The background is a dark, abstract digital landscape. It features a series of glowing, curved lines in shades of blue and teal, suggesting data paths or network connections. Scattered throughout are small, bright orange and yellow dots, resembling data points or nodes. The overall effect is a sense of depth and movement, typical of a high-tech or digital theme.

Media Brands & Communities

All About Circuits is the premier **digital publication** and **community forum** for **electronics engineers** and technologies. Our rich offerings include technical articles, industry news, textbooks, videos, peer discussions, and more—all crafted for career engineers and students. We are the go-to site for the latest news on processors, sensors, analog components, and other electronics aimed at applications, in consumer devices, automotive, IoT, wireless, and AI.

Challenges of Sensor Fusion and Perception for ADAS and AD and the Way Forward

The Challenge: The majority of sensor fusion solutions perform algorithm fusion where each sensor, with its inherent limitations, identifies and classifies objects individually. This can potentially result in suboptimal performance because no single sensor is capable of detecting all objects under all conditions.

The market's need for a sensor fusion and perception solution that can be easily integrated cannot be overstated.

To accelerate ADAS and AD adoption, sensor fusion and perception solutions that provide the required performance, flexibility, scalability, and reliability. Enter **LeddarFusion™**.

In this Tech Talk, we join **Shay Yefka, Senior Manager of Business Development and Strategy at LeddarTech** as he takes us on a deep dive into the future of Sensor Fusion and Perception.

[Watch the Tech Talk](#)

Generating 3D HOVD Environmental Modeling with LeddarFusion

This demo video demonstrates how our data sensor fusion provides superior lane and free space detection, 3D accounting boxes, and object detection and classification performance to deliver a comprehensive 3D HOVD environmental model for perception systems.

AC Solution for Compliance Testing

To help power and test the future of robotics, servers, motors, or any other 3-phase loads, Kikusui offers a new high-power, high-frequency AC power supplies. Ultra testing your devices against compliance standards, you need a fast and reliable AC source that can replicate any waveform you need.

The PCN MEA series offers compatibility low noise and extremely high power output with the ability to simulate any power line disturbance for EMI or antenna testing. Plus, Kikusui offers optional software packages that automate the compliance tests you need to perform. Our AC sources come in several sizes of powerful and efficient models so you can select the model that fits your test requirements and lab space.

Features

- Output custom waveforms up to 50Hz in frequency
- Options for automatic Averages and EMC testing
- Power line abnormality simulation included
- Up to 144 kVA maximum power output
- Competitively low ripple noise

The background features a dark, futuristic digital interface with several overlapping panels. One panel shows a world map with glowing data points, another displays a line graph, and others contain various data tables and charts. The overall aesthetic is high-tech and data-driven.

Performance Marketing

Lead Generation Programs

Performance metrics that matter. Our lead generation programs remain live until we have executed on your lead goals in their entirety, and all leads are **quality-checked** to ensure you are receiving the **best potential customers**.

Cost Per Lead (CPL)

Promote your whitepapers, webinars, and app notes on our sites. Using your content, we build a landing page where visitors fill out lead information and view your content. We collect standard lead information, including the following: First Name, Last Name, Email, Job Title, Company, and Country. Additional lead information may be collected upon request.

Requirement

Asset must not be available ungated (no registration required) elsewhere online.

**Selection guides, brochures, or general marketing materials are not appropriate content, and will be rejected.*

Specifications

- Minimum of 2 assets: whitepaper, webinar, app note
- Images: 600×400
- Leads are delivered within a 60 day window

Promotion Elements Utilized

- Email marketing

Specific promotion will depend on campaign goals

Market Qualified Lead (MQL)

Similar to our CPL campaigns, we promote your content on our sites through the development of landing pages, where we are able to collect lead information. MQLs allow us to ask a qualifying question to better understand where the user might be within a buying cycle. Standard lead fields apply, with additional lead information available on request.

Requirement

Asset must not be available ungated (no registration required) elsewhere online.

