

Product Details

Manjishtha

It is a perennial climbing herb native to the Indian subcontinent, it thrives in hilly regions and forest edges, growing up to 1.5 meters in height. The plant features slender, quadrangular stems covered with tiny prickles that help it cling to nearby structures. Its leaves are whorled, heart-shaped, and rough to the touch, while the flowers are small, greenish-white or pale yellow, and bloom in clusters. The roots, which are reddish-brown and long, are the most valued part of the plant due to their rich phytochemical content, including anthraquinones and glycosides.

Rubia cardifolia

Indian madder, Madderwort

Active Ingredients

-

Part Used: Stem

Ratio: 9:1 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

Medicinal Uses

Manjishtha is renowned in Ayurveda for its powerful blood-purifying properties and is commonly used to support skin health, detoxification, and liver function. It is particularly effective in treating chronic skin conditions like acne, eczema, and psoriasis, thanks to its anti-inflammatory and antibacterial effects. The herb is also known to regulate the lymphatic system, reduce pigmentation, and promote a clear, even-toned complexion. Additionally, Manjishtha has been used to manage joint inflammation, support menstrual health, and aid in wound healing due to its cooling, bitter, and astringent nature.

Form: Powder*

* Soft/Paste form also available
