

Product Details

Gaozaban

Gaozaban (*Onosma bracteatum*), commonly known as Bugloss, is a perennial herb from the Boraginaceae family. It is mainly found in the temperate regions of Asia, especially in the Himalayan belt. The plant grows about 30-60 cm tall and is easily identified by its hairy stems, rough-textured leaves, and small bell-shaped flowers that range in shades of purple and violet. Its leaves are carefully collected, dried, and widely used in traditional medicine for their cooling and soothing qualities.

Onosma bracteatum

Borage

Active Ingredients

Part Used: Leaves

Ratio: 08:01 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

Medicinal Uses

Gaozaban is well known for its restorative and therapeutic properties. It is considered a natural tonic for the heart and nervous system, helping to strengthen cardiac health and reduce stress. With its diuretic and demulcent effects, it is beneficial in urinary tract issues, kidney ailments, and burning sensations. Gaozaban is also used to ease fever, cough, and other inflammatory conditions while supporting overall vitality and immunity. Because of these qualities, it is often included in traditional Ayurvedic and Unani formulations aimed at promoting general health and wellness.