**Selection guides, brochures, or general marketing materials are not appropriate content, and will be rejected.*

Specifications

- Minimum of 2 assets: whitepaper, webinar, app note
- Images: 600×400
- Leads are delivered within a 60 day window

Promotion Elements Utilized

- Social media promotions
- Email marketing

Specific promotion will depend on campaign goals

Lead Nurture/Engagement Newsletters

Target leads generated from our **CPL**, **ABM**, and **MQL** programs through custom-branded email marketing campaigns delivered to your exclusive client list. Using your company branding, logo, and colors, we create personalized newsletters with relevant content to maintain engagement and guide your prospects through the buying journey while providing comprehensive performance insights and individual user tracking.

Lead Nurture Dedicated Newsletter (eDM)

A single, custom-branded email delivered to your exclusive leads within 30 days of capture from CPL, ABM, or MQL programs. Designed to match your company's look and feel, this newsletter highlights relevant gated and ungated content to sustain interest and deepen engagement across the buying journey.

- **Delivery Window:** Lead Nurture Newsletters are delivered within 30 days of lead capture

Performance metrics that matter. Our lead nurture programs provide comprehensive tracking of both standard newsletter analytics (open rates, CTR, etc) and **enhanced click-level tracking**, delivering the email addresses of users who clicked on specific links within the newsletter.

This enables highly targeted follow-up campaigns and personalized sales outreach based on demonstrated content interests.

Requirements

Leads must be sourced from active CPL, ABM, or MQL campaigns within the past 90 days and belong to your database.

Recommended Newsletter Content: Mix of gated and ungated materials to drive continued engagement and progressive profiling.

Specifications

- **Target Audience:** Your exclusive leads from CPL, ABM, and MQL programs
- **Custom Branding:** Newsletter designed with your logo, colors, and brand identity
- **Content Mix:** 1- 8 relevant content pieces per newsletter
- **Images:** 1200 × 675

*Specific content mix will depend on lead source and campaign goals

Audience Targeting

Audience Extension and CPC campaigns are designed to promote your content to the **most relevant audience**. These placements are designed to drive awareness and allow users to click through to content within your site.

Audience Extension

Audience Extension delivers ads to users who have regularly viewed content on our sites. The main goal of the campaign is to drive awareness for your company and products.

Specifications

- Ad sizes: 1200×628
- Headline: 50 characters or fewer
- Description: 100 characters or fewer

If your goal is to generate leads, a CPL campaign is a better alternative, as the goal of this placement is to deliver impressions to the most relevant audiences.

Cost per Click (CPC)

CPC campaigns are an effective way to drive users to your site. These placements are delivered both on our sites and to users off-site after they have engaged with our content. Drive success by targeting specific product applications or geography.

Specifications

- Native ad (315×220)
 - Headline: 50 characters or fewer
 - Description: 80 characters or fewer
- Medium rectangle (300×250) max file size: 100KB
- Leaderboard (728×90) max file size 100KB
- Destination URL

If your goal is to generate leads, a CPL campaign is a better alternative, as the goal of this placement is to deliver clicks to your desired landing page.

Account Based Marketing

Account Based Marketing (ABM) allows advertisers to focus marketing budget on **specific target accounts**. EETech offers multiple tactics for reaching specified account lists with a targeted approach. Help us understand the goals of your ABM efforts and our marketing team will tailor an Account Based Marketing campaign that achieves your marketing KPIs and aligns with your account acquisition strategy. **Targeting based on job title and/or company/industry.**

Cost per Lead (ABM - CPL)

Like our standard CPL and MQL campaigns, Account Based Marketing CPL guarantees results. We collect standard lead information, including the following: First Name, Last Name, Email, Job Title, Company, and Country. Additional lead information may be collected upon request. **With large lists, we can also identify and target intent data.**

Specifications

- Minimum of 2 assets: whitepaper, webinar, app note
- Images: 600×400
- Leads are delivered within a 60 day window
- 50 accounts minimum (exceptions possible depending on size of companies targeted)

Cost per Click (ABM - CPC)

Account Based Marketing CPC campaigns are an effective way to drive users from targeted companies to your site and encourage a specific action. Each campaign is optimized to ensure maximum conversions from the most engaged audience segments.

