

# ABOUT US

Precihole Sports started in 2012 in Thane City of Maharashtra in India and has swiftly established itself as the number one air gun manufacturer in India. The company was formed when Dr. Y. P. Shirsat, a prominent personality in target shooting in India teamed up with India's leading Deep hole drilling manufacturer, Precihole Machine Tools. Precihole Machine Tools with its engineering capabilities in Precision component manufacturing, machine building and over 2 decades of Barrel making experience was quickly able to augment Dr. Shirsat's expertise and develop products for production.

Even though being a Medical Doctor by education, Dr. Shirsat has been tinkering with engineer's tools to develop various design of air guns since his childhood. His passion & dedication towards this sport is the driving force behind Precihole Sports products. Being a professional shooter himself, he is able to identify and implement designs that meet the needs of the shooters. Precihole Sports is the realization of Dr. Shirsat's dream of bringing world class target shooting equipment across the Globe.
