalwork

## Upper and Lower Fascia - Fabric Upholstered Panels

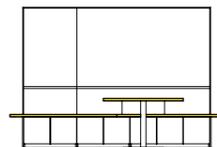

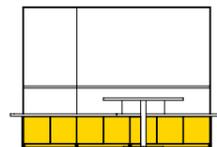

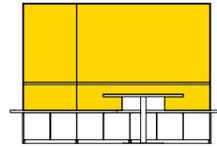

## Upper and Lower Fascia - MFC Panels

## Credenza Carcase and Doors

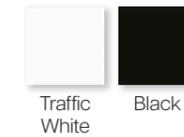

## Decor Panels and Tabletop
