

ENTERPRISE PLAN

TASK AND FLOW

1

Welcome to Enterprise Plan!

The Enterprise Plan is for established businesses needing advanced analysis, strategic planning, and system optimization. It includes market research, financial forecasting, and project management, with large projects broken down for easy execution to help scale your business.

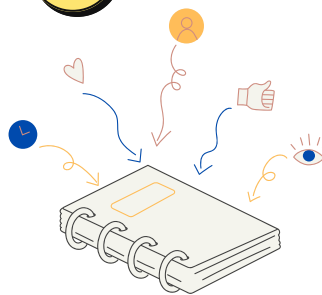

2

Unlimited Submissions

Submit unlimited tasks anytime, from quick admin work to complex projects. We handle them efficiently, one at a time, with no delays or confusion.

3

Cancel or Pause Anytime

Easily cancel or pause your subscription whenever needed. No long-term, just flexible support.

4

Monthly Fixed Cost

Enjoy a predictable, fixed monthly cost with no surprise fees. Get the support you need at a consistent price.

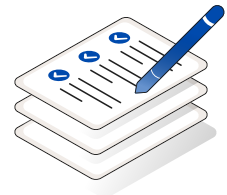

Example Tasks

Includes all of Business

1

Advanced Business Analysis Tasks

End-to-End Systems Integration & Optimization: We integrate various business systems (e.g., CRM with ERP, task management with Slack) to optimize data flow, eliminate duplication, and ensure smooth automation. Our solutions streamline operations and enhance system interoperability.

Enterprise Resource Planning (ERP) System Optimization: We review and optimize ERP systems to improve resource allocation and process efficiency, offering customizations like sales order automation and inventory tracking. We also provide team training to ensure effective ERP use.

Business Process Mapping & Redesign: We analyze workflows to identify inefficiencies and redesign processes for better efficiency. By implementing tools like Zapier, we reduce manual tasks and improve operations.

Market Research & Competitive Intelligence: In-depth market research and competitor analysis provide insights into your market position and growth opportunities. We create detailed reports and market entry strategies for new business ventures.

Customer Experience (CX) Optimization: We analyze the customer lifecycle to identify pain points and enhance touchpoints. Our strategies improve engagement and retention through personalized customer experience optimization.

System Audits & Optimization: We conduct audits on your business systems, identifying inefficiencies and recommending upgrades or integrations to improve performance. Our solutions streamline data flow and enhance system connectivity.

2

Advanced Data Analysis

Advanced Data Analysis & Predictive Modeling: Using tools like Power BI, Tableau, and Google Analytics, we perform advanced data analysis to extract actionable insights. We build predictive models, such as sales forecasts and customer behavior predictions, to inform business strategy.

Business Intelligence (BI) Solutions Implementation: We implement BI tools such as Power BI and Tableau to provide real-time insights, creating custom dashboards to track performance. Our data-driven strategies guide decision-making for business growth.

KPI & Performance Reporting: We build and manage custom KPI dashboards to track essential business metrics, integrating data from CRM, ERP, and website analytics. Our performance reports provide insights and strategic recommendations.

Financial Forecasting & Budget Optimization: We create financial models to forecast revenue, expenses, and profitability. Our analysis helps optimize budgets, and we conduct cost-benefit analysis for new projects or investments.

Data Analysis & Reporting: Using Power BI, Tableau, and other tools, we perform in-depth data analysis to uncover business insights, track trends, and provide clear, actionable recommendations for better decision-making.

3

Unlimited Automation

Streamlined Operations: Automate complex workflows across multiple platforms using advanced tools like Zapier, Make (Integromat), or custom-built integrations. We'll connect your systems for seamless data flow and task management.

Custom Automation Solutions: Tailor automations to your specific business needs,

4

Project Management

Large-Scale Project Management: We oversee large projects across multiple remote teams, managing timelines, resources, and deliverables using tools like Trello, Asana, and Monday.com to ensure clear communication and smooth execution across time zones.

Project Planning & Coordination: We create detailed project plans with Gantt charts, timelines, and resource allocation, ensuring all team members are aligned on goals and deadlines. Remote-friendly tools help track and update progress.

Task & Milestone Breakdown: Large projects are broken into manageable tasks and milestones, ensuring clarity and achievability. We use shared project boards and provide regular updates to keep teams on track.

Risk Management & Mitigation: We identify potential risks and develop strategies to mitigate them. Risks are communicated effectively across remote teams, ensuring everyone is prepared for disruptions.

Cross-Team Communication & Collaboration: We facilitate communication using tools like Slack, Microsoft Teams, and Zoom, ensuring smooth collaboration across remote teams with clear channels for updates and feedback.

Progress Tracking & Reporting: We track project progress through management tools and provide regular updates with visual dashboards, ensuring transparency for all stakeholders.

Resource Allocation & Optimization: We optimize resources, ensuring remote teams focus on critical project tasks by allocating resources based on priority and availability.

Project Budgeting & Financial Tracking: We track project finances, ensure budget adherence, and identify cost-saving opportunities, providing regular updates to keep spending on track.

Post-Project Wrap-Up & Debrief: After project completion, we conduct a virtual debrief with all teams to discuss successes and challenges, gathering feedback for future improvements.

How Task Submission Works

1. **Submit Your Task:** Use the task submission form on your personalized dashboard to submit any small task or request you need assistance with.
2. **We Take Over:** Once we receive your task, our team will get started promptly, handling the details and ensuring completion.
3. **Feedback & Completion:** After we finish the task, we'll send it back for your feedback. If you need revisions or adjustments, we'll make them.

Why Choose Task & Flow's Enterprise Plan?

- **Advanced, Strategic Insights:** The Enterprise Plan provides access to high-level analysis and business optimization strategies that will propel your business forward.
- **Comprehensive Support:** From financial forecasting and strategic planning to data integration and complex system design, we support your business with a comprehensive suite of services.
- **Customized Solutions:** Every task in the Enterprise Plan is tailored to your business's specific needs, ensuring that you get the best solutions and actionable insights.
