

Payment Acceptance

Card Not Present

Transactions where the card is not physically presented or read by a POS terminal, but occur remotely and are processed through digital or back-office channels.

Types of Solutions

E-commerce websites and mobile sites.

Implementation of payment gateways on web platforms and mobile sites, enabling secure transactions.

In-app Payments

Processing payments within merchant or marketplace applications.

Mail Order / Telephone Order (MOTO)

Solutions for mail or telephone orders, managed through call centers and virtual terminals.

Subscriptions, recurring and merchant-initiated payments

Management of automated and merchant-initiated charges through the use of stored credentials.

Digital wallets and "one-click" checkouts

Fast payment experiences where credentials are stored in the cloud, allowing checkout with a single click.

Card Not Present Products

SEP Direct API CNP

Single PCI-compliant API for processing CNP payments across multiple countries through single technical entry point.

Get Checkout

Integrated online checkout for e-commerce that allows secure payment acceptance and optimizes conversion.

Get Link & Pay

Accept online payments by sending secure payment links through digital channels, without POS or e-commerce.

WhatsApp Pay

Sell via WhatsApp by creating your own product catalog. Accept debit, credit, installments, and cash.

Get Social Selling

Sell online without the need for a website by sharing products on social media with full PCI compliance.

Getnet Click

Portable pocket mPOS solution for quick card payments.