Specifications

- Ad sizes: 1200×1200
- Headline: 50 characters or fewer
- Description: 100 characters or fewer
- 25 accounts minimum (exceptions possible depending on size of companies targeted)

Audience Extension (ABM - CPM)

Account Based Marketing Audience Extension campaigns are a great tactic for increasing your brand awareness and shaping brand perception within a targeted list of business accounts. Our ABM - CPM model allows you to achieve brand awareness in a highly targeted yet cost effective way with the accounts that matter most.

Specifications

- Ad sizes: 1200×1200
- Headline: 50 characters or fewer
- Description: 100 characters or fewer
- 25 accounts minimum (exceptions possible depending on size of companies targeted)

Google Ads Audit & SEM Management

We provide a comprehensive approach to approach to maximizing your campaign performance. Our process includes in-depth audits, data-driven recommendations, and ongoing management to maximize your return on investment.

Google Ads Audit

We conduct a thorough examination of your Google Ads account to identify areas for improvement. Our audit covers keyword performance, ad copy effectiveness, landing page optimization, bid strategies, conversion tracking, and overall account structure.

Comprehensive analysis of your Google Ads account to identify areas for improvement.

- Keyword research and optimization
- Ad copy and landing page alignment
- Bid strategy and budget allocation
- Conversion tracking and goal setting
- Account structure and organization

Provide recommendations: Data-driven insights and actionable strategies to enhance performance.

- Improve click-through rates (CTRs)
- Increase conversions and lower cost per acquisition (CPA)
- Enhance ad relevance and quality scores
- Optimize bidding strategies
- Leverage advanced features (e.g., extensions, remarketing)

SEM Management

We provide ongoing optimization and management to ensure your campaigns deliver maximum ROI. Our services include regular performance monitoring, A/B testing, budget allocation adjustments, and staying up-to-date with the latest Google Ads best practices. By continuously analyzing campaign data, we make data-driven decisions to improve ad performance and drive sustainable growth.

Management: Ongoing optimization and campaign management to drive results.

- Regular performance monitoring and reporting
- A/B testing and experimentation
- Campaign structure optimization
- Budget allocation adjustments
- Stay updated on Google Ads best practices

Pricing: Based on audit findings

Performance Marketing

Performance metrics that matter. Whether it's **leads, clicks, or audience reach**, our Performance Marketing programs guarantee results.

Our lead and click generation programs remain live until we have executed on your click/lead goals in their entirety, and all leads are quality-checked to ensure you are receiving the best potential customers.

Promote your whitepapers, webinars, and app notes on our sites. Using your content, we build a landing page where visitors fill out lead information and view your content. We collect standard lead information, including the following: First Name, Last Name, Email, Job Title, Company, and Country. Additional leads available upon request.

Products	Rate Card Pricing (CPM)	Geo-Targeting Upgrade	Product-Targeting Upgrade
Audience Extension (AE)	\$25	-	-
Cost Per Click (CPC)	\$4	\$1	\$1
Premium Cost Per Lead (CPL) 100% biz email with no students, makers or hobbyist	Starting at \$45 per lead	+\$5	+\$10
Marketing Qualified (MQL) and Account Based Marketing (ABM) Lead	Starting at \$50 per lead	\$5	\$10
Lead Nurture Newsletter	\$1,000 per send		
Account Based Audience Extension	Starting at \$40	-	-
Account Based CPC	Starting at \$15	-	-
YouTube CPV	.12 per View		

Program Details

- Reach of around 65M+ contacts for CPL & ABM campaigns on top of our O & O readership
- Utilize a team of 250 analysts to design specific campaign strategy
- Identify and eliminate BOT leads
- Deliver results through a 3 step quality process
 - Verify every prospect on LinkedIn
 - Email validation through third party email verification tools
 - Verify phone numbers of every prospect through operator, if required
- ABM & CPL campaigns certified GDPR and CASL compliant

NexTarget^{AI}

NexTarget^{AI} gathers data from EETech's engaged engineering community across our digital ecosystem and uses it to personalize campaigns. By targeting the right audience at the right time, we enhance campaign engagement and maximize your return on ad spend.

