

# Benchpress<sup>TM</sup>

Strength and Innovation that **Lift Performance**

## Extender

Unlock the **full potential** of your tank mix.

## Next-Generation Adjuvant

New bio-adjuvant for tank-mixing with insecticides targeting chewing pests.

## +Bioavailability

Keeps insecticides working longer inside the insect, maximizing performance.

## +Efficiency

Exceptional bio-adjuvant properties by optimizing each drop for superior deposition, wetting, absorption, and translocation.

Natural and biodegradable

No crop or residue restrictions

Compatible with farmers' current practices

2-year shelf life

Compatibility and stability in tank mixes

# PROVEN RESULTS

Designed to maximize performance in crop protection programs across a wide variety of crops and pests

## Cotton

### Benchpress Boosts Insecticide Efficacy for Whitefly Control in Cotton

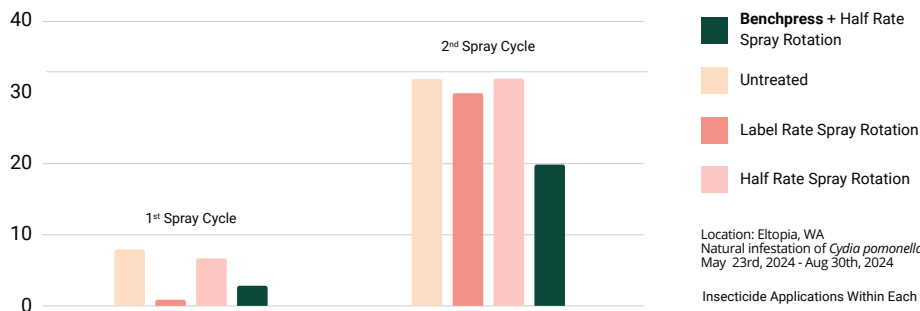

Mean Number of Whitefly Adults per Cotton Plot

## Apple

### Superior Apple Protection with Benchpress and Insecticides

% Sting Incidence per Plot

## Blueberry

### Benchpress Extends Insecticide Efficacy for Blueberry Drosophila Control

Number of Spotted Wing Drosophila Maggots per 20 Blueberries
