

Product Details

Dhatura Panchang

It is a perennial shrub from the Solanaceae family. It is commonly found in tropical and subtropical regions, often growing wild along roadsides, wastelands, and open fields. The plant usually reaches a height of 1-1.5 meters and is recognized for its large, dark-green leaves and beautiful white, trumpet-shaped flowers with a strong fragrance. It bears round, spiny seed capsules containing numerous small seeds. The plant must be handled carefully because of its toxic nature.

Dhatura alba

Jimson Weed

Active Ingredients

0.5% Alkaloids

Part Used: Whole plant

Ratio: 08:01 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

Medicinal Uses

Dhatura Panchang is valued for its potent medicinal effects when used in small, controlled amounts. It contains active alkaloids like atropine, hyoscyamine, and scopolamine, which provide pain-relieving, antispasmodic, and anti-asthmatic benefits. Traditionally, various parts of the plant have been used to ease pain, reduce swelling, and treat respiratory problems such as asthma, cough, and bronchitis. It is also applied externally to help heal wounds, ulcers, and certain skin conditions due to its antimicrobial action. Since Dhatura is highly poisonous if misused, it should only be used under expert supervision to ensure safety and effectiveness.

Form: Powder*

* Soft/Paste form also available

Size: 1kg, 5kg, 25kg

Packaging Type: HDPE Drum

Country of Origin: India