GROUP

NexTarget Campaign Types

Impact Campaigns

Build maximum brand awareness with **NexTarget Impact**. This campaign leverages our proprietary first-party audience database to target your desired audience across **offsite display and social media**, directing them back to a specific URL such as a product announcement or press release.

\$4,000/mo. Minimum 58K Impressions

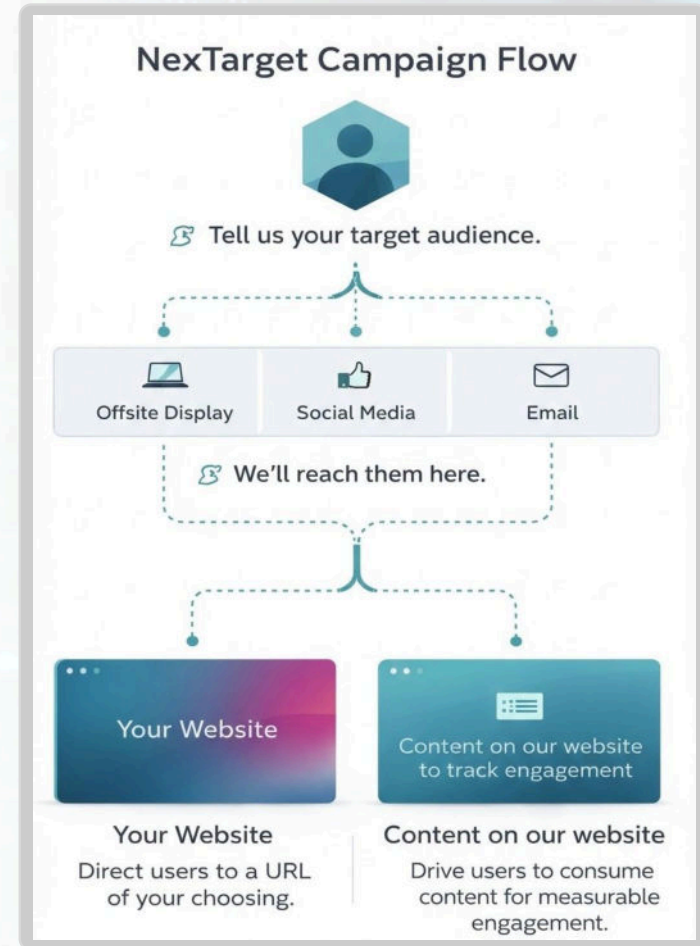

Outcome: Direct users to a URL of your choosing.

Amplify Campaigns

Improve thought leadership and content engagement with **NexTarget Amplify**. This campaign targets users consuming relevant content and provides insights to optimize your strategy and maximize engagement. Users are directed to ungated content on our **website** for deeper engagement tracking.

\$5,000/mo. Minimum 73K impressions

Outcome: Drive users to consume content for measurable engagement.

