

Product Details

Nisoth (Trivat), Pithori

This plant is native to the Indian subcontinent and can be found in various regions across India, Nepal, and Sri Lanka. Nishot grows in tropical and subtropical climates, often in dry and rocky areas. It has long, trailing stems with ovate, broad leaves. The flowers are funnel-shaped, typically white or pale purple, and bloom in clusters. The plant roots are thick and tuberous, which are the primary part used for medicinal purposes. Nishot is known for its strong, pungent aroma and is recognized in traditional systems of healing for its therapeutic properties.

Operculum turpethum

Turpeth, Indian Jalap

Active Ingredients

-

Part Used: Root

Ratio: 05:01 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

Medicinal Uses

Nishot (*Operculum turpethum*) is highly valued in Ayurvedic and traditional medicine due to its wide range of medicinal benefits. It is known for its potent purgative and detoxifying effects, making it an effective remedy for constipation, digestive disorders, and liver ailments. The root of Nishot is often used to stimulate bowel movements and cleanse the gastrointestinal system. It also has anti-inflammatory and analgesic properties, which help in managing joint pain, rheumatism, and inflammatory conditions. Additionally, Nishot is used in the treatment of skin conditions like eczema and psoriasis, as it has soothing and healing properties. Its diuretic effects also support kidney health and help flush out toxins from the body.

Form: Powder*
