

Product Details

Kalmegh

It is an annual herbaceous plant native to South Asia, particularly in countries like India and Sri Lanka. This plant is characterized by its erect stem, lanceolate leaves, and small white to pale purple flowers. It is well-known for its intensely bitter taste, which has led to its name. In traditional Ayurvedic and Chinese medicine, it has been used for centuries for its numerous health benefits, especially for boosting immunity and treating various infections. Its adaptogenic and anti-inflammatory properties make it a valuable herb in herbal medicine.
