

## Vision Pro Court – designed to endure

Launching in May 2026, the new model – named Vision Pro – has been designed as the most rigid model in the Jubo Padel portfolio for installations where durability is paramount. The Vision Pro is certified to UNE 147201:2024 meaning Jubo is currently the only court maker to have its entire product range (including Panoramic, Super Panoramic and Infinity models) certified to UNE.

The structural integrity, quality of steel, welding processes, material traceability, corrosion protection have all been enhanced to the highest Eurocode standards as Padel Plus Jubo strives to deliver the highest quality courts at the best possible prices. With product and service expectations in the British market sky-high, we consider it essential to continually evolve our product range. The upgraded Vision Pro now means our entry level model is tough, enduring and accessible in equal measure.

Having designed the Super Panoramic and Infinity models to look so impressive with their all-glass rear sections, it is easy to think there is no longer a market for the traditional court with vertical posts. But there are lots of instances where courts are in areas with less supervision and/or greater exposure to harsh usage. Municipal courts, those in schools / college / universities, those in more urban locations, those in isolated rural sites ... they can all benefit from a design that looks tougher and is tougher.

As Padel Plus targets the educational market, we believe Vision Pro's combination of enduring components with safety features will be popular. The glass walls are supported by 16 large 120 x 60 x 3 mm pillars, combined with 60 x 60 x 2 mm lintels each secured with a double anchor plate. At each corner, laser-cut folded metal profiles are installed including a decorative cover that can be customized with the client's brand. The glass walls are anchored to the floor with 112 bolts. The tempered glass is fixed to the perimeter of the structural tube and sit perfectly flush with the mesh with no exposed edges. The mesh panels are folded to avoid cuts or injuries to players. Everything is carefully considered so components are easier to install and perform better in situ. This leads to improved playing characteristics: more fun for the player, in a safer environment, with less risk to the operator.

The Vision Pro court is also available as a pop-up court. Just because the court is only needed on a temporary basis for an event or to meet planning stipulations, doesn't mean you can't have our toughest model.

Vision Pro is customizable in line with Jubo's range of accessories and its corner pillars can also be laser cut with a customer's logo. Lighting pillars, benches, coat hangers, bins, sliding and hinged doors, steel court numbers can all be added to your order.

#### Meeting internationally certified quality standards:

- + Metal court structures comply with UNE 147201:2024 on Eurocodes
- + Structural resistance defined by Eurocodes of the UNE-EN 1993 standard
- + Quality of the steel according to UNE-EN 10025-1 and UNE-EN 10204 for at least type 2.1
- + Welding process in our factory to UNE-EN ISO 15614 with welders qualified and certified according to UNE-EN ISO 9606 and with weld inspection acceptance criteria with level C of UNE-EN ISO 5817
- + Traceability of processes to UNE-EN 1090-2
- + Corrosion protection to UNE-EN ISO 12944-2:2018, for an average durability of 5-15 years.

#### In Summary:

- + Meets FIP & Eurocode regulations
- + Triple reinforced mesh with anti-injury system
- + Laser cutting technology
- + Structural steel S350GD + Mangelis® ZM310 EN 1090
- + Reinforced rigid structure EN1993-1
- + Minimal carbon footprint
- + Extra durability & protection ISO 12944-6:2018
- + Rounded net post EN 1510:2024

Padel Plus Jubo's UNE document is available with further information on the comprehensive technical standard for padel courts. There is also a Technical Specification for the Vision Pro Court.

#### Padel Plus Advice

The Vision Pro is the **ideal entry level court**. You benefit from all the design and manufacturing expertise that comes with Jubo's 25+ years of experience, packaged as a **deliberately tough product for demanding club environments**. And it's very good value for money, available shipped and installed, including our lighting, for around £28,000 (as of May 2026). The court is warranted for 5 years (outdoors) and 10 years (indoors) with a designed lifespan exceeding 40 years.

**The Vision Court suits our club's high-intensity usage and is built to withstand continual player impact. We have both doubles and singles models and we're in the process of our second order for a new site."**

**Manager / multi-site UK operator**
