**EXADEL AI**

Accelerate SQL Migrations **with AI**

Get valuable data insights faster

How it works →

Exadel's AI-Accelerated SQL Migration blends GenAI automation with deep technical expertise to rapidly convert stored procedures and SQL logic between database platforms—without draining your SME bandwidth.
Our framework isn't just scripts—it's a structured method that enables high-fidelity migrations, reduces cost, and compresses timelines by up to 30%.

Business Advantages →

- **2–3x faster** SQL conversion using AI
- Free up SME capacity for high-value work
- Minimize risk with built-in QA & expert validation

- Scales across industries, DB dialects, and workloads
- Reduces OpEx by sunsetting legacy DB licenses faster

Built For →

CTOs

Heads of Engineering

Data Platform Owners

PE Ops Teams

Real-World Impact →

Our client migrated 1,200+ stored procedures from Sybase to Oracle.

- **30% faster project delivery**
- **33% efficiency gain** from AI+human workflows
- Completed in ~4 months under tight constraints
