

Product Details

Dhai Ke Phool

Commonly known as the Fire Flame Bush, is a deciduous shrub from the Lythraceae family. It is widely found in dry, rocky, and hilly regions across India and South Asia. The plant generally grows 1-3 meters in height and is easily recognized by its clusters of bright orange-red flowers that cover the branches, creating a flame-like appearance. With simple opposite leaves and vibrant blossoms, this shrub is both medicinally significant and visually striking, with its flowers being the most valued part in traditional medicine.

Woodfordia floribundas

Fire Flame Bush

Active Ingredients

Part Used: Flower

Ratio: 7:1 (Dry Extract)

Purity: 100%

Shelf Life: 36 Months

Medicinal Uses

In Ayurveda, Dhai Ke Phool holds great importance for its healing properties. The flowers are rich in astringent, antioxidant, and anti-inflammatory qualities, making them beneficial in managing diarrhea, dysentery, and bleeding disorders. They are also known to aid wound healing, support digestion, and enhance natural immunity. Due to their rejuvenating effects, the dried flowers are widely used in Ayurvedic formulations like Arishtas and Asavas, where they act as natural fermenting agents that increase the effectiveness of the medicines. Traditionally, Dhai Ke Phool has been used to promote digestive health, skin care, and overall vitality.

Form: Powder*