NexTarget.AI Direct

Intent-Driven Dedicated Newsletter

Overview

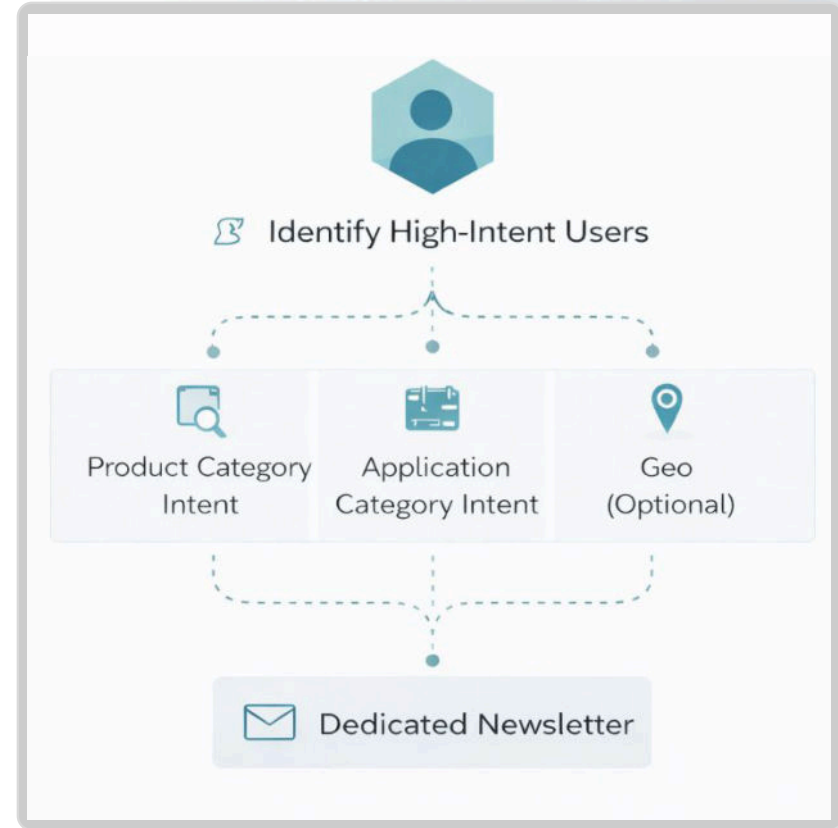

NexTarget.AI Direct delivers a dedicated email newsletter to engineers showing the *highest intent*, based on their engagement with specific product or application categories across the EETech ecosystem. This ensures your message reaches users who are actively researching related technologies.

How It Works

Emails are delivered to engineers showing high intent in selected product or application categories. You may provide full HTML, a layout, or simple assets for assembly. Targeting is based on category intent, with optional geo targeting for added precision.

Investment

\$400 CPM including one product category
+ **\$10 CPM** per additional category
+ **\$10 CPM** for geo-targeting

NexTarget.AI Modal

Onsite, Engagement-Triggered Advertising

NexTarget.AI Modal delivers in-page ads triggered by user actions (scroll depth, time on page, clicks). Embedded onsite, ads **cannot be blocked by ad blockers**, ensuring guaranteed visibility. Drives qualified traffic to your chosen URL (e.g., product launch, gated asset, webinar registration).

Precision Targeting with NexTarget

- AI / Neural Networks
- Automotive
- IoT
- Industrial Automation
- Medical & Fitness
- Military / Aerospace
- Motor Control
- Telecom
- Wearables
- And more....

Investment

\$1,000/week

Additional CPC & CPL Opportunities

NexTarget's CPC and CPL campaigns leverage **AI-driven insights** for high-intent audience targeting and quality lead generation.

CPC Campaigns:

- **Omnichannel Activation (Web + Social): Uses AI** to segment audiences and personalize messaging based on insights from the NexTarget Customer Data Platform (CDP).

CPL Campaigns:

- **Intent-Driven Lead Generation:** Focuses on high-quality leads by using AI to analyze intent signals.

Products	Rate Card Pricing (CPM)	Notes
NexTarget.AI Cost per Click (CPC)	\$10 CPC	Uses CDP to activate audience across web and social media via LinkedIn, Meta, and display platforms.
Intent-Based CPL, ABM, MQL	\$75 CPL	Targets by geo, product, application, and intent signals using AI-matched lead generation.

**Video Production,
Webinars,
& Photography**

EETech Video

Reach the next generation of electrical engineers through effective video content. Showcase your products with spec-focused digital data sheets. Tailor your message for social channels with digestible product sociables. Show your products in action with application-centric how-to videos. **Or design your perfect program from scratch with our custom video programs.**

Fast Facts

Fast Facts videos are a **budget-friendly** marketing presentation that highlight key data points about a new product. This video provides a clear and rapid overview of a product's innovative features that propel its performance and functionality to exceptional levels.

