Card Not Present

In Card Not Present transactions the card is not physically presented or read by a POS terminal, but occur remotely and are processed through digital or back-office channels.

E-commerce websites and mobile sites.

Implementation of payment gateways on web platforms and mobile sites, enabling secure transactions.

In-app Payments

Processing payments within merchant or marketplace applications.

Mail Order / Telephone Order (MOTO)

Solutions for mail or telephone orders, managed through call centers and virtual terminals.

Subscriptions, recurring and merchant-initiated payments

Management of automated and merchant-initiated charges through the use of stored credentials.

Digital wallets and "one-click" checkouts

Fast payment experiences where credentials are stored in the cloud, allowing checkout with a single click.
