

Product Details

Talmakhana, Kokilaksha

It is a perennial herbaceous which belongs to the family Asteraceae and typically grows in arid and semi-arid regions. The plant has a bushy appearance with large, ovate leaves that are densely covered with fine hairs. Talmakhana produces small, yellow or yellowish-brown flowers that grow in clusters, resembling daisy-like blooms. It thrives in sandy, well-drained soil and is often found in dry forests or open fields. The seeds of the plant are commonly used in traditional healing practices. Its unique appearance and hardy nature make it easily recognizable.

Asteracantha longifolia

Marsh Barbel, Long-leaved Barleria

Active Ingredients

0.3% Alkaloids

Part Used: Seeds

Ratio: 10:01 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

Medicinal Uses

Talmakhana (*Asteracantha longifolia*) is widely used in traditional herbal medicine for its remarkable healing properties. The seeds of this plant are known for their potent anti-inflammatory, analgesic, and diuretic effects. It is commonly used to treat conditions like joint pain, gout, and rheumatism due to its ability to reduce swelling and discomfort. Additionally, Talmakhana is believed to support kidney function by promoting the excretion of toxins through urine, making it effective for urinary tract infections and kidney stones. The plant also has a role in improving digestion, relieving constipation, and promoting overall wellness. In Ayurvedic formulations, it is considered helpful in balancing the body's pitta and vata doshas.

Form: Powder*

* Soft/Paste form also available

Size: 1kg, 5kg, 25kg

Packaging Type: HDPE Drum

Country of Origin: India