Webinar Production and Promotion

EETech uses BigMarker - an industry-leading webinar production platform - to produce your highly personalized and customizable, engagement-driven products from start to finish. Our production and moderation teams focus on directly connecting you with a **targeted audience of professional engineers.**

LIVE Webinar Production and Promotion

Webinar Creation Specifications:

- 30 - 45 min. client-provided PowerPoint with audio or webcam recording
- 15 min. Q&A session (live or simulated)
- In-webinar poll & post-webinar survey option

Pre-Event Promotion Includes:

- 2 webinar newsletter placements
- 1 weekly newsletter placements
- 1 social media posts
- 10K dedicated newsletter deployment (x2 sends - 5k each)
- 40k banner ad impressions (25k native ad & 15k half page ad)

Deliverables:

- Bigmarker reporting and analytics from the live webinar session
- Lead generation metrics leading up to the live date

Price: \$8,000

Lead Focused Webinar Production and Promotion

Webinar Creation Specifications:

- 30 - 45 min. presentation using client-provided PowerPoint with audio or webcam recording

Purpose:

- The asset will be used as on-demand collateral for lead generation campaigns

Lead Generation:

- Minimum 125 lead buy
- Additional leads start at \$35 per lead

**Price: Webinar creation: \$3,000
Lead generation (125 MOQ): \$4,000
Base Price Total: \$7,000**

Content Creation & Promotion

Content Creation & Promotion

With a network of experienced electrical engineering writers, EETech provides a variety of custom content to fit your needs. Let us create your **blog posts, whitepapers, and research articles** to help you introduce new products and technological advances in an engaging and informative voice.

Basic Article

An excellent way to build your web presence and introduce your newest products and projects.

Specifications

- Technical editor
- 500 - 750 words
- Images/graphics
- Layout with branding

Promotions

- 25K Audience Extension impressions

[View Basic Article example](#)

Technical White Paper

Dive deeper into products and concepts with design details, studies, tables, and images requiring engineering expertise.

Specifications

- Engineer editor
- 750 - 1,500 words
- Images/graphics
- Layout with branding

Promotions

- 25K Audience Extension impressions

[View Technical White Paper example](#)

Advanced White Paper

Educate readers about highly technical concepts and product information.

Specifications

- Engineer editor
- 1,500+ words
- Images/graphics
- Layout with branding

Promotions

- 1 Newsletter native ad - 25K+ circulation
- 25K native ad impressions
- 25K Audience Extension impressions

[View Advanced White Paper example](#)

Industry Article

Submit your own article to our editorial staff, or work with our client content team to create a technical industry article that is submitted for publication. All content must still be reviewed and approved by our editorial staff.

Specifications

- Engineering-focused
- 700 - 1500 words
- Images/graphics provided by client
- Content must be first published on our domain
- Problem/solution format (technical, not promotional)

Promotions

- 25K Audience Extension impressions

Content Creation & Promotion

With a network of experienced electrical engineering writers, EETech provides a variety of custom content to fit your needs. Let us create your **blog posts, whitepapers, and research articles** to help you introduce new products and technological advances in an engaging and informative voice.

Custom Content Creation Services

- Application note (750 to 1,250 words)
- Blogs (300 - 500 words)
- Case study (750 - 1500 words)
- Datasheet
- How-to (500 to 750 words)
- Infographic
- Product aid (Up to 250 words)
- Project write ups (1000+ words)
- Sales note (Up to 500 words)
- Selection guide
- Custom graphic creation

Analog and Digital Signals

Signals represent and transfer data based on time (often referred to in terms of frequency) and amplitude. Systems need signal connectors to use the information transmitted by signals, whether those signals represent video, audio, **sensor data**, or control instructions.

Analog Signals

Analog signals utilize a continuous electrical signal to convey data and more complex information such as voice, image, and video. Analog signals work well with audio and video recordings, physical sensors, image sensors, amplification devices, radio systems, and control systems.

Changes in parameters such as light, sound, **temperature**, pressure, position, or other physical phenomena generate analog signals. These signals then represent a time-varying quantity (e.g., pressure, change in light) using another time-based variable, such as current or voltage.

Website Content Copywriting

Our team of technical writers has the experience and subject matter expertise to create website marketing content for manufacturers and distributors in the electronics industry. When you need to fill content gaps on product or application pages (or other page types), we can deliver the content that will resonate with your engineering audience and **boost your SEO standing**.

