

Product Details

Kasni Beej

It is a hardy perennial herbaceous plant that belongs to the Asteraceae family. It typically grows up to 1 to 1.5 meters tall and features bright blue to lavender flowers that bloom mainly in summer. The plant has a deep taproot and a rigid, branching stem. Its leaves resemble those of dandelions, lance-shaped, toothed, and slightly hairy, especially in the basal rosette. It thrives in temperate climates and is often found growing wild along roadsides and in meadows.

Cichorium intybus

Chicory

Active Ingredients

1% Bitters

Part Used: Seeds

Ratio: 10:1 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

Medicinal Uses

Kasni Beej (seeds of Cichorium intybus) are highly valued in traditional Unani and Ayurvedic medicine for their detoxifying and liver-supporting properties. They are known to be effective in managing liver disorders such as jaundice and hepatitis by promoting bile secretion and improving liver function. Kasni Beej also has mild diuretic properties, aiding in the elimination of toxins through urine. Additionally, it is used to manage digestive issues like constipation and loss of appetite. The seeds are believed to have anti-inflammatory, antioxidant, and blood-purifying effects, making them beneficial in conditions related to skin, metabolism, and overall immune health.

Form: Powder*

* Soft/Paste form also available

Size: 1kg, 5kg, 25kg

Packaging Type: HDPE Drum

Country of Origin: India
