

Wired Probe Kit

Accelerate development with our ready-to-use kit.

Evaluate Sentron's proven ISFET sensing technology with our ready-to-integrate wired probe kits.

Designed for OEM and R&D teams, these kits provide everything needed to rapidly evaluate multiparameter sensing within your own system—reducing development time and accelerating your path from concept to commercialization.

What's Included

3x Replaceable Sensor Tips

Choose from our four different sensor tip options - supporting a variety of sensing configurations.

1x I²C Cable Adapter

1-meter cable adapter providing direct I2C output for seamless integration into your controller.

Communication Protocol Documentation

Complete protocol documentation for converting raw data into specific parameter values.

Engineering Support

Includes 2 hours of engineering support to help accelerate your evaluation and integration.

Sensor Tips

Tip Type	Measurement Parameters
ConeFET	pH EC ORP T
LanceFET	
CupFET	pH T
MicroFET	pH T or EC T

Key Kit Features

- ✓ Ready for OEM integration
- ✓ Standard I²C output
- ✓ Replaceable probe tips
- ✓ Glass-free ISFET sensing technology
- ✓ Multiparameter measurements
- ✓ Rugged and reliable design

Applications

Environmental
Monitoring

Laboratory

Water Quality

Food & Beverage

Industrial Processing