Including

- Product profile pages
- Product category pages
- Application pages
- Services pages
- Custom needs

Our Process

- Identify the content gaps on your site
- Prioritize the most important pages that need content first
- SMEs research the topic to ensure we include the most compelling points to support your message and tell your story
- Includes keywords to optimize SEO
- A QA process ensures high-quality writing
- 4 overviews per week (50-100 words per overview), based on the volume of work and available sourcing material

Semiconductors

Symmetry Electronics offers a diverse range of semiconductors that will meet the constantly changing requirements of electronics design across the applications spectrum. From power management to medical technology, and robotics to sound systems, Symmetry supplies semiconductors for projects that are simple or complex, and everything in between.

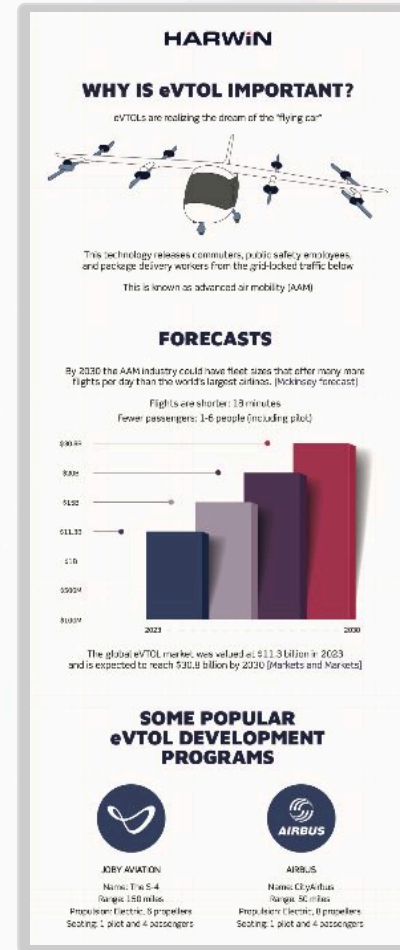

Symmetry will meet your cutting-edge design needs, today and tomorrow, with a vast portfolio from the industry's leading manufacturers. Browse our selection of amplifier ICs, audio ICs, chipsets, clock and timer ICs, communication and networking ICs, counter ICs, data converter ICs, discrete semiconductors, driver ICs, embedded processors and controllers, equalizers, interface ICs, logic ICs, memory ICs, multimedia ICs, power management ICs, security ICs / authentication ICs, switch ICs, and wireless and RF integrated circuits.

Infographics

Combining technical writing and graphic design expertise, we build **infographics that deliver key data points in an aesthetically pleasing and easy-to-digest format.** We can write the content for you or use the content you provide.

Our Process

- Submit the data, information, and images you would like to include in the infographic
- We'll show you a set of templated modules and help you decide which ones would meet your specific information needs
- Our client content and graphics teams work together to create the visual
- Typical timeline: 4 weeks

eBook Download

eBooks are a tried-and-true way to reach a large audience interested in delving deeper into a topic. Capture your target audience's attention with eBooks containing popular articles, advertising for your company, and an introduction written by our editor.

Specifications

- Advertiser chooses high level topic
- 5 articles collated by editor with written intro
- 2 third-page ad units from advertiser
- 1 advertorial full page from advertiser
- Custom lead-generation page
- Reporting
- Leads included
- 100% turnkey

INDUSTRY WHITE PAPER

3 Trends Accelerating Electronics Development

January 20, 2022 | Temp Automation

[Download PDF](#)

eBook Overview

In all engineering domains, development is defined by a Design, Build, and Test (DBT) cycle. Each time a project goes through this cycle, ideas are validated, deficiencies are discovered, and solutions determined. The key characteristic of the DBT Cycle is its speed, which dictates how far product performance can be pushed within the project schedule and how fast the product can get to market.

How are engineering teams speeding up DBT cycles to drive faster PCB manufacturing? The answer is better communication and data transfer with contract manufacturers (CMs) during the Build phase.

Learn the three key trends addressing data transfer and communication between engineers and CMs, accelerating PCB manufacturing and electronics development:

- High Fidelity Data Transfer
- Transparent Operation
- Seamless Change Management

Content Creation

EETech helps clients to create critical content when they don't have the time or the resources to do so. We create content that can resonate with C-Suite executives, FAEs, marketing managers, salespeople, end-users, and consumers.

Written Content

Our experts create datasheets, app notes, product aids, use cases, whitepapers, technical blogs, infographics, and more, all with a keen eye for **technical accuracy**.

A photograph of two men in a professional setting, likely a meeting or collaborative work environment. They are seated at a desk with a laptop and a large monitor. The man on the left is wearing glasses and a dark blazer over a light blue shirt. The man on the right is wearing a grey long-sleeved shirt. They are both looking intently at the laptop screen, which displays a document with text and a diagram. The large monitor on the left shows a technical drawing of a complex mechanical or structural assembly, with various components labeled. The background is slightly blurred, showing office shelves and other equipment. The overall lighting is soft and professional.

Events & Engagement

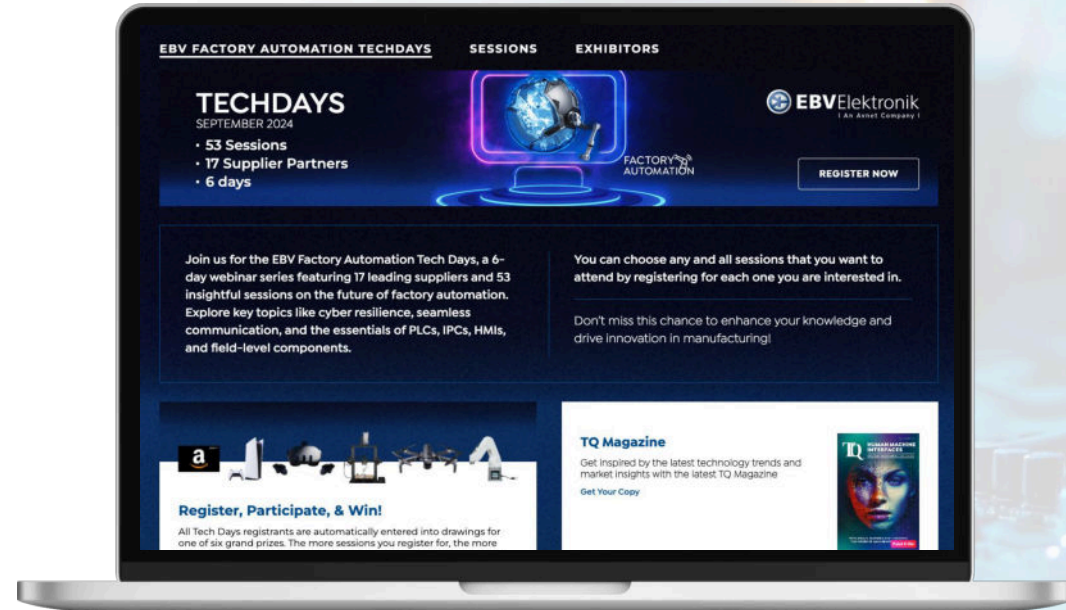

Custom Virtual Events

Virtual events are a proven, effective alternative to in-person events. Our **100% tailored turnkey** virtual events are a great way to showcase your latest product offerings and technical content.

Benefits

- Best in class platform and development support
- Goal-driven promotion and lead generation
- Content consultation and creation
- Content includes: live events, technical content, video, product information
- Single day or multi-day production capacity
- Keynote and live session moderation
- Performance analytics and custom reporting
- Live custom reporting
- Giveaway and prize coordination
- Post-event survey deployment

Design Contests

Our design contests are one of the **best ways** to engage with our audience. This program offers an **outside-the-box approach** for your products to end up in the hands of engineers excited to bring their next great idea to life!

Our design contest program is custom-tailored to get technologies into the hands of engineers actively working on designs over a 20-week period. At the end of the program, all the lead data collected will be delivered to the sponsor.

Design Contest Includes

- Custom Landing page placed on AllAboutCircuits
- Cross Promotion across all EETech communities
- Newsletter Drip Campaign
- Lead Generation
- Final project blogs of completed designs

Pricing starts at \$30,000

***Grand prize(s) are NOT included in the pricing*
